I am pleased to inform you that I have received your letter of December 20th, 1991 and by the way let me thank you for your efforts to realize the objectives of SEISMED within an important area which is the Mediterranean. I believe that we have, together, built a very strong platform to act as unique mediterranean scientific community aware of the seismic hazard and risk to which we are exposed at different levels of course. In Tunisia we continue to support your action for the extension of seismed I in seismed II. We have the same feeling concerning the problems of our region in connection with earthquakes. We hope that our project as it is defined in cooperative project network can be sustained.

Referring to your letter of May 10th, 1991 can I ask you to send us the contract giving right to \$ 1000 for the preparation of national report and two group exercises presented in Roma workshop.

With my best regards.

Sincerely Yours

MOHAMED HEALEDH
