Assessments Database

The HIC is collecting the assessments currently being carried out by various organisations working in Iraq. We are now making these assessments available through our Assessments Database, which you can search through this website.

The assessments cover a variety of locations and sectors, and we encourage all organisations planning to work in Iraq to consult the Assessments Database to see which areas have already been covered. If your organisation has carried out an assessment and would like to include it in the Assessments Database, please e-mail an electronic version to HIC-ME-01@un.org.

You can search the Assessments Database by

Organisation:

All on the list

Sector:

All on the list

Governorate:
