UNDRO

MEMORANDUM

A - TO: Mr. G. Dunn, Chairman of
the Standing Inter-Branch Committee on
Disaster Preparedness and Prevention

REF.:

DE - FROM: *Giles Whitcomb*
G. Whitcomb

GENÈVE, 23 January 1985

OBJET - SUBJECT:

1. I refer to our conversation this morning on pending matters with respect to the activities described in the attached summary.
2. Indonesia: The telex sent by Mr. Hamdy on preparatory assistance is self-explanatory; a copy of the relevant document is attached. Both UNDP and OFDA are concerned with project continuity to ensure that the Government makes the necessary preparatory steps and that the potential contributions from UNDP, Canada USAID, UK and Australia, are neither wasted if the project is signed prematurely nor lost if delays result in using earmarked funds for other purposes.
3. Philippines: UNDP-Manila is working with the Central Planning Office (NEDA) to draw up an "umbrella" project (approx. US\$ 170,000) for relief and rehabilitation. This will include several components. One component was proposed by and discussed with the Central Planning Office (NEDA) as a basis for decisions on what should be done to strengthen the national disaster management capability - including whether or not to approve the establishment of the National Disaster, Research and Training Centre. NEDA and UNDP are expected to assign this component to UNDRO. The overall project document is being prepared now and should be ready within two months. You will recall that UNDRO had done a similar evaluation (using Mr. Hansen, Swedish Disaster Team) following the Mount Galunggung emergency, as a component to a UNDP/ILO Project.
4. Philippines National Disaster, Research and Training Centre: On the basis of correspondence exchanged in October between UNDRO and PAGASA, UNDRO is associated with the formulation of a project document in UNDP format. This is now in the hands of an Interministerial working group. It has been agreed that no UNDRO support beyond the project formulation stage will be given until the establishment of the Centre is approved by NEDA and UNDP (see above).
5. ASEAN: There remain some serious misperceptions about UNDRO's potential contribution to its activities. The next ASEAN meeting will probably be held in Bangkok in October 1985 and UNDRO's position, anticipating the issues likely to be raised, should probably be developed soon and contact established with the ASEAN Secretariat Officer in Jakarta who follows the Committee on Social Development.

INDONESIA

UNDRO/UNDP/USAID Project to strengthen National Disaster Management

STATUS

1. UNDP Draft Project Document drawn-up and distributed in English and Indonesian. Project proposal accepted in 'country programme' UNDP and USAID tentative commitments: US\$ 350,000 each. UK now active participant). In one of the five project 'outputs' - the Disaster Management Institute. Seventeen Pre-project planning steps drawn-up but only partially completed thus impeding submission for signature. UNDP Preparatory Assistance Document (US\$ 25,000) drawn-up to support project planning. Central Planning Office (BAPPENAS) has advised 'patience' until internal issues on project execution are sorted out.

UNDRO Involvement/Commitment

2. UNDR0 has been the chief international force behind this preparedness assistance to the government, and is serving as a focal point for contributions from other international bodies and governments. If the project is approved, UNDR0 under sub-contract with UNDP could play a local role in its execution.

* * *

10 January 1985

GW/KB

PHILIPPINES

National Disaster Research and Training Centre

STATUS

1. Under PAGASA's leadership, an Interministerial Working Group (including a central planning office (NEDA) Rep.) is formulating project document in UNDP format. This is to be submitted to NEDA for approval probably in early 1985.

UNDRO Involvement/Commitment

2. UNDRO and UNDP participated in original project document (1978). Follow-up has been sporadic and indecisive until recent exchange of letters with PAGASA. UNDRO now helping Working Group develop proposal but will not further support the project until accepted by NEDA and UNDP. UNDRO then to play still undefined role in raising funds and developing centre.

COMMENTS

3. NEDA to decide on Centre in context overall review of national disaster relief/preparedness machinery following recent typhoons.

4. Interested potential international contributors include: Canada, Japan, UK, USAID. UNDP has US\$ 170,000 available for post-disaster use.

5. The centre has regional implications, and is an issue within the dialogue of ASEAN natural disaster experts.

* * *

10 January 1984

GW/KB

PHILIPPINES

Central Planning Office (NEDA) review of national disaster relief/pre-

paredness capability

STATUS

1. NEDA has proposed a review of national disaster relief/preparedness machinery in light of shortcomings after recent typhoons so as to devise improvements. Decision to follow January meeting of National Disaster Co-ordinating Council.

UNDRO Involvement

2. NEDA feels UNDP/UNDRO project would be appropriate vehicle for review. UNDP has US\$ 170,000 available for post-disaster use and would be willing to commit part to project entrusted to UNDRO. Elements of project document left with UNDP.

COMMENTS

3. OCD acquiescence to the review is probably needed and may be hard to come by. If review held with UNDRO support this would be first such evaluation with a government - presumably to lead to preparedness/prevention improvements.

* * *

10 January 1985

GW/KB

ASEAN

ASEAN Natural Disaster Experts Group

STATUS

1. Experts last met in October 1983. Discussion focused especially on establishment of ASEAN Disaster Centre and compromised recommendation to ASEAN Committee on Social Development (CSD) for such Centres in Manila and Jakarta. COSD seeks further details on respective centre proposals and degree of UNDR0 support. Next meeting probably in Bangkok in October 1985.

UNDR0 Involvement/Commitment

2. Deputy Resrep Malaysia represented UNDR0 at Oct 83 meeting. Expressed UNDR0 support for regional centre in Philippines. Subsequently UNDR0 has decided to support the Philippines centre and the since-developed Indonesia proposal, in national context only. It is likely that UNDR0: 1) will be asked to participate, and 2) will be asked how it can support ASEAN disaster-related activities, especially with respect to centres.

COMMENTS

3. UNDP experience favors regional network of designated centres over a single centre. Consideration is needed as to whether or not UNDR0 would formally advance and support this concept in advance of next ASEAN meeting, and what this support would comprise.

10 January 1985

GW/KB

ASIAN INSTITUTE OF TECHNOLOGY (AIT) - BANGKOK

Regional Disaster Preparedness Centre (RDPC)

STATUS

1. AIT serves a region east of Suez to the Pacific. Its Regional Computing Centre plans to establish a Regional Disaster Preparedness Centre. Very active world-wide promotion has taken place. AIT has identified Mr. Brian Ward as prospective Director and seeks funds to pay for his initial term of office.

UNDRO Involvement/Commitment

2. UNDRO has been solicited for general support to the RDPC, and specifically for funds to pay for the first six months of Mr. Ward's term of office. UNDRO has tentatively agreed to try to do this though with significant conditions to the terms of reference. In particular, that Mr. Ward be clearly identified as an UNDRO consultant and not as an AIT employee; that an as yet to be done survey of regional needs be undertaken; that a project document/description be prepared. The consultancy would be in two parts - support for the second being contingent on satisfactory performance in the first.

COMMENTS

3. Because of AIT's good reputation and the activism of the interested parties the proposal is drawing a good deal of attention among potential donors. In contrast, there seems to be little preparatory work yet done both to define the needs (in terms of the countries to be served) or in defining a training programme or identifying resources. That AIT should be involved in disaster-related activities is probably very useful. That it should do so with inadequate planning would probably do more harm than good.

4. UNDRO's potential involvement has implications with respect to other regional activities - especially supporting the establishment of centres in the Philippines and Indonesia - which need to be examined closely and rationalized.

* * *

10 January 1985

GW/KB

EAST AND SOUTHEAST ASIA

Major Regional Activities

STATUS

1. Besides ASEAN, there are several regional associations and activities which significantly bear on disaster preparedness - especially with respect to identification of needs and intra-regional transfer of technology and information. These include ESCAP, the Typhoon Committee, the Southeast Asia Association of Seismology and Earthquake engineering, and the SE Asia Workshop on Agro-climatic issues.

UNDRO Involvement/Commitment

2. This has alternated over the years between activism and absenteeism. The current trend seems to be towards the latter as UNDRO has declined participation in the recent activities of these three bodies.

COMMENTS

3. These and other smaller similar specialized bodies can be significant mechanisms of exchange and understanding. Usually far more can be gained by being present than by being absent. An assessment and strategy is needed on participation in the context of UNDRO's still to define regional objectives.

* * *

10 January 1985

GW/KB

UNDRO AND THE REGION(S)

For several reasons UNDRO's involvement in the region has progressively waned, though ad hoc activities have kept the Office alive in the minds of interested parties (both governments in the region and representatives of potential 'donor' governments). A clear strategy is needed that would: define needs which UNDRO could realistically meet; develop a relationship of trust and exchange; develop programmes which could be sustained until completion. Needless to say the unique characteristics of the region must be taken into account, not only in terms of types of disasters, but of the understanding and capacities in disaster management of the interested parties.

PREPARATORY ASSISTANCE PROJECT DOCUMENT

Title : Strengthening Disaster Preparedness
and Disaster Management in Indonesia

Number : INS/82/020/A/01/31

Proposed Duration of Preparatory Assistance : Six months

Primary Function : Institution Building

Secondary Function : Direct Support

Sector (Govt. Class) : Humanitarian aid and relief (13)
(UNDP class and code: 1300)

Sub-Sector (Govt. Class): Disaster Relief, Preparedness and
Prevention
(UNDP class and code: 1320)

Government Co-ordinating Agency: Minister Co-ordinator for
People's Welfare (General
Chairman BAKORNAS PBA)

Government Implementing Agency : Department of Social Affairs

Executing Agency : UNDP/OPE in association with
UNDRO

Estimated Starting Date of Preparatory Assistance: November' 84

Government Input : NA

UNDP Inputs : US\$ 25.000

Signed: _____ Date: _____

On behalf of the United
Nations Development Programme

A. DEVELOPMENT OBJECTIVE

1. To strengthen the national capability to respond effectively to natural disasters - which in Indonesia annually claim an average of 1,000 lives, cause 5,000 injured, create 1,000,000 homeless, and damage or destroy property valued at Rp.125,000,000 - thereby mitigating their negative impact on economic and social development.

B. IMMEDIATE OBJECTIVES OF PREPARATORY ASSISTANCE

2. There are four immediate objectives as follows:

- 2.1 OBJECTIVE ONE. To advise and support governmental efforts to insure that all the necessary planning for the Project is done before submission for signature, especially with respect to defining inter-departmental participation, contributions and co-ordination, and to favoring conditions for long-term national standing of Project Output One - The National Disaster Management Institute. The steps to completion of project planning are identified on Attachment 1.
- 2.2 OBJECTIVE TWO. To advise and support governmental efforts to prepare for the establishment, organization and operation of the National Disaster Management Institute with special reference to the feasibility study prepared by an AID/OFDA Consultant in June 1984.
- 2.3 OBJECTIVE THREE. To advise and support governmental efforts to develop a well-defined co-ordinated approach to realizing Project Objectives 2, 3, and 4.
- 2.4 OBJECTIVE FOUR. To complete the Project Document, in particular the supporting annexes covering critical details of Project Execution, as provided for in the Attachment 1.

C. BACKGROUND AND JUSTIFICATION

- 2.5 UNDRO project formulation missions in the first half of 1984 worked with the Government of Indonesia, UNDP, and the principal Third Party to the Project, AID/OFDA, to define and set forth in a Project Document the means by which to strengthen national disaster preparedness and disaster management. These means, identified as four Outputs to the Project Proposal were:

- Output One: The establishment of a National Disaster Management Institute
- Output Two: The compilation of a Disaster Management Organization and Procedures Handbook.

Output Three: The development of an Integrated Disaster Communications and Information Flow Management System.

Output Four: The establishment of an integrated risk monitoring mechanism.

3. The Project Proposal to do this was prepared and discussed during Country Programme Review III, held in July 1984, and received the support of the Government.
4. The Project Proposal and the related Output is predicated on a need and desire for cross-sectoral disaster management whether in disaster prevention, preparedness or relief. Indeed the Government of Indonesia, through Presidential Decision 28, in setting up disaster-related inter-departmental co-ordination Boards at the National, Provincial and Regency Levels implicitly prescribed such a approach. Hence the measures proposed in the draft Project Document rest on a concept of greatly increased inter-departmental collaboration and co-ordination to achieve cross-sectoral disaster management, before, during and after a disaster.
5. While the need for integrated cross-sectoral disaster management and training has been recognized by the Government, and the concept of a national Disaster Management Institute referred to favorably by the President, the demands on inter-departmental collaboration and co-ordination are high. Consequently it has been apparent that certain specific preparatory step must be taken to ensure that the necessary cross-sectoral ground work is done. Attachment 1 is a list of these steps, the satisfactory completion of which is also a prerequisite to support from the principal Third Party - AID/OFDA.
6. By virtue of the fact that the Minister Co-ordinator for Peoples' Welfare, the Minister of Social Affairs and the Director General for Development Assistance (Department of Social Affairs) are respectively General Chairman, First Chairman and Secretary of the National Co-ordination Board FOR Disaster Mitigation : (BAKORNAS PBA) preparatory work has been undertaken by personnel from the staffs of these two Ministers in conjunction with staff from UNDP, UNDRO and USAID and two associated consultants. In particular substantial work has been accomplished toward planning for the National Disaster Management Institute, notably through a feasibility study sponsored by AID/OFDA. However, because of the cross-sectoral nature of the proposed.

project Outputs, because of the Project's relative complexity and innovative nature, considerable systematic inter-departmental planning is needed if inherent difficulties to such an effort are to be addressed before rather than after signature.

OUTPUTS IN PREPARATORY ASSISTANCE

- 7.1 The Outputs to preparatory assistance will be in the form of international advisory and staff services towards:
 - 7.1.1 Completing project planning steps identified on Attachment 1 (Action sheet of 7 July 1984).
 - 7.1.2 Accomplishing the necessary preparatory work (including training of master trainers, preparation of training syllabi and materials, etc) to establish and operate the Institute.
 - 7.1.3 Developing feasibility studies and related work plans for Outputs 2, 3, 4 through inter-departmental discussion (involving in particular the designated Departmental Activity Leaders from Home Affairs, Public Works, Population and Environment) and developing a jointly accepted approach which will insure complementarity between all Project Outputs.
 - 7.1.4 Finalizing the Project Document-in particular, supporting annexes covering critical aspects for successful implementation of the Project.

F. ACTIVITIES RELATED TO PREPARATORY ASSISTANCE

8. These activities are advisory, notably with respect to the establishment, organization, and operation of the National Disaster Management Institute. Advisory services in this area have been and continue to be furnished by a consultant from AID/OFDA. Advisory services are also to envisaged from a second consultant competent in Outputs 2, 3, 4, and from UNDRO and AID/OFDA specialized staff associated with the Project since its inception.
9. The advisory services will be furnished at appropriate times in the Government's own preparations for the project; services will be furnished in Jakarta, with travel for consultation outside Jakarta as necessary.

10. The terminal phase of preparatory assistance will include a seminar of two to five days between designated project staff responsible for all four Outputs to ensure a common conceptual approach to Project Objectives, and to favour inter-action between all Activities.

F. INPUTS

11. UNDP

Specialized advisory assistance through consultants and delegated UNDRO staff member. Some support services - secretarial, translation, preparation/publication of related documents.

12. Other External

AID/OFDA, which has stated its conditional intention to participate in the Project on a Third party, will also participate in preparatory assistance through consultancy and specialized staff support.

13. Government

The Government will participate with appropriate counter part personnel.

INS/82/020/02/31 - STRENGTHENING DISASTER PREPAREDNESS AND MANAGEMENT IN INDONESIA
Planning Items to be completed before signature
(list of July 1984)

A. CROSS-SECTORAL UNDERSTANDING AND ACCEPTANCE

1. Inter-ministerial/departmental discussion and consultations on project proposal, establishment of Inter-departmental Project Team, co-operation and interface between all parties and organizations involved. Acceptance by SAPPEVIAS.

B. CROSS-SECTORAL PARTICIPATION AND CONTRIBUTION

2. Clear identification of Government (inter-department) inputs, corresponding preparation of budgets covering Government contribution (based on budgetary allocation if any, value of staff, space, equipment designated to support project).
3. Preparation of Preliminary Work-Plans with Bar charts for all Activities (including site-selection) related to each Output.
4. Preparation of preliminary list of equipment (with estimated cost) needed for activities related to each output.

C. IMPLEMENTATION RESPONSIBILITIES AND MECHANISMS

5. Ensure PRODOC activities are well-fitted to GOI Infrastructure, especially BAKORNAS/SATKORLAK PBA
6. Identification of Departments and persons to be respectively and individually responsible for activities related to each output.
7. Preparation of appropriate decree on establishment, membership, and functions of Project Advisory Committee.

D. ADEQUACY OF PROJECT DOCUMENT

8. In main text of PRODOC ensure: (i) all aspects of the Project are well defined, (ii) GOI, UNDP, UNDRO, USAID and any other Third Parties understand exactly what is involved in the Project and what roles each are to fulfill.
9. Clearly reflect Interdepartmental Inputs, identified in 2 above.
10. Finalization and incorporation of preliminary Work Plans/Bar-charts and inputs as Annexes to PRODOC.
11. Finalization of budget covering UNDP contribution.
12. Preparation of break down of Third Party Contribution.

E. ESTABLISHMENT OF NATIONAL DISASTER MANAGEMENT INSTITUTE (NDMI)

13. Consultations with MENPAN re-status National Disaster Management Institute. Understanding reached on national status of NDMI.
14. Preparation of appropriate decree on establishment, cross-sectoral organization and mandate of NDMI.

F. INTERNATIONAL PARTICIPATION

15. Contact and follow-up with other potential international parties to Project.

G. CONCLUDING STEPS

16. AID Project Review Board reviews Project Proposal.
17. UNDP Project Appraisal Panel (PAP) reviews project jointly with interested national and international parties.
