FOREWORD

When I joined the Office for the Coordination of Humanitarian Affairs in 2001, the first year of the new millennium, the international community was struggling to address the increase in frequency and severity of both complex emergencies and natural disasters around the world, most notably in Kosovo, East Timor and the Horn of Africa.

Our efforts were later in the year compounded by the tragedy of 11 September and the subsequent events, which had profound implications for the world.

One of the most immediate and obvious consequences was the deterioration of the situation in Afghanistan, resulting in the need to deliver humanitarian relief to more than six million Afghans under difficult and dangerous conditions. Now, we must continue to strive to ensure a smooth interface and transition from relief to rehabilitation and reconstruction. This we must do in full partnership with political, military, development and human rights actors if we are to succeed in creating the conditions for sustainable peace and development. In doing so, however, we must also safeguard the impartiality of humanitarian assistance, which will continue to be delivered to all vulnerable people, no matter what the circumstances.

Our challenges, of course, are not confined to Afghanistan. Africa continues to suffer from a large protracted crisis belt spanning across the continent from Sudan in the Northeast, the Democratic Republic of Congo and Great Lakes in the centre, and Angola in the Southwest. Of particular concern are the large numbers of internally displaced and the slow progress in reintegrating them into stable societies. Of equal concern is the continued or renewed violence, especially in recent weeks, in the Middle East, the Northern Caucasus and the Former Yugoslav Republic of Macedonia (FYROM), which threatens to further destabilise neighbouring countries and regions.

Meanwhile, natural disasters have continued to increase in frequency and severity, resulting in dramatically increased death tolls. In this area in particular, OCHA has sought to strengthen its response. Together with my management team, I have committed to placing greater emphasis on strengthening OCHA's natural disaster response. We will do this in 2002 by mainstreaming natural disaster response throughout each of OCHA's core functions, increasing training and strengthening cooperation with UNDP, the secretariat of the International Strategy for Disaster Reduction (ISDR) and relevant relief organisations, in our activities ranging from prevention and mitigation to response. OCHA will also begin implementing the recommendations of a review of United Nations Disaster Assessment and Coordination (UNDAC) and, in consultation with the Inter-Agency Standing Committee, undertake a review of its Military and Civil Defence Unit.

You will also note from this publication that in January 2002 the inter-agency Internal Displacement Unit within OCHA was in place. I am looking forward to further reporting in 2002 on our efforts to address the troubling and critical elements of our humanitarian response to the crisis of internal displacement around the world.

These efforts, as well as our broader response to crises in 2001, provide OCHA with the opportunity to examine how its internal review process, which we began implementing in 2001, has translated into improvements in the discharge of its core functions in response to complex emergencies and natural disasters. Our response to the Afghanistan crisis will, in particular, put to the test our attempts to strengthen surge capacity; provide better support to the field, specifically in the areas of finance and administration; and to better integrate policy and advocacy support into our crisis response. OCHA will undertake as soon as possible an internal lessons learned exercise to identify areas in need of further improvements as it continues to move ahead with the implementation of its change process.

This publication, which presents a consolidated view of OCHA's extra-budgetary needs at headquarters and in the field, further elaborates on our work in 2001, with the aim of ensuring that we continue to strengthen our capacity and skills to meet the new challenges of 2002.

I should like to thank all of our partners for their support and collaboration throughout this extraordinary year. I look forward to further strengthening these partnerships in 2002 and trust that I shall enjoy your full support.

Kenzo Oshima

Under-Secretary-General /
Emergency Relief Coordinator

OCHA's mission statement is to mobilise and coordinate effective and principled humanitarian action in partnership with national and international actors in order to:

- **Alleviate human suffering in disasters and emergencies;**
- **Advocate for the rights of people in need;**
- **Promote preparedness and prevention; and**
- **Facilitate sustainable solutions.**

INTRODUCTION

The year 2002 marks the tenth anniversary of the groundbreaking General Assembly Resolution 46/182, which created the Department of Humanitarian Affairs (DHA), later reconstituted as the Office for the Coordination of Humanitarian Affairs (OCHA) in 1998 as part of the Secretary-General's reform. In the brief period since OCHA came into being, it has made continuous efforts to strengthen the United Nations (UN) response to both complex emergencies and natural disasters and to improve the overall effectiveness of humanitarian coordination in the field. This work has largely been accomplished through the Inter-Agency Standing Committee, which under the chairmanship of the USG/ERC brings together the UN, non-governmental organisations and the Red Cross movement to address issues of humanitarian concern.

It has also faced dramatic increases in the number and magnitude of complex emergencies and natural disasters, necessitating increases in OCHA's field presence. At present, OCHA maintains presence in 34 countries in Africa, Asia and Europe, compared to 18 in 1997. In 2002, it will consolidate its offices in the Horn of Africa into a regional support office for Central and East Africa and establish a regional support office in West Africa. It will also strengthen its Regional Disaster Response Advisor (RDRA) capacities in Asia and Latin America and increase its RDRA presence in Africa.

In response to these increasing demands, OCHA in 2001 began implementing the recommendations of an internal review designed to strengthen its three core functions of coordination, advocacy and policy development; boost its capacity to provide more timely and effective support to the field; and improve management.

This involved the establishment of 35 additional posts, which were reflected in *OCHA in 2001*.¹ However, OCHA implemented only 18 of these posts in 2001. These were prioritised on the basis of the need to create additional surge capacity and boost administrative support to the field.

In 2001, OCHA also began designing and implementing a new strategic planning process, with the aim of enabling it to annually define its strategic vision, identify priority objectives and plan its activities in a manner that is transparent and can be measured in terms of performance.

As part of this process, OCHA identified the following five priorities for 2001-2002:

- Ensuring the rapid and effective emergency response in coordinating both complex emergencies and natural disasters;
- Targeting policy development, in close consultation with OCHA's major partners;
- Leading effective and integrated humanitarian advocacy efforts for a coordinated response to complex emergencies and natural disasters;
- Strengthening OCHA's capacity for information management and communication technologies in support of humanitarian coordination and response, both at headquarters and in the field; and
- Further developing OCHA into an efficient, well-funded department guided by consistently strong leadership and vision, toward the implementation of strategic priorities, which clearly demonstrate a service-orientation that adds measurable value to the humanitarian agenda.

In 2002, OCHA will implement these priority objectives and continue its efforts to strengthen its capacity in keeping with the change process. It will also monitor and report on its progress throughout the year.

In doing so, OCHA aims to keep its extra budgetary staffing and non-staffing² requirements for 2002 at the same level as those of 2001, while at the same time fully implementing the recommendations of the change process, including filling all of the 35 posts.

To this end, OCHA is requesting a total of US\$ 61 million in extra-budgetary funding for 2002, including the resources required for the new Internal Displacement Unit but excluding Afghanistan and its cash in hand. In

1- Most of the increases in staffing as a result of the change process were reflected in projects in *OCHA in 2001*. This year, most of these posts have been included in the extra-budgetary requirements of the respective branches.

2- While OCHA receives an annual regular budget support for its activities, this amount covers approximately ten percent of its overall financial requirements.

2001, OCHA requested US\$ 63.3 million, or US\$ 59.1 million excluding Afghanistan, in extra-budgetary funding for both headquarters and the field.

As a whole, OCHA will enter the new year in a sound financial state.

At the time of this publication's printing, it had received contributions of US\$ 38 million, with unpaid pledges of US\$ 16.6 million. Thus, its total expected income for 2001 is US\$ 54.6 million. With projected expenditures for 2001 totaling US\$ 54 million, it is clear that OCHA's spending in 2001 will be nearly equal to its income.

Furthermore, OCHA enjoyed a rather healthy carry-over in the beginning of 2001, and expects to have a similar carry-over in 2002, although most of this funding is earmarked for specific countries or projects.

But despite this healthy outlook, OCHA still faces a number of key challenges with respect to its funding that require continued donor support, now and in the future. These include:

- 1) OCHA's unearmarked extra-budgetary staffing and non-staffing needs are consistently under funded.
- 2) A number of key field offices, including Angola, Democratic Republic of the Congo, Sudan, Burundi and Indonesia, have been under funded for 2001.
- 3) IRIN, while appreciated by the donor and humanitarian community as a valuable information management and sharing tool, remains under funded by US\$ 500,000.
- 4) The OCHA Trust Fund for Disaster Relief, which provides cash grants of up to US\$ 50,000 to countries affected by natural disaster, is supported by only a small pool of donors.

OCHA will continue in 2002 to work with donors to address these funding challenges.

In doing so, OCHA hopes to continue to strengthen existing partnerships, as well as to forge new ones with governments, particularly in developing countries, to ensure the continuous improvement of humanitarian conditions.

---	------------------	----------------	----------	------------------

Total Requested (XB and Projects)	US\$ 612,354			
--	---------------------	--	--	--

The Under-Secretary-General (USG) for Humanitarian Affairs/Emergency Relief Coordinator (ERC), with support from the Deputy Emergency Relief Coordinator (DERC), coordinates the response of humanitarian agencies, particularly of the UN system, to humanitarian emergencies; works with governments of affected countries, donors and other interested states in advocating humanitarian initiatives; chairs the Inter-Agency Standing Committee (IASC) and Executive Committee on Humanitarian Affairs (ECHA), and oversees the implementation of their recommendations; mobilises needed resources and support for the programmes of humanitarian agencies; and steers the development of a better public understanding of and support for humanitarian issues. The USG is the main advisor to the Secretary-General on humanitarian issues and provides regular briefings to the Security Council, the Economic and Social Council (ECOSOC) and other UN fora. The ERC also

acts as the UN focal point for the protection of civilians as well as the chief coordinator for the international response to internal displacement. The USG is supported by a senior management team consisting of the Deputy ERC, the Assistant ERC and Director of OCHA Geneva, the Director of OCHA New York, and the Deputy Director of OCHA Geneva.

The DERC is the principal advisor to the ERC on all issues, in particular on key policy and managerial issues. The DERC exercises a managerial overview of the whole of OCHA with a particular view to ensuring the effective cooperation between New York and Geneva, and with the field, as well as with other secretariat departments. The DERC also plays a leadership role in the development and implementation of cross-cutting policy issues involving various branches in New York and Geneva. The DERC exercises coordination/people management responsibilities over the Directors of the New York and Geneva offices.

The New York Director has OCHA-wide functional management responsibility for all financial management, administrative and personnel issues and for policy development, information management and advocacy issues. The Director supervises - both substantively and in terms of coordination/people management - the policy development, information management and advocacy branches, as well as the Executive Office, and exercises coordination/ people management responsibilities over the Chief of the Humanitarian Emergency Branch (HEB).

In 2001, the Office of the USG/ERC, DERC and Director New York:

- Enhanced coordination efforts by providing leadership in new and ongoing humanitarian emergencies and natural disasters and spearheaded humanitarian diplomacy through negotiations on access and other issues in order to enhance the operating environment for humanitarian assistance;
- Coordinated the preparation of contingency planning and the implementation of the UN humanitarian efforts in Afghanistan and advocated for the delivery of assistance to and the protection of Afghan civilians;
- Strengthened UN capacities to respond to the needs of internally displaced persons (IDPs), in part through the establishment of a small, non-operational Internal Displacement Unit within OCHA to support the ERC in ensuring an effective, inter-agency response to the needs of IDPs;
- Initiated action on the implementation of the 54 recommendations contained in the Secretary-General's reports on the protection of civilians in armed conflict, including the preparation of an implementation road map, an aide memoire and a joint Department of Peace-Keeping Operations (DKPO), Department of Political Affairs (DPA) and OCHA planning agreement on peacekeeping operations in order to ensure the protection of civilians;
- Analysed – together with UN Agencies – ways of strengthening the system-wide response to natural disasters, and began implementing the recommendations of the UNDAC review, ranging from improved advocacy, deployment procedures, member training and funding and support from partner organisations;
- Strengthened relationships with developing countries, through more frequent and personal interaction and the institution of regular briefings of developing countries – including the Group of 77 (G-77), African, Asian and Latin American and Caribbean regional groups – on issues of immediate concern to OCHA and/or of interest to member states;
- Advocated, in collaboration with the other humanitarian agencies, for more reliable funding for staff security and a stronger Office of the UN Security Coordinator (UNSECOORD) and worked, through the IASC, on measures to strengthen UN/Non-Governmental Organisation (NGO) collaboration at the field level on the use of common communications, joint security planning, information sharing and context analysis;
- Provided guidance to the Inter-Agency Task Force on Disaster Reduction, and supported the efforts of the Inter-Agency Secretariat for the ISDR. This included promoting increased awareness of the importance of disaster reduction, developing risk reduction methodologies, sharing innovative experiences in disaster management, and promoting closer links with the scientific and technical community in the implementation of the strategy;
- Worked closely with donors and other member states to put OCHA on more stable financial footing, by increasing its share of the UN regular budget and by working with donors to ensure more predictable extra budgetary funding sources;
- Took steps to ensure the full implementation of OCHA's internal review, with the aim of improving field support, strengthening management, and ensuring that OCHA better fulfils its core functions of coordination, policy development and advocacy in support of the operational agencies;
- Worked closely with the Secretary-General and the Security Council to promote and advocate for humanitarian issues, in particular pertaining to access and protection for vulnerable groups and the needs of the internally displaced; and
- Ensured the effective day-to-day management of OCHA as a whole.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Ensure rapid and effective emergency response in coordinating both complex emergencies and natural disasters.
- Target policy development, in close consultation with OCHA's major partners.
- Lead effective and integrated humanitarian advocacy efforts for a coordinated response to complex emergencies and natural disasters.
- Strengthen OCHA's capacity for information management and communication technologies in support of humanitarian coordination and response, particularly in the field.
- Further develop OCHA into an efficient, well-funded department guided by consistently strong leadership and vision and steer OCHA toward the implementation of strategic priorities that demonstrate a service-oriented approach and add measurable value to the humanitarian agenda.
- Continue engagement in the context of the ISDR.
- Further strengthen OCHA's strategic planning through the consolidation and streamlining of programme planning and budgeting processes.

OFFICE OF THE DIRECTOR OF OCHA GENEVA / ASSISTANT EMERGENCY RELIEF COORDINATOR (AERC)

Office of the Director				
Planned Staffing	RB	XB	Projects	Total
Professional	1	2	-	3
General Service	1	2	-	3
Total	2	4	-	6

Staff and non-staff Costs (US\$)	266,600	567,300	-	833,900
----------------------------------	---------	---------	---	---------

Total Requested (XB and Projects)	US\$ 567,300
--	---------------------

The Director of OCHA Geneva serves as AERC and is a member of OCHA's senior management team. The AERC manages the activities of OCHA Geneva related

to both natural disasters and complex emergencies. In this context he works closely with other members of the senior management team to ensure effective cooperation with humanitarian agencies as well as with the political and peacekeeping components of the UN system. He represents the ERC in contact with governments and organisations based in/or with offices in Europe. In his capacity as AERC, he chairs the Inter-Agency Standing Committee Working Group (IASC-WG), and is often requested by the ERC to travel to countries in crisis to undertake negotiations or review coordination arrangements.

The Deputy Director, OCHA Geneva, oversees the day-to-day management of the Office of the Director, as well as the staff from the Advocacy and External Relations Section, Policy Development Section, the Administrative Office and the IASC Secretariat based in Geneva.

In 2001, the Office of the Director:

- Undertook missions to: South-Eastern Europe, including the Former Yugoslav Republic of Macedonia and Kosovo; Central Asia, including Turkmenistan, Uzbekistan and Tajikistan; North Caucasus, including Chechnya; Great Lakes Region (Burundi, Rwanda, Uganda); and Horn of Africa (Ethiopia, Eritrea, Kenya). These missions were carried out to assess humanitarian coordination mechanisms and to undertake humanitarian negotiations.
- Oversaw implementation of the Change Management Process [in Geneva], including the successful merger of the previously separate desk functions for natural disasters and complex emergencies into the new Response Coordination Branch, the creation of the Emergency Services Branch (ESB) and the strengthening of the Administrative Office.
- Chaired the IASC Working Group to improve links between policy making and humanitarian efforts in the field, and ensured that agreed decisions and action points were effectively and efficiently followed up.
- On behalf of the ERC, supervised OCHA's resource mobilisation efforts world-wide.
- Provided day-to-day management of OCHA Geneva branches and sections and the implementation of 2001 work-plans.
- Represented the ERC in negotiations for improved coordination and collaboration with Europe-based partners such as the European Union (EU) and North Atlantic Treaty Organisation (NATO).
- Represented the ERC in consultative donor bodies established to monitor developments in various countries.
- Carried out extensive humanitarian diplomacy with member states and donor groups, to create awareness on humanitarian concerns in complex emergencies and natural disasters.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Direct the activities of OCHA Geneva to ensure effective and timely support to Resident and Humanitarian Coordinators in natural disasters and complex emergencies, including through ensuring that OCHA field offices are fully staffed and effectively backstopped from headquarters.
- Oversee the effective implementation by the IASC subsidiary bodies of the tasks assigned to them for developing policies and guidelines on humanitarian issues, ensuring greater cohesion between humanitarian policy making and field coordination.
- Ensure the final implementation of the Action Points of the Emergency Relief Coordinator on the Report of the Change Manager and of OCHA's management commitments.
- Undertake field missions to support Humanitarian Coordinators and country teams in humanitarian negotiations and to assess and support coordination mechanisms.

EXECUTIVE OFFICE - NEW YORK

The Executive Office assists the Under-Secretary-General/Emergency Relief Coordinator in the discharge of his financial, personnel and general administrative responsibilities and provides administrative and programme support for the substantive and coordination activities of the office, both at Headquarters and in the field. The Executive Office comprises the Administrative Services of the New York and Geneva Offices, which provide support for their respective offices and the field.

The Administrative Service in New York also serves as the Executive Office of the Department, overseeing and coordinating the overall administration of the New York, Geneva and field offices. In line with the new functional management approach recommended by the internal management review, the Executive Office shall maintain responsibility for the administration of the whole of OCHA, including substantive supervision of the Administrative Office in Geneva and the field.

The Office's plan of activities will depend, to a large degree, on the orientation and scope of OCHA's overall substantive programmes, for which programme and administrative support services are provided.

In that context, overall support services will be enhanced to ensure that they are cost-effective, of high quality and timely, and result in the effective implementation of the Office's programmes and activities.

To that end, the Executive Office will support Management in further implementing the recommendations of the Change Manager's Report, including the development and consolidation of critical management tools that are key to OCHA's smooth operations. In particular, the Office will support the implementation of a strategic planning process to ensure coherence in the annual work planning, budgetary, human resources cycle; develop OCHA's policies, and implement procedures in the area of human resources management covering recruitment, mobility, promotion and career development; create a "real-time" consolidated internal OCHA financial accounting management system covering income and expenditure for OCHA's main programmes and projects; continue to improve the system of financial reporting; and undertake a comprehensive review of OCHA's trust funds to ensure optimal management and utilisation of its extra-budgetary resources.

In addition to its oversight responsibilities in the financial, human resources and general administration of OCHA and the support provided to the New York Office and its programmes, the Executive Office assists the Emergency Relief Coordinator in the administration of the Central Emergency Revolving Fund (CERF). This includes ensuring compliance with the rules and procedures governing the use of the Fund, monitoring advances and replenishments, ensuring financial reporting from organisations utilising the Fund and preparation of related documentation for distribution to Member States, intergovernmental bodies, non-governmental organisations and UN operational agencies. The Executive Office manages the Trust Funds under the responsibility of the New York Office and provides administrative support to OCHA's IRIN offices in the field.

ADMINISTRATIVE OFFICE - GENEVA

The Administrative Office assists the Director of OCHA Geneva in the financial, personnel and general administration of the Geneva Office and various Geneva-based projects related to natural disasters and complex emergencies, and provides dedicated administrative, financial and logistical support for OCHA's humanitarian operations in the field. The Office manages the Trust Fund for Disaster Relief and provides budget services to the ISDR and the UN Office for the Coordination of Humanitarian Assistance to Afghanistan (UNOCHA).

In 2001, the Executive Office (NY) and the Administrative Office (GVA):

- Finalised the special administrative procedures for emergencies, approved in June 2001;
- Coordinated preparations for the review of OCHA's proposed programme budget for the biennium 2002-2003 by the Advisory Committee on Administrative and Budgetary Questions (ACABQ), Committee for Programme and Coordination (CPC) and the Fifth Committee of the General Assembly;
- Coordinated the preparation of OCHA's programme performance report for the biennium 2000-2001;
- Launched the recommendations of the Change Management Process to ensure the effective functioning of the new Administrative Office in Geneva;
- Finalised the development of a "real-time" financial accounting system for OCHA;
- Exercised the delegation of authority conferred on OCHA in respect to emergency Trust Funds;
- Developed the expanded occasional recuperation break (ORB) project aimed at improving conditions of service for field staff particularly in the area of rest and recuperation;
- Negotiated a Memorandum of Understanding (MOU) with the United Nations Office at Geneva (UNOG) Central Administrative Services to ensure dedicated, timely and effective financial administrative, personnel and common support services for OCHA's requirements in the field, particularly in emergencies;
- Participated in the Information Management Thematic Network with a view to developing and enhancing administrative data base systems, particularly in the areas of human resources management and property control;
- Responded to audit of the Geneva Office and implemented audit recommendations, including improved financial tracking, treatment of pledges, reconciliation of Inter-Office Vouchers (IOVs) and property management;
- Worked closely with Office of Human Resources Management (OHRM) concerning the Human Resources Management (HRM) Action Plan for OCHA covering such areas as recruitment, gender balance, geographical distribution, mobility, training, performance appraisal, and staff management relations;
- Developed mechanisms to improve vacancy management, selection of staff for field appointments and re-assignments;
- Administered the budgetary, financial, personnel and common support requirements of OCHA.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Further enhance administrative support services for the effective implementation of OCHA's programmes and activities.
- Evaluate and review the use of the emergency administrative procedures.
- Finalise, in collaboration with the substantive areas, a roster of emergency personnel for rapid deployment, including standing arrangements with governments, operational agencies of the UN system, and other humanitarian partners.
- Develop and disseminate user-friendly Administrative Manual and Guidelines to assist staff, both at headquarters and in the field, to have a better understanding of UN rules and regulations, policies and procedures, and staff entitlements.
- Implement the "real-time" consolidated financial accounting management system.
- Develop and enhance data base administrative systems particularly in the areas of human resources management and property control.
- Support the implementation of strategic planning process to ensure coherence in work planning, budgetary and human resources management cycle.
- Coordinate the preparation of OCHA's proposed programme budget for the biennium 2004-2005.
- Develop a mechanism for identifying, monitoring and reporting on workload indicators for administration.
- Develop OCHA's policies and implement procedures in the area of human resources management, including recruitment, mobility, promotion and career development and oversee the staff development and learning project.
- Develop simplified working arrangements with OCHA's service providers in the field.
- Implement project for expanded ORB to improve conditions of service for field staff in the area of rest and recuperation.
- Enhance system of financial reporting.
- Review OCHA's Trust Funds to ensure optimal management and utilisation of resources.
- Review and evaluate the MOU with UNOG Central Administrative Services to ensure maximum support services to OCHA.

STAFF DEVELOPMENT AND LEARNING PROJECT

Staff development and learning have been identified as critical elements for strengthening OCHA. Through improved career and staff development, OCHA aims to ensure that it is able to attract, retain and build a loyal cadre of dedicated and experienced staff, who possess the skills necessary for the multifaceted aspects of coordination, in particular in the field. To this end, OCHA in 2001 defined the core competencies required of all OCHA staff and begun implementing a comprehensive staff development and learning programme. It will continue in 2002 to pursue these objectives through the following priority activities:

- **Staff Security & Safety Training**

Work closely with UNSECOORD to ensure that all OCHA staff are trained within a three year period.

- **Emergency Field Coordination Training**

Build OCHA and inter-agency capacity for effective field coordination in complex emergencies. This will be done by organising four residential workshops for 160 staff, one-third of whom will be IASC partners with the remaining two-thirds coming from OCHA.

- **Surge Capacity Training**

Develop a customised training programme together with the OCHA Emergency Service Branch and its partners to prepare external stand-by personnel for deployment in the first phase of a complex emergency.

- **Management Training**

Develop training programmes for financial and administrative staff, with the objective of improving efficiency and accountability.

- **OCHA Orientation**

Update this course to ensure it is comprehensive and contains all functional units of OCHA, and new areas such as the Internal Displacement Unit. Three workshops will be conducted during the year.

Staff Development and Learning Project				
Planned Staffing	RB	XB	Projects	Total
Professional	-	-	1	1

Total Requested (XB and Projects)	US\$ 787,300
--	---------------------

- **Inter-Agency Training Materials**

Support efforts through the IASC to develop inter-agency training material, particularly in the areas of human rights and international legal instruments, contingency planning and negotiations.

- **Distance Learning**

Develop distance learning programmes using Web and Compact Disc Recordable Memory (CD-ROM) technologies to improve delivery of customised training to field based OCHA staff.

-----------------------------------	------	---------

The General Assembly resolution A/Res/46/182 led to the establishment of the Inter-Agency Standing Committee (IASC) under the chairmanship of the Emergency Relief Coordinator. Within the humanitarian community the IASC provides a unique forum to bring together members of the UN family, the Red Cross Movement, and three groupings of major international non-governmental organisations*. Their task is to shape humanitarian policy and work together to improve emergency response. Most recently, the IASC has worked on several guidelines in an effort to support field offices to deal with issues such as internally displaced persons, a common humanitarian action plan, use of armed escorts, and field security. Reports have been prepared on the humanitarian impact of sanctions, the humanitarian impact of small arms, and protecting civilians in armed conflict. Efforts have been made to improve emergency response on the ground, and ensure that gaps in assistance are quickly addressed - notably in West Africa, Indonesia, the Horn of Africa, the Democratic Republic of the Congo (DRC), North Caucasus, Sudan and Afghanistan.

The IASC meets formally at least twice a year and deliberates on issues brought to its attention by the ERC and the IASC Working Group (IASC-WG). The IASC-WG is composed of senior representatives of the same agencies, and acts as the inter-agency forum for consultations on all aspects related to humanitarian issues.

Subsidiary bodies of the IASC, reference groups or tasks forces are created on an ad hoc basis to discuss issues at the technical level. Their work often forms the basis for IASC discussions and ultimately for IASC decisions.

The ECHA** is chaired by the Emergency Relief Coordinator. It is one of the four committees created by the Secretary-General within the framework of UN Reform with the aim of enhancing the coordination between UN Agencies involved in Humanitarian Affairs and the UN DPKO and DPA. The participation of DPA and DPKO adds a political/military dimension to the humanitarian consultations and ensures that issues of political/military interface during humanitarian crisis are addressed. ECHA meets monthly and its main tasks are to assist the Secretary-General in harmonising work programmes, formulating recommendations to inter-governmental bodies, and addressing those humanitarian issues that could benefit from joint discussions with DPA and DPKO.

In OCHA a single Secretariat serves the IASC and ECHA. This arrangement ensures that parallel discussions in the two committees are based on a common understanding of problems and on effective decision making processes.

* The members of the IASC are the Heads, or their designated representatives of UNDP, UNICEF, UNHCR, WFP, FAO, WHO and OCHA. In addition there is a standing invitation to IOM, ICRC, IFRC, OHCHR, the Representative of the Secretary-General on IDPs and the World Bank. The non-governmental organisations consortia ICVA, Inter-Action and SCHR also have a standing invitation to attend.

** ECHA's membership is composed of Executives at the highest level. Its members include UNDP, UNICEF, UNHCR, WFP, OHCHR, DPKO, DPA, UNRWA, Office of the Special Representative of the Secretary-General for Children in Armed Conflicts, WHO and FAO.

In 2001, the IASC/ECHA Secretariat in New York:

- Prepared and organised the meetings of the IASC and ECHA, as well as ad hoc meetings on thematic issues, such as security, internal displacement, peace-building, and country-specific concerns;
- Strengthened the linkages between ECHA and other Executive Committees, namely the Executive Committee on Peace and Security (ECPS) and the UN Development Group (UNDG);
- Briefed the Humanitarian Liaison Working Group (HLWG) on the progress of the IASC meetings;
- Together with UNDG's secretariat, assisted in the preparation of an inter-agency response to the European Commission's Communication on partnership with the UN system;
- Facilitated the preparations of the Humanitarian Segment of ECOSOC;
- Worked closely with UNDG and ECPS secretariats to ensure that ECHA members fully participated in Secretariat discussions regarding the response to the crisis in Afghanistan;
- In collaboration with UNDG partners, improved the assessment criteria for the Resident Coordinators to include humanitarian capacities, and strengthened the selection process for Resident Coordinators who are likely to assume humanitarian coordination functions; and
- Organised and chaired weekly meetings of IASC members, including the Red Cross movement and NGOs, as well as other ad hoc gatherings of the IASC at the working level.

The IASC Secretariat in Geneva:

- Facilitated and followed up on the ongoing meetings of the IASC subsidiary bodies, which include reference groups, task forces and sub-working groups;
- Prepared and organised the quarterly IASC Working Group meetings;
- Regularly reported to HLWG and G-77 members on the work of the IASC and its various bodies;
- Tracked through a matrix the progress of the various subsidiary bodies and ensured implementation of the action points of the Working Group meetings; and
- Organised and chaired weekly meetings of IASC members, including the Red Cross movement and NGOs, as well as other ad hoc gatherings of the IASC at the working level.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Continue to be responsible for ensuring that IASC and ECHA act as substantive fora for decision making in the humanitarian sector.
- Through its offices in Geneva and New York organise the meetings of the IASC, IASC-WG and ECHA. This includes collating the agenda, preparing and disseminating minutes, and records of meetings and decisions taken.
- Monitor and track the work of the IASC subsidiary bodies, and prepare the annual workplan of the IASC.
- Inform the Permanent Missions of Member States on the deliberations of the IASC.
- Interface with the other Executive Committees established by the Secretary-General to link humanitarian, political and development goals.

SECTION TWO

ACTIVITIES AT HEADQUARTERS

CHAPTER ONE

EMERGENCY RESPONSE COORDINATION AND SUPPORT

HUMANITARIAN EMERGENCY BRANCH (HEB) – New York

Humanitarian Emergency Branch				
Planned Staffing	RB	XB	Projects	Total
Professional	8	8	-	16
General Service	4	2	-	6
Total	12	10	-	22

Staff and non-staff Costs (US\$)	1,410,300	1,688,898	-	3,099,198
---	------------------	------------------	----------	------------------

Total Requested (XB and Projects)	US\$ 1,688,898			
--	-----------------------	--	--	--

The HEB, in close collaboration with other policy, advocacy and response branches of OCHA, supports the USG/ERC in ensuring a rapid, effective and coordinated response to complex emergencies and natural disasters.

HEB serves as the principal advisor to the USG/ERC in his dealings with the Executive Office of the Secretary-General, as well as between OCHA and the political, peacekeeping and security arms of the Secretariat, UN Agencies and NGOs on all humanitarian issues. Through USG/ERC meetings with the Secretary-General, heads of state and representatives of member states, HEB advocates humanitarian strategies at the

highest level in order to find the most effective way to mobilise international support for the victims of emergencies. In times of crisis, the Branch supports the USG/ERC, the Deputy ERC or the Branch Chief in briefing the Security Council on the humanitarian challenges in specific countries.

HEB also serves as the primary point of contact for UN humanitarian coordinators (HC) with the USG/ERC and OCHA New York. In addition to maintaining a dialogue with these coordinators and providing guidance and support to them, HEB intercedes on their behalf with other departments within the Secretariat, with member states, UN Agencies and NGOs, and prepares a variety of papers for the Secretary-General, the Security Council, the General Assembly and other inter-governmental bodies containing up-to-date field-based information, analysis and recommendations on humanitarian emergency situations.

The Branch regularly consults with an array of partners¹ on specific humanitarian issues and challenges. It briefs the weekly IASC working-level meetings, as well as the monthly InterAction meetings on country situations, and liaises closely with the IASC/ ECHA Secretariat on the appointment of humanitarian coordinators. It leads or participates in inter-agency assessment missions to the field and contributes to OCHA's surge capacity in times of crisis through staff deployment to the field.

In 2001, the OCHA Humanitarian Emergency Branch:

- Increased the engagement of the Security Council in humanitarian affairs through: 1) the preparation of Security Council briefings by the USG/ERC and monthly briefings of the Security Council President and his/her staff; 2) participation in all Security Council deliberations with a humanitarian dimension; 3) annual briefings on the responsibilities of the USG/ERC and the role of OCHA for newly elected Security Council members; and 4) assisting in the preparation of the Security Council's annual report to the General Assembly;
- Coordinated, together with the field, preparation of reports of the Secretary-General to the General Assembly and the Security Council on the humanitarian situation in a wide variety of countries and regions;
- Liaised with humanitarian coordinators on policy issues, providing advice to and receiving guidance from the USG/ERC, particularly during heightened periods of crisis such as in Sierra Leone, Afghanistan, West Africa, Sudan, Burundi, Indonesia and the Former Yugoslav Republic of Macedonia, and in responding to droughts in the Horn of Africa and Central Asia;
- Addressed specific issues arising in crisis countries such as sanctions, humanitarian access, internally displaced persons, polio eradication, military-humanitarian relations and peace-building;
- Strengthened working relations with UN departments (DPA, DPKO and UNSECOORD), including deployment of joint missions to affected countries;
- Participated in the follow-up on the Brahimi report and on initiatives to further integrate the Secretariat's response in crisis countries, including participation in the Integrated Management Task Force (IMTF) for Afghanistan;

¹ This includes: the Secretariat departments (particularly DPA, DPKO and UNSECOORD), the Executive Office of the Secretary-General, the Security Council through informal meetings as well as regular monthly meetings with the President of the Security Council, the General Assembly, ECOSOC, other inter-governmental fora, representatives of UN Agencies, NGOs and international organisations in New York, members of ECHA and of the ECPS, permanent missions of member states, the Africa Group, G-77, and the HLWG in New York.

- Provided substantial analytical advice to the inter-agency Framework for Coordination on early warning in countries or areas of potential concern, including Zimbabwe, West Africa and the Ferghana Valley in Central Asia;
- Intensified collaboration with the Policy Development and Studies Branch, particularly on the humanitarian impact of sanctions;
- Integrated natural disaster assistance into its support functions, particularly through briefings of the USG/ERC and the Secretary-General, and through contact with the permanent missions of disaster-affected countries;
- Participated in the Core Group of the West Africa Task Force and the Balkans Working Group, bringing a humanitarian perspective to UN system-wide policy decisions and strategy development;
- Actively contributed to addressing the IDP and refugee crisis resulting from the conflict in the Former Yugoslav Republic of Macedonia, and strengthened coordination arrangements to address the IDP situation in Colombia;
- Advocated against the exclusive diversion of attention and funds to one crisis, in this case ensuring that the crisis in Afghanistan/Central Asia did not occupy OCHA's attention to the exclusion of all other humanitarian crises;
- Ensured that humanitarian concerns were consistently taken into consideration in UN efforts towards peace, including the occupied Palestinian territory, Burundi, Angola, Liberia, West Africa, Georgia and Afghanistan; and
- Deployed staff to assist in emergency situations and coordinated and/or participated in field missions to Sierra Leone, Liberia, Guinea, Sudan, DRC, the Horn of Africa, Angola, Burundi, the Republic of Congo, Eritrea, Ethiopia, Colombia, Georgia, Central Asia, Tajikistan, Indonesia, occupied Palestinian territory and the Democratic People's Republic of Korea (DPRK).

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Ensure constant support to the ERC in his role as humanitarian representative and advocate for the Secretary-General and the UN system, and continue working towards rapid and effective coordination of complex emergency and natural disaster response.
- Further strengthen working relations with relevant departments of the UN, the Security Council, the General Assembly, ECOSOC, member states, and regional organisations to ensure that humanitarian concerns are taken into consideration in a timely manner in all relevant fora.
- Improve consultation and coordination with humanitarian partners in the UN, NGOs and the donor community in New York in order to promote a more cohesive approach and maximise the impact of the humanitarian community in advocacy, policy development and practical humanitarian interventions. This includes making special efforts to implement the Brahimi Report recommendations by ensuring an integrated crisis response.
- Implement OCHA's change management process with particular attention to synergy with natural disaster response, active participation in surge capacity, improved administrative and personnel procedures, expansion of training opportunities for HEB staff, and the application of new information technologies to humanitarian information management.
- Continue to provide advice to the USG/ERC in the area of natural disasters, in close consultation with the Response Coordination Branch (RCB) and Emergency Services Branch (ESB).
- Provide guidance to the Office of the Special Representative of the Secretary-General for West Africa on the humanitarian aspects of policy decisions made on behalf of the UN system; to the new OCHA Regional Support Offices for West Africa, and for East and Central Africa.
- Monitor the impact of the Afghanistan crisis on other humanitarian operations including, inter alia, staff security, contingency planning, government and donor relations, as well as through monthly briefings to the USG/ERC on other protracted emergency countries.
- Strengthen staff capacity through more systematic training and through the application of lessons learned from major humanitarian crises over the past years.

RESPONSE COORDINATION BRANCH (RCB) - Geneva

Overall Requirements

General Service	-	15	-	15
Total	6	35	-	41
Staff and non-staff Costs (US\$)	1,448,200	4,701,600	-	6,149,800
Total Requested (XB and Projects)			US\$ 4,701,600	

The RCB in Geneva, in cooperation with the HEB in New York, has a leading role in the mobilisation and coordination of international emergency assistance following complex emergencies and natural disasters. Its five geographical sections are the result of uniting two separate arms of OCHA responsible for coordinating response to complex emergencies and natural disasters. The Branch is responsible for issuing updates on humanitarian situations and providing substantive and administrative support to OCHA field offices.

RCB acts as a conduit for information between the field and other branches of OCHA and, more importantly, other partners in the humanitarian community. The Branch, in cooperation with HEB, undertakes assessment missions and, through its CAP and Donor Relations Section, supports relief mobilisation and the preparation of donor appeals.

Regular liaison with donors and management of the consolidated appeals process are undertaken by the Consolidated Appeals Process (CAP) and Donor Relations Section. Through the CAP the UN and its partners work together to describe the main concerns, priorities and goals of multilateral humanitarian action in each affected country or region, and detail the manner in which to meet them. The CAP has evolved into an instrument for analysis, planning, and common action. OCHA, as the facilitator of the IASC-Sub Working Group on the CAP, continues to work on improving guidelines. Activities related to the CAP,

funded under the CAP project, will continue to provide training for OCHA staff and partners to increase the awareness and participation. In addition, as per endorsement by the IASC, a revision of the 1994 IASC guidelines on the CAP will be undertaken, including establishing criteria for when to begin and when to end a CAP, clarifying its role in transition countries, and developing criteria and mechanisms for involvement of NGOs.

RCB consolidates and shares information for an appropriate and timely inter-agency response in both natural and complex emergency scenarios, such as contingency planning in on-going emergencies, disaster response preparedness, conflict prevention and early warning. RCB is the main point of contact in OCHA for overseeing field office requirements, in particular for staffing and administrative support, and for ensuring that the relevant parts of OCHA are regularly updated with vital information on coordination activities.

To achieve an effective and integrated response, RCB remains in close contact with the ESB to ensure timely use and further promotion of the existing emergency services such as the UNDAC teams and the Military and Civil Defence Unit. RCB also maintains an intensive dialogue with the HEB in New York on ways to approach policy and partner issues in specific regions and countries, and to harmonise political and bilateral contacts.

In 2001, the Response Coordination Branch:

- Facilitated and participated in assessment missions in Angola, DRC and West Africa (Security Council visits and Inter-Agency missions). In addition, RCB supported a review of the drought in the Horn of Africa (with the Office of the Humanitarian Coordinator), contingency planning in northern Uganda, and, inter alia, facilitated a multi-agency task force mission to western Somalia, to assess reintegration needs of IDPs;
- Together with ESB, mobilised and coordinated assistance to 67 natural disasters, including the devastating earthquakes in El Salvador, India and Peru, severe winter disaster in Mongolia, floods in Guinea, Mozambique and Russian Federation, drought in Central Asia, and hurricanes in Belize and Cuba;
- Organised and hosted a number of inter-agency briefings for all member states represented in Geneva, and facilitated the issuance of various public documents on the Afghanistan crisis, including donor alerts, contingency and operational planning documents, as well as facilitated and prepared OCHA internal and IASC meetings and teleconferences on Afghanistan on a nearly daily basis;
- Supported the preparation of and/or launch of 32 donor appeals for natural disasters and made initial donor contacts, disbursed emergency cash grants of US\$ 2.15 million and channelled US\$ 3.7 million resources from donors for rapid emergency relief assistance;
- Developed regular situation reports for donors and partners and organised and convened the annual meeting of the International Advisory Committee (IAC) on Sudan, comprised of donors, UN and NGOs to review key issues such as security, access and funding, and for the DRC, through the IASC and informal donor consultation groups;
- Improved training modules on the CAP, trained 20 inter-agency field and headquarters trainers, and conducted 13 field workshops and ten agency specific workshops on the CAP, reaching more than 400 staff from UN Agencies, NGOs, the Red Cross/Red Crescent Movement, and governments;
- Launched the new Financial Tracking System (FTS) on ReliefWeb. Improvements include on-demand sorting of financial information, user-friendly layout and automatic updating. The new FTS allows for a more accurate and complete overview of humanitarian funding, current Appeal information, and easier access to a variety of users;
- Organised a global launch of 18 consolidated inter-agency appeals for 2002 in eight different locations; produced related promotional material around the theme "Reaching the Vulnerable" to highlight the importance of equity in humanitarian action;
- Supported the coordination for opening new field presence in nine locations;
- Supported closing of offices, including the handing over of coordination functions to UNDP in the Republic of Congo and Rwanda;
- Facilitated regional cooperation through joint activities with UNDP such as the India Seminar in Cooperation, the regional disaster management meeting in Nepal (with ISDR), the Forum on IDPs in Indonesia, and an IDP seminar with the Brookings Institution; and
- Supported governments and UN Agencies in drawing lessons from the previous relief operations such as the Cambodia floods, El Salvador earthquakes in May 2001 and India earthquake in June 2001.

YEAR 2002 PRIORITY AND PLANNED ACTIVITIES

- With HEB and Policy Development and Studies Branch, ensure orientation, briefing, and training for new or deployed field staff.
- With ESB, strengthen partnerships (inter-agency task forces and working groups) with the Red Cross movement and NGOs, to further improve coordinated emergency response.
- Develop planning systems for field monitoring and development of contingency plans linked with Headquarters (HQ) mobilisation for complex emergencies and natural disasters, and defining clear exit strategies.
- Improve regional coordination and support through strengthening of RDRA capacities.
- Organise regional workshops: a strategic planning workshop in Asia, and a joint workshop with the Pan American Health Organisation in Central America.
- Organise multi-donor missions to crisis areas at the onset of humanitarian emergencies and natural disasters.
- Support the development of surge capacity within OCHA for rapid deployment and mobilisation.
- Ensure timely and comprehensive information bulletins on new emergencies, and support various task forces and other fora for coordination.
- Hold regular meetings with permanent missions in Geneva and UN Agencies to inform and deepen their understanding of OCHA's role and responsibilities in response preparedness and response to natural disasters and complex emergencies.
- Continue to broaden the donor base for and predictability in funding for OCHA's annual requirements.

CAP STRENGTHENING PROJECT

CAP Strengthening Project				
Planned Staffing	RB	XB	Projects	Total
Professional	-	-	3	3
General Service	-	-	-	-
Total	-	-	3	3

Staff and non-staff Costs (US\$)	-	-	824,500	824,500
---	---	---	----------------	----------------

Total Requested (XB and Projects)	US\$ 824,500			
--	---------------------	--	--	--

The objective of the CAP Strengthening Project is to ensure the most efficient and effective humanitarian programming in the field. Taking into account recent recommendations stemming from an IASC review process, the project will aim to strengthen the CAP so as to be more comprehensive, with greater representation of partnerships, more streamlined in terms of procedures, and more able to achieve a predictable funding base for the humanitarian community.

YEAR 2002 PRIORITY AND PLANNED ACTIVITIES

- Engage the UNDP Bureau for Crisis Prevention and Recovery and the UN Development Group in a process to ensure transition from relief to recovery and to establish links between the CAP and the United Nations Development Assistance Framework (UNDAF).
- Analyse impact of funding response, especially for chronically under-funded emergencies.
- Further improve Financial Tracking System reports and user-friendliness, and promote systematic reporting to more accurately reflect total humanitarian aid flows.
- Refine OCHA's reporting systems to donors.
- Monitor and prepare report on trends in implementation and impact and levels of funding for mid-year review meeting with donors.
- Orchestrate the CAP 2003 launch including choice of theme, preparations, public information and other aspects.
- Examine alternative funding possibilities, including private sector in order to broaden the overall emergency and disaster-funding base.
- Develop guidelines for integrating funding needs for natural disasters into the consolidated appeals process, especially where they compound complex emergencies.
- Develop more systematic methods in producing situation analysis and donor briefs for non-CAP countries.

EMERGENCY SERVICES BRANCH (ESB) – Geneva

Overall Requirements				
Emergency Services				
Planned Staffing	RB	XB	Projects	Total
Professional	3	-	16	19
General Service	1	1	8	10
Total	4	1	24	29
Staff and non-staff Costs (US\$)	462,000	299,000	4,074,700	4,835,700
Total Requested (XB and Projects)		US\$ 4,373,700		

Emergency Services Branch				
Planned Staffing	RB	XB	Projects	Total
Professional	3	-	-	3
General Service	1	1	-	2
Total	4	1	-	5
Staff and non-staff Costs (US\$)	462,000	299,000	-	761,000
Total Requested (XB and Projects)		US\$ 299,000		

The objective of the Emergency Services Branch (ESB) is to develop OCHA's capacity to provide emergency services aimed at expediting the provision of international humanitarian assistance in disasters and emergencies. Within the overall mandate of OCHA, the Branch develops, mobilises, and coordinates the deployment of international/bilateral rapid response and management capacities, covering the entire range of disasters and emergencies. Some 30 years of UN experience in response to sudden-onset natural disasters, environmental emergencies, and other types of disasters are represented in ESB. The Branch is divided into five main sections or units, which oversee their respective areas and responsibilities as described below.

Most of these activities are covered in greater detail in subsequent pages since they represent individual projects requiring donor support. In essence, ESB provides senior management of OCHA and the desks in RCB and HEB with the tools required to coordinate an international response to emergencies in the field.

Field Coordination Support Project

OCHA manages the UNDAC system in which 47 governments and five international organisations provide emergency managers at 12-24 hours notice to respond to sudden-onset emergencies. This is undertaken under the Field Coordination Support Section (FCSS) within ESB, which mobilises an average of 8-12 UNDAC missions a year. UNDAC capacity is strengthened by mobilising and training its members and ensuring the participation of developing countries

in disaster-prone regions, as well as securing continued international support for the system. OCHA also acts as the global secretariat for the International Search and Rescue Advisory Group (INSARAG), a professional association of international urban search and rescue teams from 52 governments, and manages the Surge Capacity Project for rapid fielding of personnel specialised in coordination and information management.

Military, Civil Defence and Logistics Project

The most efficient use of military and civil defence assets in support of humanitarian operations is undertaken through ESB. The IASC established the Military and Civil Defence Unit (MCDU) in November 1995. The MCDU conducts a number of United Nations Civil-Military Coordination (UN-CIMIC) courses and participates in the planning and execution of a number of large-scale exercises. The MCDU reports to an advisory panel composed of members of the IASC, representatives from the major UN Agencies, DPKO, International Federation of Red Cross and Red Crescent Societies (IFRC), International Committee for the Red Cross (ICRC) and the NGO umbrella organisations. OCHA is also responsible for the provision and/or coordination of non-food, non-medical goods in natural disasters. It manages a permanent, renewable stock of donated disaster relief items at the United Nations Humanitarian Response Depot (UNHRD) in Brindisi, Italy, with particular support from the governments of Italy and Norway. The UNHRD stores basic non-food, non-medical survival

items, such as tents, blankets, tools and generators, donated by various governments. (More information about this programme is included under Annex III.B.)

OCHA/UNEP Environmental Response Project

OCHA brings together the environmental expertise of United Nations Environment Programme (UNEP) and its own disaster management experience to serve as the integrated UN emergency response mechanism to activate and provide international assistance to countries facing environmental emergencies. As a result of a ten-year partnership with UNEP, this joint mechanism provides an integrated environmental-humanitarian assistance to countries affected by environmental disasters (e.g. chemical and oil spills, industrial and technological accidents, forest fires and

other sudden-onset emergencies) and natural disasters that cause or threaten environmental damage leading to potentially serious health and environmental implications.

In the wake of the events of 11 September, the Unit will broaden its existing activities to address the environmental aspects of terrorism taking into account chemical, biological and nuclear/radiological threats.

Emergency Telecommunications Project

Field operational capacities are strengthened through expert technical advice and material support in telecommunications, to augment early warning, mitigation, and response. Under the auspices of the IASC, OCHA supports adequate communications in humanitarian situations, particularly for the safety and security of humanitarian personnel.

In 2001, the Emergency Services Branch:

FCSS:

- Mobilised and supported 11 UNDAC missions (involving 56 UNDAC members from 21 countries, OCHA, UNDP and World Food Programme (WFP)) and trained 45 new emergency managers from 26 countries and six UN and other Agencies for inclusion in the UNDAC system; developed, with the International Humanitarian Partnership (IHP), a mechanism for providing stand-by material resources for relief missions and UNDAC induction for IHP resource staff;
- Participated in the preparation of inter-agency appeals for funding of natural disaster response to El Salvador and Belize; and
- Organised meetings of the regional groups of INSARAG in Africa/Europe, the Americas and Asia/Pacific attended by representatives from 52 countries.

MCDU/LU:

- Carried out 50 missions (41 in Europe, seven in the Americas, and two in Asia-Pacific), and issued 13 requests for the use of various military and civil defence assets for earthquakes in El Salvador, Peru and India, rescue in Mozambique, and support to response in the Afghanistan region crisis. Placed UN-CIMIC trained officers in various locations (Skopje, Afghanistan region, Rome, Islamabad, Tampa and Termez);
- Conducted training for 440 UN-CIMIC officers, made up of UN, NGO and national civil defence personnel, and participated in the planning and conduct of seven humanitarian relief exercises involving collaboration of more than 100 countries;
- Facilitated collaboration within the framework of the Oslo Guidelines Process, producing a final draft of guidelines for the use of military civil defence assets (MCDA) for humanitarian purposes in complex emergencies;
- Undertook a feasibility study on the application of advanced technologies for disaster response; upgraded the Central Register of disaster response capacities and made it available to the entire international humanitarian community via Internet;
- Managed the OCHA stocks in the UNHRD and took an active role in discussions with various donors (Italy, Norway) for the replenishment of the goods in stock; and
- Dispatched 14 transport operations in the first nine months of the year, to ship 294 megatons of OCHA relief goods (for a total value of approximately US\$ 2.04 million) to ten countries.

OCHA/UNEP UNIT:

- Developed guidelines for environmental assessment following natural disasters;
- Incorporated environmental considerations into UNDAC rosters, training and assessment missions;
- Convened a meeting of the Core Group of the Advisory Group on Environmental Emergencies on its role and possible actions in the environmental impact of terrorism;
- Improved the section Web site; and
- Initiated a systematic training of UNEP staff and facilitated deployment of UNEP experts for various missions.

EMERGENCY TELECOMMUNICATIONS UNIT:

- Created linkages with UNSECOORD, DPKO, and implementation of guidelines as created in the Handbook of Disaster Communications;
- Supported all emergency telecommunications requirements of OCHA staff; and
- Continued to explore private sector support for this area in the form of technical exchange and donations.

FIELD COORDINATION SUPPORT PROJECT

The project addresses rapid response in an array of bilateral and multilateral partnerships, strengthening the speed and efficiency in which the humanitarian community reacts and manages acute onset emergencies. This is done through the UNDAC, INSARAG and other fora, and will strive to improve training and preparedness of such teams, incorporate lessons learned and broaden the international participation in rapid response overall.

Field Coordination Support				
Planned Staffing	RB	XB	Projects	Total
Professional	-	-	4	4
General Service	-	-	4	4
Total	-	-	8	8

Staff and non-staff Costs (US\$)	-	-	1,545,900	1,545,900
----------------------------------	---	---	-----------	-----------

Total Requested (XB and Projects)	US\$ 1,545,900			
--	-----------------------	--	--	--

In 2002 the Project will:

- Mobilise UNDAC missions within 12-24 hours after the onset of a crisis and provide UNDAC training for its regional teams.
- Ensure the implementation of the recommendations of the independent review of the UNDAC system, including the integration of G-77 and other countries into the UNDAC Team and further develop OCHA's surge capacity network.
- Build on the development of the Virtual On Site Operations Coordination Centre (OSOCC) as a platform for emergency information exchange amongst international partners and seek to improve consistency of its use and enhance its reach and focus.
- Support the development of the regional groups of INSARAG for Africa/Europe, Asia/Pacific and the Americas and facilitate creating a legal framework for international urban search and rescue operations.

MILITARY, CIVIL DEFENCE AND LOGISTICS SUPPORT PROJECT

The project acts as a focal point and consults with interested governments, regional organisations and military/civil defence establishments to maintain up-to-date information on preparedness and response measures related to military and civil defence support, and on use of their resources in support of humanitarian operations. Inter alia, it maintains a database on MCDA and helps coordinate their use in the field. It also manages the OCHA component of the Brindisi Warehouse for rapid deployment of material support.

Military, Civil Defence and Logistics Support

----------------------------------	---	---	-----------	-----------

Total Requested (XB and Projects)	US\$ 1,694,500			
--	-----------------------	--	--	--

In 2002 the Project will:

- Increase the capacity to establish efficient civil-military coordination and cooperation in field operations, by training officers who can be mobilised and deployed quickly to areas where military forces operate alongside humanitarian agencies, and systematise civil-military coordination centres and make links with regional and academic organisations and institutions focusing on civil-military coordination and cooperation.

- Hasten the establishing of official guidelines for the use of MCDA for humanitarian purposes in complex emergencies and continue to lead an international forum of nations, UN Agencies and international civil and military organisations, for wide acceptance of these guidelines at an international conference, and through establishing a comprehensive network with civil defence/civil protection/civil security organisations.
- Maintain a senior liaison officer in Brussels, responsible for relations with the NATO, Supreme Headquarters Allied Presence in Europe (SHAPE) and the EU.
- Continue to manage the OCHA component of the Brindisi warehouse and act as OCHA's focal point for suppliers and be instrumental in providing logistical support to the field for the transport of cargo and/or relief personnel, especially through increasing participation in inter-agency logistics events, and to ensure incorporation of G-77 partners in logistics coordination.
- Conclude agreements with potential partners (WFP, ICRC, etc) for the provision of emergency transport facilities whenever available and required, and set up rosters of commercial carriers/logistics experts and of stand-by arrangements for expediting the chartering of air services in emergency situations.

OCHA/UNEP ENVIRONMENTAL RESPONSE PROJECT

-----------------------------------	------	---------

OCHA will continue to work with UNEP, ensuring incorporation of environmental considerations in humanitarian response. This joint effort will play a vital role in 2002 in delivering emergency assistance to affected countries.

In 2002 the Project will:

- Conduct an analysis of the root causes, lessons learned and long-term effects of environmental emergencies in which OCHA and UNEP have been involved, as well as support mainstreaming of environmental elements into natural disaster response through development of an environmental response module for UNDAC training, contributing a chapter in the UNDAC handbook, and participating in assessment missions as required.
- Explore OCHA's capacities, role, and possible modalities of cooperation with respect to the environmental aspects of terrorism (chemical, biological and radiological/nuclear threats).
- Participate in UNDAC missions to ensure that environmental aspects of disasters are adequately addressed as part of overall disaster response and management.

EMERGENCY TELECOMMUNICATIONS PROJECT

The project covers regulatory and policy aspects of telecommunications, including cross-border use of telecommunications equipment and technologies during emergencies. It supports the development of telecommunication networks in disaster response.

Emergency Telecommunications Project				
Planned Staffing	RB	XB	Projects	Total
Professional	-	-	1	1

----------------------------------	---	---	---------	---------

Total Requested (XB and Projects)			US\$	261,600
-----------------------------------	--	--	------	---------

In 2002 the Project will:

- Continue to implement and promote the use of telecommunication operations for the safety and security of humanitarian personnel and ensure application of minimum standards of communication for humanitarian operations.
- Provide institutional linkages with other telecommunications departments and institutions, and technical assistance to field offices for appropriate telecommunications facilities.

SURGE CAPACITY PROJECT

Surge Capacity Project (Geneva)				
Planned Staffing	RB	XB	Projects	Total
Professional	-	-	3	3
General Service	-	-	-	-
Total	-	-	3	3

Staff and non-staff Costs (US\$)	-	-	437,100	437,100
---	---	---	----------------	----------------

Total Requested (XB and Projects)	US\$ 437,100			
--	---------------------	--	--	--

OCHA's surge capacity for sudden-onset emergencies is managed by the ESB and coordinated with all other divisions in OCHA, especially RCB. Three professional staff members are dedicated to this effort. Two serve RCB, and develop OCHA's internal surge capacities - when not deployed on emergency missions. Both of these persons are presently funded by the Government of Switzerland. One staff member works within the ESB (FCSS), and deals particularly with partnerships and external surge capacity issues and mechanisms.

The objective of the project for OCHA is twofold: to have a well-developed capacity for rapid staff deployment and material mobilisation in place by the end of 2002, and to develop overall arrangements to mobilise external capacities for rapid response.

For both, experienced humanitarian personnel will be prepared for deployment to the site of an emergency at very short notice. Emergency rosters will be created, where trained personnel are on stand-by. Advanced teams will be sent to the field to assess immediate needs and coordinate a first response to an emerging crisis. One of their first priorities will be to reinforce the resident coordinator's office in order to secure timely response to sudden-onset emergencies.

The current UNDAC mechanism will be employed for short-term missions to meet coordination needs in the immediate aftermath of a natural disaster. UNDAC teams have been successfully called upon in several cases in the aftermath of complex emergencies. In addition, in the context of a complex emergency, the project will develop equally time efficient methods to support OCHA coordination capacity, within the framework of and extended beyond those developed by the Inter Agency Standing Committee member agencies.

Some emergencies by their very nature need longer-term intervention while at the same time requiring that OCHA is among the first on the scene and is able to establish coordination services immediately. Use of the UNDAC system and secondees provided under stand-by arrangements will be able to provide specific technical and support services. In addition, OCHA-trained staff will be required to be fully conversant with the mandate and operational techniques of the organisation, and to establish immediate and effective coordination services in the environment generated by sudden-onset emergencies, particularly in complex emergencies.

INTERNAL DISPLACEMENT UNIT

Internal Displacement Unit				
Planned Staffing	RB	XB	Projects	Total
Professional	-	-	8	8
General Service	-	-	5	5
Total	-	-	13	13

Staff and non-staff Costs (US\$)	-	-	2,036,385	2,036,385
---	----------	----------	------------------	------------------

Total Requested (XB and Projects)	US\$ 2,036,385			
--	-----------------------	--	--	--

Governments and humanitarian organisations have agreed that the issue of internal displacement needs to be more systematically and effectively addressed. To this end, in July 2000 the IASC agreed to establish an Inter-Agency Network on Internal Displacement. This is comprised of senior focal points within all concerned organisations that carry out reviews of selected countries with internally displaced populations, and make proposals for an improved international response to their basic needs.

A UN Special Coordinator on Internal Displacement was appointed within OCHA to head this inter-agency review process and to report back to the UN Secretary-General on its findings.

Since October 2000 the network visited Ethiopia and Eritrea, Burundi, Angola, Afghanistan and Colombia. Other countries considered for reviews include Indonesia and Sudan.

Review missions confirmed the existence of serious gaps in the UN and Agency response to the needs of IDPs. This is particularly true with regards to protection, shelter and other non-food needs, as well durable solutions in the case of protracted displacement. These gaps arise from a lack of clear agency responsibility in certain sectors and/or inadequate agency effort in designated areas. At the same time, lack of access and security, and an unpredictable and ill-sustained funding base remain major constraints to an improved inter-agency response in many cases.

In this light, the network was tasked with making proposals for future inter-agency approaches to

strengthen the international response. In April 2001, the network's special coordinator presented a report to the ERC on ways to strengthen the international response to internal displacement. In particular, he recommended strengthening response capacity at the headquarters level by establishing a small, non-operational unit within OCHA with core staff seconded by the IASC agencies. This recommendation was endorsed by the Secretary-General in May 2001.

The Unit will be fully operational in 2002, and will comprise staff from United Nations Development Programme (UNDP), United Nations High Commissioner for Refugees (UNHCR), United Nations Children's Fund (UNICEF), World Food Programme (WFP), International Organization for Migration (IOM) and a representative of the NGO consortia. The unit will provide a nucleus of expertise on issues of internal displacement that will act as a catalyst in guiding the response to IDP crises by:

- ▶ Monitoring situations of internal displacement;
- ▶ undertaking systematic reviews;
- ▶ identifying and addressing gaps; and,
- ▶ supporting the field activities of the IASC members and OCHA.

The Unit will strive to develop predictable institutional arrangements to respond to situations of internal displacement. It will also provide capacity building, training, guidance and expertise to the resident/humanitarian coordinators, UN country teams and other operational humanitarian and development agencies, focusing on protection of and assistance to internally displaced persons.

To complement these activities, the IASC designated the Norwegian Refugee Council responsibility for the IDP Global Database project that was initiated in November 1998. The aim of the project is to maintain a reliable and publicly available system for access to comprehensive and updated information on internal displacement world-wide. It responds actively to the information needs of core actors dealing with internal displacement, especially the Representative of the Secretary-General on Internally Displaced Persons, OCHA and other members of the Inter Agency Standing Committee. Through use of the database, the UN Guiding Principles on Internal Displacement are promoted as a monitoring tool.

By the end of 2001, after two years of operation, the database reached its target of covering all ongoing

situations of conflict-induced internal displacement in the world – currently 47 countries. During 2002, users of the database will experience improved access to the vast amount of information available through more user-friendly navigation facilities and new information products, including global and regional

overview pages. The country profiles will remain the backbone of the database, but additional information like maps, interesting web-links and the comprehensive source lists will be more easily available through a **"one-stop"** country information menu.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES:

- Promote international awareness on and support to advocacy efforts highlighting the plight of the internally displaced world-wide.
- Strengthen the capacity of the ERC to focus on and coordinate an effective response to the needs of the internally displaced.
- Reinforce the inter-agency response to critical crises of internal displacement, particularly with regard to protection.
- Build capacity within OCHA, as well as the wider humanitarian community, to address issues of internal displacement.
- Ensure full involvement of UN humanitarian and human rights organisations.
- Liaise closely with the Red Cross/Red Crescent Movement, the IOM, and the large number of NGOs, both international and local, which are widely involved with this issue.
- Maintain a close liaison with the Representative of the Secretary-General on Internally Displaced Persons, particularly in support of the latter's advocacy function.

OCHA develops and promotes policies, standards and procedures that enable principled and effective humanitarian action in complex emergencies and natural disasters by developing and supporting the humanitarian agenda, supporting field action and coordination and improving effectiveness through policy lessons learned.

To support the humanitarian agenda, the PDSB identifies emerging humanitarian trends and changes in the humanitarian environment that require policy formulation and guidance. This work contributes to the development of common and harmonised policy positions among the UN humanitarian agencies and within the broader humanitarian community.

In providing support to field action and coordination, OCHA is developing its capacity to provide policy guidance and support to R/HCs and field offices. The

Branch generates practical policy tools and guidance notes to foster coherence, structure and consistency in the response to humanitarian crisis. These tools and notes will be tailored to guiding R/HCs and field offices in key areas, such as approaches to coordination, the security of humanitarian workers, engagement with the private sector in humanitarian activities and the response to natural disasters.

With regard to lessons learned, OCHA initiates, manages and, when necessary, conducts lessons learned, reviews and evaluation exercises for OCHA. The Branch also contributes to inter-agency evaluations. These activities are designed to identify best practices and innovative concepts, which can then be more broadly disseminated and inform policy decisions.

In 2001, OCHA's Policy Development and Studies Branch focused on :

Promotion of the Humanitarian Agenda

- Spearheaded the preparation of the Secretary-General's report to the Security Council on the protection of civilians in armed conflict and drafted a plan of action for implementing the report's recommendations;
- Assessed, at the request of the Security Council, and in close collaboration with OCHA's HEB, the humanitarian implications of the UN sanctions regime on Afghanistan and guided the drafting of two of the Secretary-General's reports on this regime;
- Assessed the potential humanitarian impact of possible future sanctions against the Government of Liberia, and drafted the Secretary-General's report on this issue;
- Chaired an IASC reference group on the humanitarian consequences of sanctions.; and
- Chaired an informal, working-level, inter-agency task force to identify key issues related to humanitarian agency engagement with non-state actors.
- Managed OCHA's participation in the General Assembly and ECOSOC.

Support to Field Action and Coordination

- Facilitated the development of a coordinated UN position on the use of military assets for humanitarian operations in Afghanistan, and contributed to efforts to ensure a harmonised UN effort in peace-building;
- Developed guidelines on the use of armed escorts to accompany humanitarian convoys, and secured endorsement for these guidelines from the IASC;
- Contributed, through the IASC Task Force on Security, to a menu of options for coordinating security in the field to be used by UN country teams. The menu includes options for coordinating with NGOs on security;
- Concluded a draft agreement between OCHA, as a representative of the UN system, and Ericsson for the implementation of a telecommunications switching facility in Brindisi, Italy.

Lessons Learned

- Commissioned and co-authored a review of OCHA's role in emergency UN operations following the earthquake in Gujarat, and worked with senior management in the implementation of the recommendations of that review;
- Commissioned an independent study of the role of OCHA in the crisis in East Timor, and worked with senior management to implement the recommendations of the study; and
- Facilitated an independent study on coordination, prepared by the Overseas Development Institute (ODI).

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

Promotion of the Humanitarian Agenda

In relation to the humanitarian agenda, OCHA has three priorities. It aims to further implement the Secretary-General's recommendations regarding the protection of civilians in armed conflict. It will strengthen mechanisms and capacities for monitoring, assessing and reporting on the humanitarian impact of sanctions. It will also strengthen support to the development and coordination of humanitarian policies with key stakeholders in the areas of peace building and terms of engagement with armed groups. To these ends planned activities in 2002 include:

- Developing a common UN position that will further harmonise the relationship between humanitarian action and peace building.
- Agreeing on minimum standards, in UN and IASC fora for engaging non-state actors.

Support to Field Action and Coordination

Where Field Action is concerned, the OCHA priority is to strengthen operational guidelines for humanitarian coordination in the field in order to enhance the effectiveness of coordination. To this end, OCHA will define coordination, identify its key elements, and determine how these adapt to differing contexts and vulnerable populations. It will root humanitarian coordination in a better understanding of its supporting international legal context. It will also clarify the comparative advantage and role of military actors in humanitarian action. In each case, the particular demands of both complex emergencies and natural disasters will be considered and addressed. To these ends, planned activities in 2002 include:

- Creating an electronic database of DHA/OCHA policy, the most salient of which shall be distilled into a policy binder for use by field practitioners.
- Developing guidelines on the roles and responsibilities of humanitarian personnel regarding human rights and humanitarian principals.

Lessons Learned and Evaluations

OCHA priority is to begin implementing a new three-year strategic monitoring and evaluation plan in order to monitor core function performances and improve internal and external accountability.

HUMANITARIAN IMPACT OF SANCTIONS & PROTECTION OF CIVILIANS PROJECT

HIS/PCAC Project				
Planned Staffing	RB	XB	Projects	Total

General Service	-	-	-	-
Total	-	-	2	2

Staff and non-staff Costs (US\$)	-	-	402,280	402,280
----------------------------------	---	---	---------	---------

Total Requested (XB and Projects)	US\$	402,280
-----------------------------------	------	---------

To support priorities related to the humanitarian agenda, OCHA will continue to identify emerging trends and harmonising strategies in the inter-agency system.

To this aim the project will:

- Develop, jointly with DPKO, mechanisms to ensure that issues surrounding the protection of civilians are taken into consideration and incorporated into the design of peacekeeping operations.
- Draft an aide memoire for the Security Council that will function as a checklist of protection issues to be considered during the design and implementation of peacekeeping operations.
- Strengthen the methodologies and standards for assessing the humanitarian impact of sanctions, including identification of sector-specific quantitative indicators and the development of a generic methodology for gathering and consolidating data.
- Draft a handbook on the humanitarian impact of sanctions for use by UN Agencies and member states, as well as mechanisms and procedures for United Nations Country Teams (UNCTs) to assess potential local impact.

PUBLIC / PRIVATE PARTNERSHIPS PROJECT

Public/Private Partnerships				
Planned Staffing	RB	XB	Projects	Total

----------------------------------	---	---	---------	---------

Total Requested (XB and Projects)	US\$	170,291
-----------------------------------	------	---------

As part of efforts to strengthen operational guidelines for humanitarian coordination in the field, this project will:

- Clarify the comparative advantage and role of the private sector in humanitarian action.
- Establish guidelines on public - private sector cooperation in zones of conflict.
- Facilitate field-testing of the UN-Ericsson 'First on the Ground' initiative.

LESSONS LEARNED AND EVALUATIONS PROJECT

Documenting “**Lessons learned**” and conducting evaluations are important components of OCHA efforts to improve its core functions. In undertaking these evaluations, OCHA will engage external consultants and expertise.

In 2002, OCHA will:

- Begin implementing a multi-year workplan for evaluations.
- Develop a set of methodologies for lessons learned studies tailored to OCHA's needs.
- With agency partners, evaluate system-wide coordination structures.
- Conduct an evaluation of OCHA's regional coordination arrangements in order to reach a coherent conclusion on strategic needs in this area and to shape future regional arrangements.
- Draft a review of the mechanisms for the use of Military and Civil Defence Assets and OCHA's role in the development of civil-military relations.
- Review consolidated appeals funding with the RCB, focusing on sector disparities.

Advocacy is a critical and cross-cutting component of all of OCHA's coordination and policy development activities. As such, advocacy is an indispensable tool for mobilising the political and financial support required for humanitarian action from a wide range of constituencies, and for promoting the awareness of and respect for international humanitarian principles.

OCHA's advocacy efforts aim to strengthen the commitment of its constituencies on behalf of the civilian victims of emergencies and disasters. This may involve negotiating with warring parties for access to vulnerable populations, or networking with the media to increase public awareness of humanitarian crises in under-funded areas of the world.

OCHA's advocacy function is carried out by the Advocacy and External Relations Section in New York and Geneva. OCHA's advocacy section supports the

Under-Secretary-General for Humanitarian Affairs and senior management in advocating humanitarian issues with governments, inter-governmental and regional bodies, NGOs, the media, civil society and the public. Advocacy strategies are tailored to meet the needs of specific audiences, such as donors or recipient governments, and to achieve partnerships with philanthropic organisations. OCHA's advocacy work is aimed at increasing financial support for humanitarian action through the CAP as well as political support through engagement with the Security Council, ECOSOC and the General Assembly. The section organised the launch of the 2002 Consolidated Inter-Agency Appeals by the Secretary-General in New York, and assisted in the preparation of the Security Council President's Statement to the press in support of the appeals themselves.

In 2001, the Advocacy and External Relations Section:

- Collaborated with the UN Department of Public Information on joint efforts, including the video for the launch of the consolidated appeals and "UN in Action" segments for wide dissemination over commercial television;
- Created, in collaboration with the Information Analysis Section, an advocacy Web site on the protection of civilians in armed conflict;
- Enhanced cooperation with private entities of global relevance, such as the World Economic Forum (WEF) and the Better World Fund; sustained information-exchange with academic institutions; and held monthly OCHA/InterAction meetings to help streamline advocacy efforts with non-governmental organisations, and with the Steering Committee on Humanitarian Response (SCHR) and the International Council of Volunteer Agencies (ICVA) on humanitarian emergencies and issues;
- Established and maintained regular contacts with the institutions of the EU (Presidency, Troika, Council, Commission and European Commission Humanitarian Office (ECHO)) and with regional organisations such as the Organization of African Unity (OAU), the Organization for Security and Cooperation in Europe (OSCE), NATO, the Council of Europe, the Commonwealth of Independent States Inter-State Commission and the Central European Initiative (CEI);
- Established a mechanism for closer working relations with the G-77 and regional groups;
- Promoted the implementation of the Fribourg Forum follow-up process in Europe, and in line with the provisions of General Assembly Resolution 54/30, assisted the governments of the Hellenic Republic and the Republic of Turkey in finalising a bilateral cooperation treaty to be implemented under the auspices of OCHA;
- Organised and provided media support for the launch of the 2002 consolidated inter-agency appeals in various locations around the world;
- Issued the biweekly newsletter OCHA News;
- Provided media support for OCHA, developing public positions and giving and organising interviews and briefings on topical issues;
- Drafted statements attributable to the Secretary-General and ERC on humanitarian issues;
- Acted as chief of the humanitarian cluster for Open Doors Days in Geneva with the participation of 15,000 people; and
- Undertook broad representation of OCHA and gave lectures and talks to groups interested in the humanitarian work of the UN.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES**Public Information**

- Consolidate OCHA's profile as coordinator of humanitarian response to disasters and emergencies through the development of a "brand package."
- Produce public information products through the continuation of OCHA's News and Writing Campaign.
- In cooperation with the Information Analysis and the Information Technology Sections, enhance and upgrade OCHA Online to serve as the Web gateway for OCHA's coordination, policy development and advocacy activities at both headquarters and in the field.
- Undertake advocacy activities related to the launch of the consolidated inter-agency appeals as well as implement international advocacy campaigns on the protection of civilians in armed conflict and natural disaster reduction.

Field-Oriented Advocacy

Strengthen humanitarian advocacy at the field level to:

- Ensure that humanitarian assistance and protection reach those most in need.
- Encourage the parties to conflict to comply with the tenets of international law.
- Implement OCHA's campaign on the protection of civilians in armed conflict.
- Raise the profile of forgotten emergencies.

Media Relations

- Work with the media, in New York, Geneva and the field, to raise the profile of ongoing emergencies and disasters.
- Support the ERC and other senior officials, including humanitarian coordinators, in raising the profile of humanitarian issues as they relate to specific crises and policy issues.
- Develop a surge capacity to deploy public information and media relations specialists to the field at the onset of emergencies.
- Develop public positions on issues of concern for articulation in press briefings, interviews, articles, press releases, press kits and statements by the Secretary-General and the ERC.
- Maintain a database of media contacts and organise background briefings for editors.
- Work with producers to develop television packages.

Government Relations

- Develop and implement OCHA's strategy of establishing and/or broadening and deepening relations with governments through organising regular briefings by the USG and other members of the senior management team for the G-77 and regional groups of member states.
- Conduct regular briefings with governments, parliamentary assemblies, permanent missions, international and regional organisations, HLWG, Working Group on OCHA and other donor groups.
- Maintain close contacts with all permanent missions of member states and observer missions in both New York and Geneva.

NGO Relations

- Collaborate with non-governmental organisations in designing and implementing targeted advocacy campaigns.
- Hold regular meetings in New York with the InterAction Consortium, and in Geneva with the Red Cross/Crescent Movement, ICVA and the SCHR.
- Work in close collaboration with the NGO Working Group on the Security Council.
- Improve outreach to the private sector and the academic community.

CHERNOBYL PROJECT

The UN Chernobyl Project coordinates implementation of the UN General Assembly resolution 45/190 of 1990 and of subsequent resolutions on “Strengthening of International Cooperation and Coordination of Efforts to Study, Mitigate and Minimise the Consequences of the Chernobyl Disaster.” It supports the ERC in his capacity as UN Coordinator of International Cooperation on Chernobyl, and ensures the coordination and collaboration of his activities with the Office of the Regional Director for Europe and the CIS of UNDP, recently appointed by the Secretary-General as UN Deputy Coordinator of International Cooperation on Chernobyl, as well as with the Regional Coordinators (RCs) in Belarus, the Russian Federation and Ukraine. The programme assumes the activities of the Secretariat of the Ministerial Quadripartite Committee for Coordination on Chernobyl, and coordinates, convenes and provides substantive support to the Inter-Agency Task Force on Chernobyl. In this context it serves as a focal point for all contacts with UN

Chernobyl Project

Agencies and other relevant international organisations, and maintains records and databases of ongoing and planned activities.

In 2001, the Chernobyl project:

- Organised the commemoration of the fifteenth anniversary of the Chernobyl accident;
- Provided support, together with UNDP, to the UN Coordinator of International Cooperation on Chernobyl to adjust UN strategy in addressing the consequences of the accident, through developmental and rehabilitation interventions;
- Finalised the Secretary-General's report to the General Assembly on Chernobyl, prepared various missions of the UN Coordinator and Deputy UN Coordinator; and
- Prepared a new appeal to donors for developmental and rehabilitation assistance to the victims of the disaster.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Elaborate on the new UN Chernobyl strategy in cooperation with UNDP's Regional Bureau for Europe and the CIS.
- Elaborate and implement, in coordination with UNDP, a concerted donor strategy to mobilise funding for the UN's effort to address Chernobyl consequences through developmental and rehabilitation activities, the development of small and medium enterprises and medium-term health care interventions.
- Revitalise the work of the Quadripartite Ministerial Committee for Coordination and of the UN Inter-Agency Task Force on Chernobyl.
- Manage the UN Trust Fund for Chernobyl.
- Raise the political awareness of the need for international cooperation on Chernobyl.
- Enhance cooperation with the Sasakawa Memorial Foundation, International Green Cross and other major private foundations.
- Coordinate and monitor Chernobyl-related projects and programmes.

CHAPTER FOUR

INFORMATION MANAGEMENT

INFORMATION MANAGEMENT SECTION

Overall Requirements				
Information Management				
Planned Staffing	RB	XB	Projects	Total
Professional	5	9	8	22
General Service	3	15	4	22
Total	8	24	12	44
Staff and non-staff Costs (US\$)	899,200	2,924,494	2,311,672	6,135,366
Total Requested (XB and Projects)			US\$ 5,236,166

-----------------------------------	--	--	----------------	--

The capacity to effectively manage information in a timely manner during disasters and emergencies is an essential component of humanitarian coordination, as it forms the very basis on which coordination can occur. To this end, OCHA bridges the communications between partners and expands this partnership through the collection, analysis and dissemination of information, providing vital, up-to-date and accurate reporting to governments, non-governmental organisations, academic and research institutions and other bodies.

Though the functional responsibility for information management is based in the Advocacy, External Relations and Information Management Branch in New York, the task of collecting, analysing, consolidating and disseminating information is carried out by nearly all OCHA offices.

-----------------------------------	--	--	--------------	--

At headquarters, information management functions are shared among several units: Information Technology, Information Analysis, ReliefWeb, Field Information Support, Early Warning and Contingency Planning. In sub-Saharan Africa and Central Asia, the IRIN improves the response of the relief community to humanitarian crises through the provision of timely, accurate and contextual information from a regional perspective.

Information Management in OCHA comprises the following areas:

Early Warning and Contingency Planning

OCHA takes a lead role within the UN system in the early warning of new, complex emergencies, helping to identify preventive measures and working with the UN country teams to develop and maintain inter-agency contingency plans.

ReliefWeb

ReliefWeb, the premier online source for humanitarian information, provides a wide range of information, including time-critical situation reports, maps and financial tracking for both natural disasters and complex emergencies. Having established an antenna office in Kobe, Japan, in 2001, ReliefWeb now provides 24-hour coverage of humanitarian crises world-wide and has strengthened its service in the Asia Pacific region.

ReliefWeb topped 100 million hits in 2001, up from 44 million hits in 2000.

Other Web-based Tools

OCHA-Online is OCHA's official Web site and includes information specific to OCHA's core functions and services. In particular, the site uses the strengths of the Internet to shape public opinion and influence policy-making to act as a platform for advocating humanitarian issues. For example, in 2001, OCHA launched a special Web campaign on the "Protection of Civilians in Armed Conflict" to clarify the issues relevant to protection of civilians and act as a reference tool for practitioners and policy makers.

Field Information Support (FIS)

The FIS project aims to strengthen and facilitate the use of data and information in humanitarian operations. FIS designs and builds the systems that manage the collection, analysis and dissemination of information in the field, and leads inter-agency initiatives to establish common methods and standards for information exchange. The Field Information Support project works jointly with OCHA's humanitarian partners in carrying out its work. Crucial to this team effort is the functioning of the Geographic Information Support Team (GIST) and the Structured Humanitarian Assistance Reporting (SHARE) framework.

Information Technology

The use of information technologies such as the Internet, Web sites, database applications and geographic information systems (GIS) has increased dramatically over the past few years and the application of this technology to humanitarian activities is essential for OCHA staff and partners. OCHA coordinates the exchange of efforts related to new technologies and supports the capacities for the humanitarian community to manage and plan the use of these ever-expanding tools.

In 2001, in the Areas of Information Management and Technology, OCHA:

- Led seven inter-agency contingency planning missions to countries or regions at risk for conflict;
- Participated and contributed actively to the preparation and adoption of the inter-agency contingency planning guidelines, which were endorsed by the IASC in November 2001;
- Developed an early warning methodology and set of indicators for use across the UN system to streamline inter-agency reporting and analysis;
- Led inter-agency efforts to refine the work of the UN Framework Team, an inter-agency forum for promoting in-country contingency planning and preventative measures for high-risk countries;
- Ensured the inclusion of preparedness measures in some consolidated appeals;
- Provided surge capacity to the field;
- Took a leading role in inter-agency work for the GIST;
- Supported the establishment of three regional information centres;
- Opened a ReliefWeb antenna in Kobe, Japan;
- Experienced increased usage of the Map Centre by 18 million hits;
- Launched Web site on the protection of civilians in collaboration with PDSB and ReliefWeb;
- Launched a Web site for the 2002 CAP in collaboration with ReliefWeb and RCB;
- Strengthened the Information Technology (IT) establishment in New York and the field including adding help desk support in New York, and placing a regional IT officer in Nairobi;
- Developed and disseminated two versions of the Field Guidelines CD-ROM, an information resource and advocacy tool for partners containing almost 300 key documents.

Early Warning and Contingency Planning

- Facilitate the development and maintenance of inter-agency contingency plans of the UN country teams located in countries or regions identified at risk of developing into a complex emergency.
- Develop a dedicated training module for inter-agency contingency planning, complete with a handbook for OCHA staff, including senior managers.
- Design and launch a Web site devoted to issues pertaining to early warning.
- Share an approved set of FT early warning indicators with at least ten field offices and evaluate their effectiveness in streamlining the reporting and monitoring pre-crisis situations.
- Establish an Internet Forum for Conflict Prevention.
- Strengthen the UN's capacity for analysis of structural risk variables by using GIS.

Information Technology

- Improve access to information systems at headquarters and for all OCHA field offices.
- Consolidate OCHA's internal information systems using an Intranet, and provide strategic advice and technical support for OCHA's external information systems through the Internet.
- Enhance the capacity for the rapid installation of Information and Communications Technology (ICT) in the field;
- Develop an OCHA-wide ICT strategy in line with overall UN plans.
- Increase availability of IT training to OCHA staff in the field and strengthen IT support to field offices through regional IT support staff.
- Construct an OCHA information portal bringing together internal and external information sources for staff at headquarters and in the field.
- Introduce new Web-based tools, and simultaneously review the platforms, including Lotus Notes, currently used at headquarters and in field offices.
- Continue to ensure reliable communications facilities for headquarters and field offices, and provide training and user support as and when required.
- Consolidate and expand OCHA's existing document repositories into a departmental "Virtual Library".

ReliefWeb

- Consolidate coverage of the Asia Pacific region from its new Kobe location, actively networking with humanitarian organisations to establish partnerships and sources in the region.
- Promote a declaration among humanitarian partners to proactively share humanitarian information at the Symposium on Best Practices for Humanitarian Information Exchange in February.
- Redesign ReliefWeb to mobilise support for breaking emergencies.
- Launch an emergency-specific ReliefWeb information feed service to field-based Web sites.

Other Web-Based Tools (OCHA-Online)

- Redesign and adapt OCHA-Online for both external and internal information needs to consolidate all existing branch-specific Web pages under the OCHA-Online umbrella and
- Create an integrated information platform that offers both an Internet version for external audiences and an intranet version for internal audiences.

Field Information Support (FIS)

- Provide surge capacity to the field, and support inter-agency needs assessments, data collection and dissemination as well as the creation of maps and other GIS tools.
- Provide logistics and technical support to the field, including a roster of trained technical experts who can be fielded on short notice.
- Establish additional humanitarian information centres (HICs) and standard operating procedures (SOP).

FIELD INFORMATION SUPPORT PROJECT

Field Information Support Project				
Planned Staffing	RB	XB	Projects	Total
Professional	-	-	3	3
General Service	-	-	1	1
Total	-	-	4	4
Staff and non-staff Costs (US\$)	-	-	896,700	896,700
Total Requested (XB and Projects)			US\$	896,700

In the last ten years, the magnitude of natural disasters and the intensity of wars and civil conflict have led to a substantial increase in humanitarian emergencies. Access to up-to-date and accurate information is critical to closing information gaps, minimising duplication and providing quick and effective response. Recent advancements in the sophistication, speed and portability of computer technology, satellite communications and mapping tools make up-to-the minute information analysis and distribution possible and powerful.

The FIS project aims to strengthen and facilitate the use of data and information in humanitarian operations.

FIS designs and builds the systems that manage the collection, analysis and dissemination of information in the field, and leads inter-agency initiatives to establish common methods and standards for information exchange.

The Field Information Support project works jointly with OCHA's humanitarian partners in carrying out its work. Crucial to this team effort is the functioning of the GIST, a group of information managers from several UN Agencies and donors including UNHCR, OCHA, UNICEF, WFP and Food and Agriculture Organization (FAO) as well as the World Bank, United States Agency for International Development's/Office for Foreign Disaster Assistance (USAID/OFDA) and the Joint Research Centre (JRC) of the European Community. This team, chaired by OCHA, works together on identifying information management needs in the field, and in supporting solutions to them, ranging from deploying the necessary staff through trouble-shooting on implementation problems that may occur on the ground.

A related focus of the project is on the development of a common frame of reference for developing and sharing information management products. This SHARE approach provides a systematic framework for organising critical information so that it can be pooled, analysed, compared, contrasted, validated, reconciled and mapped. Most of the key actors are now involved with this development process, and are discussing how to more effectively implement this approach in practice on the ground.

In 2001, OCHA's Field Information Support Project:

- ➔ Provided direct field assistance by deploying information management staff to Mozambique, Eritrea, Guinea, and Afghanistan (Islamabad).
- ➔ Provided continued support in the Horn of Africa, the Russian Federation, the Balkans and Sierra Leone;
- ➔ Provided surge capacity to Sierra Leone and to Islamabad to initiate information management activities;
- ➔ Led the inter-agency work GIST on field information standards and served as UN Geographic Information Working Group co-task manager with DPKO on field implementation;
- ➔ Supported the establishment of regional and/or sub-regional presence, for Data Exchange Platform for the Horn of Africa (DEPHA), West Africa Sierra Leone Information System (SLIS), and in the Central Asia/Afghanistan region (HIC Islamabad);
- ➔ Initiated operational linkages for the provision of information with key government and UN Agency partners and private companies such as Spot Image and ESRI; and
- ➔ Established, together with Information Technology Outreach Services (ITOS) (at University of Georgia), a secure data repository for providing key base and operational data to the humanitarian community for humanitarian response. This capacity is currently being used during the Afghanistan crisis.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Deploy information management and GIS specialists to the field as part of a first wave response to sudden-onset disasters or emergencies.
- Support inter-agency needs assessments, data collection and dissemination and the creation of maps and other GIS tools.
- Maintain a roster of trained technical experts that can be fielded on short notice. Provide logistics and technical support to these experts from headquarters.
- Acquire baseline data, software and information products from third-party providers to facilitate and enhance the use of information in the field. Secure agreements with humanitarian partners on minimum data requirements in times of crisis.
- Deploy to HICs in times of crisis and develop models for a broad range of emergencies to inform future deployments.
- Create guidelines and training modules to standardise and facilitate data and information coordination in the field.
- Work closely with humanitarian partners, governments and regional bodies on the criteria for the establishment of regional data information centres with the goal of improving preparedness, information technology support, and early warning/contingency planning mechanisms and general information flow in high-risk regions.
- Develop the inter-agency data repository for all-current operational data and interactive mapping capacity.
- Develop a common strategy for the use of geographic information within the UN and its specialised agencies, programmes and funds in coordination with the United Nations Geographic Information Working Group (UNGIWG).

ReliefWeb was launched in 1996, and is now acknowledged globally as the premier on-line source of time-critical, reliable information on humanitarian issues.

Operating with staff in New York, Geneva and Kobe, it provides 24-hour coverage of more than 40 humanitarian emergencies, including natural disasters as and when they occur. The site features a searchable database of more than 150,000 UN documents, policy studies and analysis dating back to 1981. One thousand five hundred high-resolution maps illustrate current and past emergencies.

ReliefWeb maintains information partnerships with more than 700 organisations world-wide, including UN Agencies, international organisations, governments and non-governmental organisations.

Situation reports, needs assessments, donor contributions, maps and analyses are consistently relayed from partners and are supplemented with media coverage to provide the most comprehensive overview available of unfolding emergencies.

The site's core audience consists of aid practitioners, policy analysts and academics. ReliefWeb averages 1.5 million hits and 400,000 document downloads each week. Total hits topped 100 million in 2001.

In 2001, ReliefWeb:

- Published more than 20,000 documents covering all aspects of humanitarian response efforts for 20 complex emergencies and 70 natural disasters;
- Experienced increased usage of the Map Centre by 18 million hits following its redesign and received more than 13,000 subscriptions to the newly automated Vacancies section, posting more than 200 job listings monthly for more than 250 organisations;
- Launched, in cooperation with RCB, the online FTS to provide up to the minute data on contributions;
- Launched a Web campaign on the protection of civilians in armed conflict in cooperation with OCHA's advocacy and policy branches; and
- Redesigned the Humanitarian Directory to provide clearer contact information for partners in the humanitarian community.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Conduct a Symposium on Best Practices in Humanitarian Information Exchange. The symposium, scheduled for February 2002, will bring together 200 participants representing information professionals and practitioners from the international humanitarian community at large.
- Network with humanitarian organisations in the Asia Pacific region to form information partnerships and strengthen coverage of regional emergencies via the new ReliefWeb team in Kobe.
- Update the site using the latest technologies to enhance navigation and site design to highlight information critical to decision-makers during fast-moving events and to better mobilise support for breaking emergencies.
- Develop ReliefWeb information feeds to allow partner organisations to post emergency-specific information feeds automatically onto their own Web sites.
- Pilot an online mapping project in cooperation with RCB, to present financial tracking data geographically.
- Collaborate with the Asian Disaster Reduction Centre (ADRC), the Centre for Research on the Epidemiology of Disasters (CRED) and other humanitarian partners to establish a common Global Identity Number (GIN) to act as a common numerical identifier for natural disaster information and allow for inter-operability and exchange of information between participating organisations.

SECTION THREE

COORDINATION ACTIVITIES IN THE FIELD

INTRODUCTION

OCHA IN THE FIELD

OCHA's field presence is maintained in a flexible manner, in order to meet the changing needs and demands of humanitarian crises around the world. In 2001, OCHA closed its field offices in Rwanda and the Republic of Congo, established a field office in Skopje, Former Yugoslav Republic of Macedonia, and opened several sub-offices in countries such as the DRC and Afghanistan. In 2002, OCHA will consolidate its Regional Offices for the Horn of Africa and the Great lakes Region, and the Kenya Office, into one Regional Support Office for Central and East Africa, and establish a Regional Support Office in West Africa. It will further strengthen the Offices of the RDRA in Asia and Latin America, and establish its RDRA presence in Africa.

OCHA provides support to the Office of the Resident and/or Humanitarian Coordinator in many emergency situations. It also loans staff to other agencies who undertake emergency coordination functions. In general, OCHA maintains four types of offices:

OCHA FIELD OFFICE: An OCHA field office performs coordination and support functions for the country or territory, and may oversee one or more sub-offices within the country or territory. Field offices are usually based in a capital city and maintained for an intermediate term.

OCHA SUB-OFFICE: OCHA sub-offices are smaller, satellite offices usually based in outlying areas that support local coordination. Sub-offices are usually supervised by a field office.

OCHA REGIONAL SUPPORT OFFICE: A regional office has a supporting role to other countries in that region, that may or may not have a country office. This is especially the case in protracted emergencies where overall coordination benefits from a broader, longer-term regional support structure.

OFFICE OF THE REGIONAL DISASTER RESPONSE ADVISOR: The office of the RDRA oversees the regional aspects of disaster response, preparedness and management and may be called upon to assist in other types of emergencies.

By mid 2002, OCHA will be present in 35 countries in the world.

AFRICA AND THE MIDDLE EAST

Photo: OCHA/WFP, 2001. Eritrea.

A drought victim picks up food at a distribution.

Drought and flooding in many parts of the world are affecting many communities facing or recovering from violent conflict, greatly increasing their vulnerability.

ANGOLA

The level of vulnerability among the general population in Angola is one of the highest in the world. A greater percentage of Angolan people are at risk for disease and destitution than in any other African country. More than 25 percent of the entire population is displaced and at least ten percent are dependent on external assistance for survival. During 2002, displacement is expected to continue at levels only slightly lower than they were in 2001. Access for international agencies will remain restricted and conditions for new operations are likely to be in place in only eight to ten locations. Guerrilla and counter-insurgency warfare is expected to create further hardship and deepen vulnerabilities among populations at risk, particularly in areas where no humanitarian assistance is available. Hundreds of thousands of Angolans in contested areas are likely to suffer basic rights violations and more than one million displaced will depend on international aid.

The main goal for humanitarian partners during 2002 is to save lives and promote the well-being of vulnerable populations, including children, women and displaced persons, through an integrated, rights-based strategy coordinated under the leadership of the Government of Angola.

In order to achieve this goal, humanitarian partners are committed to ensuring that assistance is provided in accordance with core principles upheld by the Angolan constitution and on the basis of international standards. The new rights-based strategy draws directly on Angolan law, and, where appropriate, international

Angola			
Planned Staffing	International	National	Total

National Officers		8	8
General Service		37	37
Total	22	45	67
Total Extrabudgetary Requirements		US\$ 4,289,580	

humanitarian and human rights law. The aim of the strategy is to bring greater coherence to the humanitarian operation by adopting a principled framework for action that integrates core principles and legal instruments into each sectoral strategy, and sets realistic targets for partners to reach by the end of the year. In adopting the strategy, the Government, humanitarian partners, beneficiaries and other partners aim to move systematically and collaboratively for the next several years towards the gradual attainment of the rights embedded in Angolan law.

Recognising that primary responsibility for humanitarian assistance rests with the Government, agencies aim to provide complementary support in key social sectors. They will continue to focus on reaching and stabilising the most vulnerable populations through integrated programming, while at the same time helping to lay the groundwork for future social and economic recovery.

As in previous years, overall coordination of humanitarian intervention will be undertaken by the Ministry of Social Affairs and Reintegration (MINARS) on behalf of the Government, and by the HC with the support of OCHA on the part of the UN. Ten UN organisations, 100 international NGOs and more than 340 national NGOs and church organisations will adopt these strategies, providing emergency and emergency recovery assistance to both host and displaced communities. Seven technical ministries and departments within the central Government will be

involved in the coordination efforts, as will the relevant local authorities at provincial level. A key aim will be to support the Government in taking concrete steps to strengthen coordination and to encourage the

channelling of more Government resources into emergency programmes and social sectors.

In 2001, the OCHA field and sub-offices in Angola:

- ➔ Adopted a comprehensive IDP protection strategy under the aegis of the Protection Working Group, an inter-agency body co-chaired by UNHCR and OCHA and comprised of representatives from UN Agencies and NGOs. The terms of reference for the Government-led sub-group on refugees and IDPs were revised to include responsibility for promoting IDP protection;
- ➔ Held provincial protection workshops as part of a joint training team composed of Government and UN representatives. The workshops were conducted in ten provinces for representatives from security forces, local authorities, UN Agencies, NGOs and members of civil society. Six provincial protection plans were officially approved by the provincial governments in Zaire, Malanje, Benguela, Bié, Kuando Kubango and Kuanza Norte. Three provincial working groups on protection were established and met regularly to address protection issues;
- ➔ Supported a MINARS-led technical working group, with seven sectoral sub-groups, to develop standard operating procedures (regulamentos) for the implementation of the Norms on the Resettlement of Displaced Populations, incorporated into national law on 5 January 2001. The aim of the technical working group, which included 11 government ministries and departments, UN Agencies and NGOs, was to produce a set of legally binding procedures that would guarantee the standardised application of the norms countrywide and identify benchmarks for the monitoring of the resettlement process;
- ➔ Participated in the Humanitarian Coordination Group, co-chaired by the Minister of Social Affairs and Reintegration and the Humanitarian Coordinator (a.i.), which met in Luanda to agree on the national work plans for the three national sub-groups on Food Security and Agriculture, Health and Nutrition and IDPs and Refugees;
- ➔ Facilitated the drafting of the second National Plan of Emergency Action under the leadership of the Technical Unit for the Coordination of Humanitarian Assistance (UTCAH). The plan focused on government actions in seven sectors and established an overall framework for humanitarian intervention from May 2001 - May 2002;
- ➔ Reorganised and expanded the network of OCHA field advisors to improve geographic coverage. OCHA is now represented in 17 provinces through 11 field advisors, and staff have been deployed to support the coverage of coordination activities;
- ➔ Assisted the Government, UN Agencies and NGOs in conducting the second annual rapid assessment of critical needs. Inter-agency teams assessed 29 locations in 12 provinces;
- ➔ Conducted training sessions for all UTCAH coordinators and 12 national facilitators from Private Agencies Collaborating Together (PACT) on a Project on a Humanitarian Charter and Minimum Standards in Disaster Response (SPHERE) and the Norms on the Resettlement of Displaced Populations. Following the training, 11 provincial workshops on SPHERE were led by UTCAH coordinators;
- ➔ Facilitated the second provincial-planning workshop attended by more than 120 government delegates and UN field staff from all provinces. On the basis of this training, provincial emergency plans of action identifying humanitarian priorities and outlining the concrete steps that partners would be taking in the coming year were drafted in each province under Government leadership and in full consultation of all partners; and
- ➔ Disbursed US\$ 4.7 million through its Emergency Response Fund (ERF) to support 44 projects implemented by 29 NGOs in 15 provinces in the areas of agriculture and food security, health and nutrition, water and sanitation, mine action, resettlement, non-food items and protection. The ERF was also used to ensure the main pipelines for non-food items.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Serve as the secretariat for the HC.
- Convene appropriate coordination structures with all partners to facilitate needs assessments, identify gaps in humanitarian coverage and monitor progress.
- Work closely with all partners to ensure integration of programmes across sectors, and develop strategic and operational objectives for each province.
- Support Government efforts to uphold humanitarian principles, including compliance with the regulamentos for implementing the norms on resettlement.
- Provide relevant and timely information on the humanitarian situation to all partners.
- Build coordination capacity at provincial and national levels through joint activities with UTCAH.
- Provide short-term support to relevant NGOs through the ERF, enabling them to address the critical needs of vulnerable populations.

BURUNDI

Burundi			
Planned Staffing	International	National	Total
Professional	4		4
National Officers		-	-
General Service		14	14
Total	4	14	18
Total Extrabudgetary Requirements		US\$ 1,043,690	

The appointment of the transitional government on 1 November 2001 was a significant step forward. Two unsuccessful coup attempts made at key junctures in the Arusha peace process, however, heightened existing tensions. A cease-fire agreement with the armed opposition, crucial to attaining sustainable peace, has not been reached so far.

Insecurity continues to hamper access to vulnerable populations and is an issue of grave concern to humanitarian actors. More than 432,000 Burundians dwell in shelters for the internally displaced. Additionally, an estimated 200,000 are surviving under ad-hoc arrangements. In these cases, delivery of humanitarian assistance is particularly difficult, yet their needs are acute. Outbreaks of violent combat in various parts of the country, including the capital, have resulted in the destruction of homesteads and public infrastructure and have led to displacement of another 100,000 people. Reaching these groups remains a major challenge to humanitarian actors.

More than 412,000 people have sought refuge in neighbouring countries, mainly Tanzania. The unpredictability of the situation demands preparation for possible large-scale repatriation at any time.

Food insecurity remains high. In 2002, more than 711,000 people will need food assistance and more than 2.5 million will need seeds for planting. In addition, Burundi has witnessed medical emergencies compounded by malnutrition as a direct result of displacement and weak social services and infrastructure. During the first quarter of 2001 a malaria epidemic peaked at one million cases, and left thousands malnourished and weakened. Cases of other infectious diseases, particularly Human Immuno-Deficiency Virus/Acquired Immuno-Deficiency Syndrome (HIV/AIDS), are constantly increasing.

In 2001, the OCHA office was reinforced with new staff to facilitate the work of the Humanitarian Coordinator and to improve overall coordination capacity in a country where more than 50 international NGOs operate.

In 2001, the OCHA field and sub-office in Burundi:

- Facilitated the establishment of the Permanent Framework for the Protection of IDPs, signed by the HC and the Burundian Minister of Human Rights in February. The framework consists of two main bodies: a high-level committee for the protection of IDPs, which brings together members of the Government, UN Agencies and national and international NGOs, and the follow-up technical group, which analyses issues of concern and makes recommendations for their resolution;
- Participated substantially in the formulation of the framework and acted as secretariat to the follow-up technical group;
- Finalised the IDP Plan of Action, a document that gives an overview of the conditions of the displaced in Burundi, analyses strategic and operational coordination regarding IDPs, examines the issue of protection, touches on the problem of access and security, and advocates for the revitalisation of a comprehensive humanitarian dialogue;
- Consolidated its database on IDPs and prepared specialised maps, charts and graphic supports regarding the humanitarian situation on the ground and the activities of humanitarian agencies for information, programme and planning purposes;
- Formalised the formation of rapid emergency assessment coordination teams (REACT), which jointly assess primary needs at 24-hour notice;
- Revived UN Agency, donor and NGO inter-agency contingency planning, to review and update contingency plans at regular intervals and to ensure coherence and integration with regional contingency planning;
- Participated in the improvement of coordination of support of UN Agencies, donors and NGO partners in response to the malnutrition crisis;
- Revised the process of joint CAP planning in 2001 and coordinated the preparation of the CAP for 2002;
- Facilitated the weekly UN/NGO contact group and other inter-agency planning fora for the exchange of information on humanitarian activities and developments in the field, as well as to initiate follow-up action;
- Fostered coordination both at central and at provincial level, through participation in the meetings of the thematic groups and of the provincial focal points;
- Liaised with provincial authorities, NGOs and the World Bank about the establishment of a proposed airstrip in Makamba province; and
- Advocated for improvement of access and assistance to vulnerable populations in Bujumbura Rural, with provincial and communal authorities.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Support the peace and reconciliation process through the Humanitarian Principles Campaign, which aims to reach important stakeholders on the governmental, provincial and community levels, as well as the general public.
- Facilitate the management of the UNHCR offices in the provinces of Ruyigi and Muyinga as inter-agency operations in preparation for possible large-scale repatriation movements from Tanzania.
- Increase the deployment of inter-agency multidisciplinary rapid reaction teams to conduct joint needs assessment missions and ensure appropriate follow-up.
- Ensure that sectoral and provincial coordination fora are convened on a regular basis in consultation with the designated lead agencies.
- Strengthen existing coordination fora and mechanisms for proactive joint analysis and strategic planning.
- Prepare and disseminate regular reports on humanitarian operations, advocacy initiatives and other issues for publication on ReliefWeb.
- Continue to further refine and update the database on IDPs, with particular regard to the displaced populations, as well as the general database on humanitarian activities on the ground.
- Monitor, review and revise the 2002 Consolidated Appeal and facilitate the preparation of CAP 2003.
- Strengthen security management arrangements.

DEMOCRATIC REPUBLIC OF THE CONGO

Democratic Republic of the Congo			
Planned Staffing	International	National	Total
Professional	14		14
National Officers		2	2
General Service		31	31
Total	14	33	47
Total Extrabudgetary Requirements		US\$ 3,385,578	

The progressive withdrawal of the parties to the Lusaka Agreement from the conventional frontline, the deployment of Mission d'Observation des Nations Unies au Congo (MONUC) military observers and the start of the disarmament, demobilisation, repatriation and reintegration of armed elements, have all signalled a new and more positive phase in the 12-year conflict in the DRC. The national dialogue, though tentative, has begun in earnest. These improvements, however, fail to hide the contrast between the relatively peaceful situation in the central and western areas, where the population awaits economic and institutional reconstruction, and the instability along the eastern DRC borders. More than ever, this area has become a regional battleground. Meanwhile, the unresolved conflict in Angola continues to fuel instability on the southern borders.

Current statistics - two million displaced people and 16 million considered to be food insecure - only tell part of the tale. More than 2.5 million people have died since August 1998 in eastern DRC, largely as a result of economic and food insecurity. The situation is compounded by the presence of 360,000 refugees from seven neighbouring countries. The root causes of this chronic instability are a dangerous mixture of a proliferation of small arms combined with profound and exploited distrust between communities, all against a backdrop of overwhelming exhaustion and abject poverty.

As in previous years, the unprecedented depth and breadth of humanitarian emergencies during 2001 highlighted the importance of OCHA's role in developing common humanitarian strategies, in advocating for access, particularly in Ituri, Kivu and northern Katanga, and implementing, consolidating and facilitating emergency interventions.

In 2001, the OCHA field and sub-offices in the DRC:

- Coordinated and developed a common humanitarian strategy for the UN system and the relief community in situations that ranged from violence-prone areas like Ituri to some recovery areas such as Equateur or Kasai Oriental;
- Strengthened the emergency response capacity of UN Agencies through the "Emergency Humanitarian Interventions" programme and oversaw ten interventions;
- Expanded OCHA presence by consolidating and/or opening four new sub-offices in Gemena, Kindu, Lubumbashi and Kalémie to bolster the existing ones in Kinshasa, Mbandaka, Kisangani, Bunia, Goma and Bukavu;
- Fostered rapid transition modalities through Quick Impact Projects (QIPs) aimed at reinforcing local structures in preserving and amplifying existing responses to crises;
- Advocated and promoted respect for humanitarian principles, and assisted in peace negotiations to avoid renewed conflict at local level;
- Provided leadership in innovative initiatives, including the launch of the first humanitarian barge to northern Equateur, and drafting of an agreement to undertake a similar voyage from Kinshasa to Kisangani, and sponsored a series of sacred causes symbolising the country's attempted return to normality. This included such actions as transporting students from rebel-held Kindu to Government-held Lubumbashi; unifying families across the frontlines, and supporting a system whereby state-run exams are taken simultaneously by pupils attending schools all over the country;
- Organised and led UN/NGO/local authorities assessment missions, consolidated briefing packages on the UN system for the Security Council and the Secretary-General, and provided systematic briefings to all major missions on the humanitarian situation;
- Oversaw the strengthening of local capacities through an emergency response fund.
- Monitored population movements country-wide (IDPs, returnees, hosting families) and provided humanitarian and donor communities as well as authorities with regular aggregated figures on affected populations; and
- Initiated and coordinated a comprehensive analysis on mortality trends as well as a comprehensive and qualitative survey on health infrastructure in Kinshasa.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Adjust strategies to the changing environment, to support commercial exchanges inside the country and across the frontline, open humanitarian corridors to access most vulnerable population, and negotiate with and promote awareness among all belligerents on rules of engagement and principles of humanitarian interventions.
- Increase the emergency response capacity, such as emergency humanitarian intervention and QIPs, of the UN system through an emergency response fund.
- Provide comprehensive support to the HC and through him/her to the Special Representative of the Secretary-General in the DRC, through:
 - ▶ Reinforced capacity, global coherence and responsibility in areas under rebel control, with a special emphasis on interactions with NGOs, local structures and groups controlling access to civilians;
 - ▶ Increased capacity at decentralised level under Humanitarian Coordinator supervision and guidance in keeping with the complexity of crises in a wide range of areas and with a variety of interlocutors; and
 - ▶ Close interaction with the disarmament, demobilisation and durable solutions (D3) component of the MONUC peacekeeping mission in DRC.
- Increase information capacity with particular emphasis on policy recommendations, analysis of social, economic and humanitarian situations, and liaise with international and local humanitarian partners and the DRC Government. Newly posted information officers will be supported through the expanded country-wide network.

Eritrea			
Planned Staffing	International	National	Total
Professional	5		5
National Officers		4	4
General Service		15	15
Total	5	19	24
Total Extrabudgetary Requirements		US\$	814,898

The peace agreement signed in December 2000 for the cessation of hostilities between Eritrea and Ethiopia resulted in the return of large numbers of IDPs and refugees. In 2001, as the peace process took hold, and more areas in the Temporary Security Zone (TSZ) became accessible, more than 200,000 IDPs were able to return home, and an additional 20,000 refugees returned from the Sudan. Despite significant progress in the peace process between the two countries, there are still:

- ▶ An estimated 44,400 registered IDPs living in camps in the country, who are not able to return to their home villages due to insecurity and/or mines;
- ▶ Approximately 14,000 persons of Eritrean origin in camps expelled from Ethiopia's Tigray region that require to be resettled in the country;
- ▶ A total of 152,000 Eritrean refugees, to be repatriated in 2001 and 2002, who fled the war to neighbouring countries and require repatriation and reintegration assistance; and
- ▶ Some 200,000 soldiers who will need to be demobilised and reintegrated by the end of 2002.

Three successive years of drought that devastated much of the Horn of Africa have compounded these challenges and affected agricultural and livestock production, compromising household food security and over-stretching traditional coping mechanisms. In order to assist the three million people devastated by war and impoverished by drought, OCHA maintains a field office in Asmara.

The office supports the R/HC in coordination of emergency response. The office aims to facilitate emergency interventions through advocacy and the provision of timely and accurate information and to ensure appropriate assistance reaches those most in need, while also advocating for a gradual transition from relief to long-term recovery and development. The office also includes an information coordination centre (ICC), which is jointly managed with the Government.

To further strengthen field coordination and information sharing, OCHA in 2002 will establish two sub-offices in Senafe and Tessenai staffed by two UN Volunteers.

In 2001, the OCHA field office in Eritrea:

- Contributed to strengthening central coordination mechanisms for transition towards recovery, reintegration, and rehabilitation programmes, in close collaboration with the Government of Eritrea (in particular the Eritrean Relief and Refugee Commission - ERREC), the UNCT and other relief, recovery and development actors;
- Managed the ICC, under the auspices of the R/HC, and facilitated the relief effort through the collection, analysis and dissemination of information pertaining to the humanitarian situation in Eritrea;
- Prepared briefings for newly arrived NGOs and other concerned parties, published focus papers, bi-weekly humanitarian updates and monthly donor briefing papers, participated in sectoral and thematic meetings and working groups and gathered information at the field level;
- Expanded the ICC by adding a GIS and Data Coordination Unit, tasked with strengthening collaborative data collection, analysis and exchange among humanitarian and development actors;
- Acted as the focal point and facilitator for the 2002 consolidated appeal, and assisted in the drafting of the UNDAF, supporting regular exchange of donor and international community regarding unmet financial requirements;
- Supported the Office of the Regional Humanitarian Coordinator (ORHC) for the Drought in the Horn of Africa and other OCHA offices in the region on issues with a regional dimension; and
- Collaborated with United Nations Mission in Ethiopia and Eritrea (UNMEE) on issues of mutual concern including the interface between the UNMEE peacekeeping force and the humanitarian community, through support and participation in civil-military cooperation structures and mechanisms.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Facilitate the coordination of Agency/NGO activities in the field in a more proactive fashion through support to coordination mechanisms.
- Service the information needs of the humanitarian community through the ICC.
- Provide guidance to members of the UNCT and NGOs on the issue of IDP policy and actions.
- Continue to coordinate assistance and monitoring for relief provided to 524,000 potential drought victims.
- Continue to provide regular updates on the status of the consolidated appeal and facilitate regular donor meetings.
- Expand the data management system to improve information on UN/NGO programme activities based on surveys conducted by the GIS unit including the “Who Does What Where?” database, which is currently being shared freely among humanitarian and development actors to promote a coordinated approach to assistance.
- Support reconstruction and rehabilitation activities and the UNDAF process;
- Improve the national capacity for contingency planning and rapid response to complex emergencies. This will involve establishing a sustainable GIS governmental unit and handing the ICC over to ERREC by December 2002.
- Strengthen field coordination mechanisms in the TSZ and ensure regular information flow between the field and Asmara by deploying two field officers in the last quarter of 2002.
- Facilitate the coordination and integration of 200,000 demobilised soldiers through linkages with post conflict reconstruction and recovery programmes.

ETHIOPIA

Ethiopia			
Planned Staffing	International	National	Total
Professional	2		2
National Officers		-	-
General Service		14	14
Total	2	14	16
Total Extrabudgetary Requirements		US\$	621,262

The peace agreement between Ethiopia and Eritrea, signed in December 2000, has resulted in the movement of large numbers of IDPs, refugees and drought-affected people across the country. These population movements have precipitated the need for constructive consultation and dialogue at all levels within the humanitarian community, and for the informed, decisive coordination of relief assistance programmes.

Droughts interspersed with bouts of heavy rain regularly impede agricultural sustainability and impoverish a country already grappling with overpopulation, widespread poverty and epidemics of disease.

To help mitigate the humanitarian crisis caused by the war and drought, OCHA maintains the UN Emergency Unit for Ethiopia (EUE), located in Addis Ababa, which supports the HC for Ethiopia in ensuring a coherent, timely and cost-effective international response. Moreover, the EUE functions as a secretariat for the United Nations Disaster Management Team (UNDMT), a committee comprising the heads of operational agencies and emergency staff and chaired by the HC/RC.

In addition, OCHA hired a small team of consultants to support early warning efforts, participate in the analysis and quantification of humanitarian needs and, where appropriate, provide support for relief operations in the field. In particular, the team monitors the southern and southeastern lowlands of Ethiopia, focussing on the Somali region.

In 2001, the OCHA field office in Ethiopia:

- Monitored the humanitarian situation throughout the country, engaging short-term researchers and consultants to participate in independent and joint assessment and observation missions;
- Led the process for the formulation of the UNCT's humanitarian intervention strategy for Ethiopia in 2002 and beyond. Similarly, the Government of Ethiopia engaged the international and national humanitarian community in a consultative process for identification of new approaches to delivering short, medium and long-term assistance;
- Participated, along with a select group of donors, the WFP and the Office of the Regional Humanitarian Coordinator (ORHC) for the Drought in the Horn of Africa, in formulating national food security guidelines that have since been used to promote constructive dialogue; encouraged the Government of Ethiopia to initiate appropriate and feasible activities leading to a sustainable national food security strategy;
- Co-initiated and facilitated the formation of a Government-led multi-agency task force for the Somali region, to identify viable solutions for the reintegration of IDPs into productive society, to elaborate contingency planning for this region while taking into account identified internal and regional influences and to support existing early warning efforts. The initiative also includes mechanisms for improving regional cooperation and the creation of sustainable linkages between emergency, rehabilitation and development in collaboration with the Government of the Somali region;
- Carried out a post-drought analysis of the Somali region as a comprehensive basic background paper for concerned and implicated actors (Government, donors, NGOs, international organisations and UN Agencies);
- Developed a three year data and information coordination project proposal, in collaboration with the ORHC, to be implemented in partnership with the Disaster Prevention and Preparedness Commission (DPPC) to maximise the impact of humanitarian response and development programmes by improving the efficiency and effectiveness of data and information systems management;
- Assisted the ORHC in the review, analysis and advocacy of humanitarian intervention and activities during and after the drought in Ethiopia;
- Launched a new Web page; and
- Phased out the Office of the Regional Humanitarian Coordinator for the Drought in the Horn of Africa. This office was established in 2000 to manage emergency response to the drought in Ethiopia together with the EUE and the UNCT.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Continue to strengthen the UNDMT by stimulating thinking on innovative approaches to humanitarian interventions.
- Pursue thematic studies on matters such as pastoralism and conflict in the Somali region and provide support for consultations regarding future national policies tackling poverty and vulnerability of pastoral and other communities.
- Expand existing liaison arrangements with Government, donor and NGO partners; adopt a proactive approach to identifying opportunities to develop local disaster response and management capacity.
- Liaise and consult with relevant counterparts such as the DPPC on humanitarian issues; improve the quality of reporting with thematic mapping, audio-visual materials and graphic design services.
- Ensure the smooth hand-over of the functions of the ORHC for the Drought in the Horn of Africa by the OCHA Regional Support Office for Central and East Africa in Nairobi. The EUE will continue to secure, support and improve coordination mechanisms aimed at meeting needs across the country through integrated programming at sectoral level, strategic monitoring and analysis, and effective and continual communication and collaboration among partners.

GUINEA

Guinea			
Planned Staffing	International	National	Total
Professional	5		5
National Officers		1	1
General Service		12	12
Total	5	13	18
Total Extrabudgetary Requirements		US\$	934,686

Guinea faces a combination of humanitarian and natural emergencies that are compounding recovery efforts. In August and September 2001 flooding caused the worst damage in 30 years, affecting more than 200,000 people. The relocation of refugees away from the borders and the massive displacement of people within the country have created obvious risks to stability and economic development.

In addition, growing insecurity along the border areas of Guinea due to fighting in neighbouring countries has created 200,000 refugees, and led to the internal displacement of another 300,000 people.

At the request of the UNCT and the RC in Guinea, OCHA opened its Conakry office in early 2001, where a small team coordinates and mobilises the UN system and its partners to meet the needs of people facing emergency and disaster conditions in the country. This involves reducing vulnerability, promoting solutions for the root causes of conflicts, developing early warning mechanisms, and facilitating the smooth transition from relief to rehabilitation and development.

The humanitarian strategy of the country is to prevent new crises from spreading within Guinea, and to identify durable solutions for its displaced and refugee populations.

In 2001, the OCHA field office in Guinea:

- ➔ Provided support to sectoral meetings, workshops, press conferences and high-level delegations visiting Guinea at the height of the crisis;
- ➔ Facilitated the arrival of an UNDAC team and the organisation of a joint UN/Government mission to assess flood damage in Upper Guinea;
- ➔ Assisted the Government, UN Agencies and the NGO community in the preparation of the 2002 consolidated appeal;
- ➔ Launched the preliminary steps for the development of a code of conduct; and
- ➔ Engaged in dialogue with IMF and the World Bank on the inclusion of humanitarian factors in macro-economic planning.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Monitor the consolidated appeal and strengthen the coordination capacity of the UNCT.
- Support the Government of Guinea in improving technical and managerial competencies in order to strengthen their coordination capacity.
- Jointly plan humanitarian and transitional development initiatives with the planned OCHA Regional Support Office for West Africa, to be established in Abidjan, Ivory Coast.
- Advance sub-regional coordination, by participating in periodic meetings with OCHA staff in Liberia and Sierra Leone. In order to learn from the current donor initiative, which aims to encourage improved information sharing and a more in-depth dialogue with the UN system, the head of the office will participate in ongoing consultations.
- Expand the UN system's capacity for streamlining actions by ensuring information sharing between the various humanitarian actors. This will be facilitated through the establishment of a multi-faceted information resource policy that includes library material, a Web site, media conferences, and an inter-active database. In addition, OCHA will support the conducting of censuses, inventories and surveys as deemed necessary by operational humanitarian actors.
- Arrange meetings to update the bilateral and donor community on the humanitarian situation, and on the funding status of the CAP. Assist in the planning of the Solidarity Conference for Guinea and in mobilising resources for civil society peace networks.
- Establish a sub-office to monitor situations in conflict prone areas and to better collect information on the humanitarian response and through this office, improve information analysis.
- Advise local authorities on emergency response preparedness, including contingency plans. This will include greater interaction and systematic information sharing with other OCHA offices in the sub-region and with the UN system in general. OCHA will exchange analyses on the social, political, economic and security developments as they relate to the humanitarian situation in the sub-region.
- Foster a culture of peace and build national and regional capacities to prevent and resolve conflicts.
- Advocate for humanitarian principles and the safety of humanitarian workers by adopting a code of conduct; monitoring the application of humanitarian principles with emphasis on women's rights; sensitising all humanitarian actors on the guiding principles of IDP management; and, assisting the UNHCR, UNICEF and relevant partners in advocating respect for the rights of vulnerable groups such as refugees, IDPs, children and women.
- Create new instruments and mechanisms to strengthen the links between humanitarian action, poverty alleviation and vulnerability reduction. Apply a capacity and vulnerability analysis to needs assessments to focus response and combat dependency.

LIBERIA

Liberia			
Planned Staffing	International	National	Total
Professional	2		2
National Officers		2	2
General Service		3	3
Total	2	5	7
Total Extrabudgetary Requirements		US\$	515,317

Towards the end of the year 2000, hostilities intensified in the North, displacing as many as 65,000 people.

Though the Ministry of Planning and Economic Development is charged with the responsibility of coordinating and monitoring development assistance, coordination of IDP and refugee activities is the responsibility of the Liberia Refugee, Repatriation and Resettlement Commission (LRRRC). This commission chairs IDP coordination meetings both in Monrovia and at regional level. However, the LRRRC lacks the requisite capacity to coordinate and monitor humanitarian assistance delivery and depends on OCHA for this task.

The OCHA field office in Liberia was established to support the UN Resident Coordinator in working towards an increasingly coherent and more integrated approach to humanitarian response by UN Agencies and NGOs operating in Liberia. The OCHA field office also aims to address the gap between emergency relief assistance and rehabilitation programmes.

In 2001, the OCHA field office in Liberia:

- Acted as secretariat and co-chair at the weekly IDP coordination meetings;
- Worked in collaboration with the Norwegian Refugee Council to organise and participate in a workshop on the UN Guiding Principles on Internal Displacement;
- Coordinated the revision of the 2001 CAP and the consolidated appeal for 2002;
- Conducted four field visits to IDP camps in Bong and Cape Mount counties; and
- Participated in a donor consultation in Abidjan, Ivory Coast, which aimed at deepening the UN – donor dialogue.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Collaborate with UNDP to provide institutional support to the Government counterpart LRRRC in its efforts to coordinate IDP and refugee activities. While the focus of these activities is on IDPs in established camps, it is expected that the scope of humanitarian response will broaden to cover other vulnerable groups and communities.
- Address immediate humanitarian relief needs by undertaking joint needs, impact and vulnerability assessments and by facilitating collective resource mobilisation through the CAP.
- Organise informal and formal consultation fora, and participate in inter-agency and sectoral and regional coordination meetings.
- Prepare assessment and other mission reports for OCHA headquarters and the wider inter-agency community as appropriate, and prepare periodic situation reports for OCHA headquarters and for in-country dissemination.
- Analyse and report on the implementation status of humanitarian programmes throughout the country. Regularly collect, analyse and disseminate information on the delivery of humanitarian assistance and the overall humanitarian situation in Liberia.
- Create and maintain a database on humanitarian matters. The database will include an inventory of activities, demographic characteristics and the socio-economic aspects of humanitarian assistance.
- Promote operational applications of the UN Guiding Principles on Internal Displacement, and arrange and participate in seminars/training on peace-building, human rights and humanitarian law, security as well as emergency field coordination training.
- Promote respect for human rights at all stages of delivery of humanitarian assistance.
- Organise training of partners in the CAP, maintain a briefing package for the OCHA field office in Liberia, and prepare regular inputs to the West Africa Newsletter. In addition, maintain regular contact with donors in Monrovia and throughout the region.
- Support sustained and comprehensive political initiatives in the interest of the cessation of hostilities.

OCCUPIED PALESTINIAN TERRITORY

occupied Palestinian territory			
Planned Staffing	International	National	Total
Professional	3		3
National Officers		-	-
General Service		3	3
Total	3	3	6

Total Extrabudgetary Requirements	US\$	517,054
--	-------------	----------------

The year 2001 was marked by a deterioration in the humanitarian situation throughout the occupied Palestinian territory, culminating in serious outbreaks which will have far-reaching humanitarian consequences. The living and security conditions of hundreds of thousands of Palestinians continue to decline, a year into Intifada II. If the negative trend towards dramatically reduced purchasing power and consumption, continued psychological strain and protracted insecurity, intermittent access to health and education continues unabated, the situation will inevitably degenerate into a full-fledged humanitarian crisis.

During the 13 months of Intifada II, an estimated 330,000 Palestinians were exposed to security hazards, and as many as 56,000 had to change their place of residence. While a considerable number of these people will qualify for internal economic migration/mobility, some can be legitimately called IDPs. One of the reasons behind the decisions to move is the proximity of their residence to military checkpoints, settlements, or along the newly established security zones.

Insecurity varied in its intensity and seriousness from region to region. In some areas insecurity took the form of direct military activity with the use of heavy arms, shelling of residential areas, targeted assassination practices. In other areas actions against civilians were more subtle but equally damaging such as frequent total closures regimes, where tens of thousands of Palestinians live under military security regimes that range from intermittent, 24-hour quarantines to daily or nightly curfews. Relief agencies'

efforts to ease the burden of military sanctions on their beneficiaries through negotiation have been largely unsuccessful. Their ability to deliver humanitarian assistance effectively has been severely affected by the range of Israeli closures, checkpoints, blockades and other restrictions on movements of staff and goods.

The number of casualties best illustrates the re-escalation of the crisis. The death toll as a result of protracted violence continues to rise. More than 60 percent of casualties were registered among non-fighting civilians. The number of injured also rose: the cumulative figure of Palestinian injured now exceeds 16,000, a figure comparable with conflicts such as Nicaragua in the 1980s or the Federal Republic of Yugoslavia (FRY) in the early 1990s.

At the request of the Office of the United Nations Special Coordinator (UNSCO) for the Middle East Peace Process, and with the support of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), an OCHA mission was established in the occupied Palestinian territory (oPt) in October 2000. The mission assessed the coordination mechanisms in place and recommended possible strategic interventions. OCHA's humanitarian personnel currently assists UNSCO and, through its coordination systems, all other stakeholders, including the Palestinian Authority. The OCHA presence consists of a team leader who also acts as the emergency planner (based within UNSCO and covering the West Bank and Gaza), and two humanitarian affairs officers with UNRWA on the West Bank and UNSCO in Gaza.

In 2001, the OCHA field and presence in the occupied Palestinian territory:

- ➔ Focused on coordination of humanitarian planning and response through continued support of humanitarian coordination mechanisms, through the Humanitarian Task Force for Emergency Needs (HTFEN), a forum for the relief, donor and NGO communities, as well as the Palestinian Authority and the recently established field coordination or area task forces, which focus on operational coordination of relief efforts in the Gaza Strip and the West Bank;
- ➔ Bolstered sectoral coordination through continued support and secretariat services to the existing technical emergency sector groups: health, water and sanitation, emergency job creation, education, food and cash;
- ➔ Established a framework to address issues related advocacy for the rights of the civilian population and access for relief operators;
- ➔ Assessed needs in the areas of the Gaza Strip and the West Bank under siege and in areas particularly affected by military activity. The information/analysis generated was subsequently shared with humanitarian partners;
- ➔ Completed the hardship alleviation component of the World Bank/UNSCO-sponsored technical assessment whose publication is planned in December;
- ➔ Contributed to strengthening UNRWA' s capacity on flagging access issues of UN Agencies through the oPt by financing two posts within UNRWA's legal department;
- ➔ Launched the humanitarian publication Humanitarian Updates that reaches international humanitarian partners, but also Palestinian and Israeli audiences, contributing to information dissemination and analysis; and
- ➔ Led a joint contingency planning process among all actors.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Monitor the overall humanitarian situation in the oPt and continue to support UNSCO and UNRWA and through them the HTFEN, the West Bank and the Gaza Strip area task forces and the sectoral emergency groups.
- Conduct comprehensive needs assessments throughout the oPt and develop an inter-agency humanitarian action plan.
- Monitor the joint emergency preparedness plan and provide the relief community with regular vulnerability analysis.
- Continue to amass, analyse and systematically disseminate humanitarian information for planning or advocacy purposes.
- Support humanitarian partners, most notably UNRWA, in access-related activities.

REGIONAL DISASTER RESPONSE ADVISOR FOR SOUTHERN AFRICA

Regional Disaster Response Advisor for Southern Africa			
Planned Staffing	International	National	Total
Professional	1		1
National Officers		-	-
General Service		1	1
Total	1	1	2

Total Extrabudgetary Requirements	US\$	238,291
--	-------------	----------------

Angola, Malawi, Mozambique, Zambia and Zimbabwe.

Southern Africa witnessed a series of extensive floods and droughts in 2001. Heavy rains caused severe flooding in Angola, Malawi, Mozambique, Zambia and Zimbabwe, while long spells without rain in other areas of Mozambique, Zambia and Zimbabwe were parched by drought. Flooding in southern Angola added to the disruption caused by the civil war. In Malawi, 13 of the total of 27 districts were flooded and 130,000 people were displaced. When the rivers Shire, in Malawi, and Zambezi, in Zimbabwe, burst their banks, flood waters rose drastically in the four central and southern provinces of Mozambique. Although the Government of Mozambique and the UNCT were more prepared for this year's floods than for those of previous years, the consequences were nonetheless devastating: more than 500,000 people were affected, of whom more than 230,000 were displaced.

The need for more advanced national level contingency planning and greater regional cooperation became apparent during the floods, which pervaded much of the region this year. Attention should be directed to improving the regional capacity for monitoring meteorological and hydrological conditions and to developing expert information management. Achievement of these twin goals would pre-empt much of the flood damage otherwise likely to occur in the region in the coming years.

The Regional Disaster Response Advisor will work closely with the UN Country Team and the Government in Mozambique to review and update the existing contingency plan and further strengthen cooperation/coordination among partners involved in disaster response and response preparedness activities. In addition, OCHA will cooperate with UNDP in their capacity building project for Mozambique through the deployment of a contingency planning officer to work with the National Institute for Disaster Management (INGC). OCHA is seeking some US\$ 139,000 to cover support costs for expertise, equipment and resources for these contingency planning initiatives.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Foster existing regional cooperation to ensure effective disaster response to emergencies.
- Support the establishment of regional disaster management mechanisms, together with relevant governments and UN Agencies, to address the issue of disaster response.
- Provide technical assistance for the preparation and improvement of national and regional disaster management and contingency plans, by participating in damage and needs assessment, information management, response planning, coordination of relief operations and mobilisation of international relief resources (including the preparation of appeals).
- Lead and participate in disaster response coordination teams, such as UNDMT/UNDAC.
- In close cooperation with the UNDMT and the United Nations Disaster Management Training Programme, organise and/or participate in training activities, workshops, seminars and post-disaster analysis activities with a focus on natural disaster response and response preparedness at regional and national levels.
- Conduct or participate in post-emergency evaluations to review the effectiveness of response measures, identifying the gaps that need to be filled, and looking ahead at preventive approaches, together with governments, UNDP and other UN Agencies.
- Monitor the movements and needs of IDPs in the Southern Africa Development Community (SADC) countries, in close consultation with the UNHCR Regional Directorate for Southern Africa, based in Pretoria, South Africa.

REGIONAL SUPPORT OFFICE FOR CENTRAL AND EAST AFRICA

Regional Support Office for Central and East Africa			
Planned Staffing	International	National	Total
Professional	9		9
National Officers		1	1
General Service		14	14
Total	9	15	24
Total Extrabudgetary Requirements		US\$ 1,706,160	

Sudan, Uganda, DRC, Rwanda, Burundi, Tanzania, Ethiopia, Eritrea, Somalia, Kenya, as well as liaison functions for the Organisation for African Unity (OAU) and the Intergovernmental Authority on Development (IGAD).

Central and East Africa are affected by both man-made and natural disasters that have caused appalling levels of human suffering.

Until the end of 2001, OCHA maintained a regional office for the Great Lakes region and another for the drought in the Horn of Africa. Motivated by the need to improve the overall humanitarian response in the region and prompted by the call for a more consolidated structure by its humanitarian partners, OCHA decided to open the Regional Support Office for Central and East Africa (RSO-CEA).

The RSO-CEA will be based in Nairobi, Kenya, and will coordinate response to both natural disasters and complex emergencies, combining the activities of the Regional Office for the Great Lakes, the Regional Office for the Drought in the Horn of Africa and OCHA's Kenya field office.

The RSO-CEA will open in January 2002.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Liaise with the Special Representative of the Secretary-General for the Great Lakes region on political developments, and analyse their impact on humanitarian activities. Serve as a link between the Special Representative of the Secretary-General (SRSG), OCHA country offices and OCHA headquarters.
- Strengthen existing relationships with the Intergovernmental Authority on Development (IGAD), the OAU and other regional bodies.
- Maintain close cooperation with the DEPHA to ensure effective information exchange for countries in the region.
- Maintain a constant dialogue with donors and UN Agencies in order to refine analyses and reach a common understanding on humanitarian issues. Act as a donor liaison hub, complementing the donor relations role of the country offices.
- Update the humanitarian and donor community based in Nairobi on the humanitarian situation and on related developments in the region.
- Monitor and report on affected populations in the region (IDPs, refugees, unaccompanied children, etc.) providing a detailed picture of the humanitarian caseload in the region, in close cooperation with IRIN.
- Develop and coordinate the regional humanitarian strategy with concerned UN Agencies and other humanitarian organisations for production of the consolidated appeal for the Great Lakes region for 2003.

- Provide technical advice and support to country offices in the region on natural disaster management (damage and needs assessment, response planning, security procedures, coordination of relief operations, mobilisation of international resources, etc.). Prepare for immediate deployment to country offices in times of need.
- Develop regional early warning mechanisms and contingency planning in consultation with regional partners. Assist in defining and establishing early warning mechanisms at country and regional levels.
- Update the regional contingency plans for the Great Lakes region and the Horn of Africa if deemed necessary on the basis of the existing country contingency plans.
- Deploy a regional disaster response advisor to country offices in the event of a natural disaster in the region, and assist in organising UNDAC missions in response to a natural disaster.
- Develop a regional advocacy strategy in consultation with regional partners and with a view to complementing existing country strategies and activities.
- Design projects and fund-raising strategies to resolve regional issues adversely affecting two or more of the countries in the region simultaneously.
- Mobilise resources for OCHA country offices and for humanitarian operations in the region.
- Develop, schedule and programme joint UN-NGO missions throughout the region for interested donors.
- Organise three times a year regional workshops with staff from country offices in the region as a forum and training tool for OCHA staff.
- Provide information technology management and support on hardware, software, databases and mapping activities.
- Maintain a regional database (including mapping facilities) containing information including movements and locations, of affected populations, sectors and areas of activity of the different humanitarian actors, donor profiles and contacts, and the security situation in countries in the region.
- Ensure the harmonisation of OCHA country and regional databases.
- Provide day-to-day administrative, financial, personnel and logistical support to OCHA country offices in the region.

REGIONAL SUPPORT OFFICE FOR WEST AFRICA

Regional Support Office for West Africa			
Planned Staffing	International	National	Total
Professional	3		3
National Officers		-	-
General Service		2	2
Total	3	2	5

Total Extrabudgetary Requirements	US\$ 700,871
--	---------------------

Liberia, Guinea and Sierra Leone. Watching Brief: Benin, Burkina Faso, Gambia, Ghana, Guinea Bissau, Mali, Niger, Nigeria, Senegal, Togo, Cape Verde.

The West African region is still plagued by threats to peace and stability, even though great strides have been taken toward restoring democratic processes and upholding human rights. Compounding these threats are climatic changes manifested in natural disasters, including flooding and drought, and forced migration southwards from the Sahel, due to desertification and lack of cultivable land. The inter-relationships of the crisis, particularly among the countries of Mano River Union, have led to the establishment of a UN office for West Africa.

The OCHA Regional Support Office for West Africa, to be opened in 2002 in Abidjan, Côte d'Ivoire, will be closely linked to the UN Office for West Africa and will address the humanitarian and natural disaster issues in the region, with particular emphasis on devising preventive diplomatic policies for delicate humanitarian situations, smoothing the transition from relief to development and coordinating natural disaster response preparedness and emergency response activities in relation to natural disasters.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Establish an OCHA presence in Abidjan and collaborate closely with the UN Office for West Africa in Dakar, Senegal, the members of the Economic Community of West African States (ECOWAS) and its secretariat, other institutions such as the African Development Bank as well as academic and research institutions.
- Assist the Resident and Humanitarian coordinators in Guinea, Liberia and Sierra Leone in their efforts to coordinate the UN system, governmental, civil society and other partners in their response to humanitarian crises and in post-conflict transition.
- Liaise with the regional offices of the operational humanitarian agencies.
- Enhance stabilising the humanitarian situation in the Mano River Union countries by supporting the OCHA Field Offices in Guinea, Sierra Leone and Liberia.
- Help reduce the vulnerability of potential victims to disasters and armed conflict by addressing the root causes of instability.
- Develop, as appropriate, an integrated early warning, contingency planning and response preparedness strategy for latent crisis or post-conflict countries in the region.
- Provide communications and logistical support as well as advice to UNCTs and OCHA field offices in the region, whenever appropriate.
- Create a hub of communication and information sharing among partners so that relief and transitional efforts can be streamlined and consider cross-border issues, whether in response preparedness, monitoring of trends, or coordination of activities.
- Support overall fund-raising and public information needs in the region, through coordinated bilateral and donor contacts, supporting joint assessment missions, and providing training and technical support for the Consolidated Appeals Process.
- Strengthen the capacity of regional, inter-governmental and non-governmental institutions in promoting a culture of prevention and peaceful resolution of conflicts.

SIERRA LEONE

Sierra Leone			
Planned Staffing	International	National	Total
Professional	6		6
National Officers		8	8
General Service		31	31
Total	6	39	45
Total Extrabudgetary Requirements		US\$ 1,145,463	

Significant progress in 2001 in the peace process, particularly the disarmament and demobilisation programme, has altered the operating environment for humanitarian actors. Increased security within Sierra Leone has enabled the resettlement of some 45,000 IDPs. It has also permitted the delivery of essential humanitarian assistance and the commencement of recovery efforts in the North and East of the country, where little or no assistance had been provided for a number of years.

However, the deterioration of the situation in neighbouring Guinea and Liberia has led to the premature repatriation of Sierra Leonean refugees, who remain displaced within the country. Also, instability in Liberia has resulted in an influx of Liberian refugees. Hundreds of thousands of Sierra Leoneans still remain displaced, straining the scarce resources of those who host them. Adult and child ex-combatants, abducted women, war-wounded and amputees also require reintegration assistance. Another key focus of the humanitarian community will be community-based rehabilitation initiatives, to ensure the peaceful reintegration of all population groups.

Recovery and rehabilitation efforts will be contingent on the continued improvements in the political and security situation. The holding of free and fair presidential and parliamentary elections, scheduled for mid-2002, will be a critical factor in the political landscape of Sierra Leone, with potentially destabilising consequences for the peace process. The maintenance

of security will be contingent upon the continued presence of UN peacekeeping forces and expanded deployment and restructuring of the Sierra Leone army and police force. The reintegration of ex-combatants following their disarmament and demobilisation will also be a critical factor of ensuring the cessation of hostilities. The political, diplomatic, military and security developments amongst and within the Mano River Union countries will influence the humanitarian landscape in Sierra Leone, and will therefore need to be monitored closely.

In addition to its office in Freetown, OCHA has sub-offices in Kenema and Bo, the provincial capitals of the eastern and southern provinces respectively. Plans are underway to open an office for the North of the country in Makeni.

In order to mobilise and coordinate the efforts of the humanitarian community to meet the needs of the most vulnerable in a timely and integrated manner, OCHA field and sub-offices in Sierra Leone perform three main functions: field coordination, advocacy and information management. OCHA seeks to extend its coverage countrywide, as far as security conditions and access allow.

In 2001, following the appointment of a Deputy SRSG, OCHA also worked closely with UNAMSIL to support the further integration of the humanitarian and peace-keeping aspects of the international response.

In 2001, the OCHA field office and sub-offices in Sierra Leone:

- Coordinated inter-agency assessment missions in newly accessible areas under the leadership of the National Recovery Committee and its technical bodies;
- In partnership with the National Commission for Reconstruction, Rehabilitation and Resettlement (NCRRR), coordinated the provision of food, non-food and transportation assistance for the resettlement of more than 45,000 IDPs in areas declared 'safe for resettlement';
- Conducted a census of IDPs in camps nation-wide, providing accurate figures, demographic profiles and details of the original homes of IDPs;
- Established the SLIS in collaboration with UNHCR to support humanitarian agencies in information management, presentation and analysis. The SLIS produced and digitised a wide range of maps and databases, and produced a Sierra Leone encyclopaedia on CD-ROM, consolidating available maps, databases, policies and strategies, sectoral committee documents and photos;
- Coordinated the CAP including the preparation of the mid-year review, training workshop, stakeholders' consultation, preparation of the appeal document, local launch, press conferences and donor missions;
- Collected and disseminated information on the humanitarian situation in the form of situation reports, theme reports, press releases, updates, CAP documents and information analysis for the Secretary-General's report;
- Disseminated reports, briefs, newsletters, maps, policy documents and humanitarian contact details through the Humanitarian Information Centre. Implemented an effective civilian-military communication system through the provision of accurate security information and dissemination of information about humanitarian principles. Briefed newly arrived humanitarian personnel and provided facilities for inter-agency meetings and workshops;
- Supported the newly established post of Deputy Special Representative of the Secretary-General of the United Nations Assistance Mission in Sierra Leone (UNAMSIL) in order to ensure improved coordination and linkages between humanitarian interventions, peacekeeping and restoration of civil authority. The Deputy Special Representative of the Secretary General (DSRSG) is responsible for governance and stabilisation, combining the roles of HC, RC, UNDP resident representative and UN designated official for security; and
- Participated in a donor-UN conference held in Abidjan, Ivory Coast, in September 2001.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Strengthen the capacity of the NCRRR and line ministries.
- Identify critical gaps and articulate policies and strategies in collaboration with the NCRRR and other humanitarian actors.
- Implement the National Resettlement Programme and promote community rehabilitation programmes in areas of return.
- Promote human rights mainstreaming and codes of conduct.
- Enhance inter-agency and inter-sectoral assessment missions in newly accessible areas and standardise assessment methodologies, quality of data collection and analysis.
- Enhance local resource mobilisation and ensure better reporting to and from donors.
- Ensure effective contingency planning and emergency preparedness at the national level in coordination with sub-regional counterparts.
- Enhance inter-agency coordination structures among the provincial and national levels and strengthen the network of national and international NGOs, UN Agencies, donors and the Government of Sierra Leone.
- Enhance the range and quality of humanitarian, security, and political, quantitative and qualitative information.
- Act as a test case for a study on coordination and information sharing for West Africa.

SOMALIA

Somalia			
Planned Staffing	International	National	Total
Professional	3		3
National Officers		4	4
General Service		-	-
Total	3	4	7

Total Extrabudgetary Requirements	US\$	749,481
--	-------------	----------------

Following more than a decade of civil conflict, Somalia is in the midst of a complex political and economic transition. Over the past five years, local and regional administrations have been emerging in Somaliland, in the Northwest of the country, and in Puntland in the Northeast. The establishment of the Transitional National Government (TNG) in late 2000 has given new impetus to the extension of political reconciliation to Somalia's restive southern regions.

Nonetheless, Somalia's long history of predatory rule, asset stripping, drought and flooding has left hundreds of thousands of Somalis impoverished and displaced. Despite new opportunities for reconciliation, the past year's poor rains and deteriorating economic conditions have subjected an estimated 750,000 people to food insecurity, limited access to clean water supplies and regular outbreaks of cholera, measles, meningitis and other diseases.

OCHA supports the United Nations Coordination Unit (UNCU), a UNDP project based in Nairobi, Kenya, in facilitating relationships between UN Agencies and their donor and NGO partners in the Somalia Aid Coordination Body (SACB). This body develops strategic, inter-agency plans for the delivery of assistance to Somali communities and authorities. UNCU will be strongly influenced by the recent changes in the Somali context in its choice of strategies and priorities for the coming year.

In 2001, the OCHA field and sub-office in Somalia:

- Promoted sectoral strategy development and field-based coordination of aid operations in conjunction with NGO and donor partners in the SACB;
- Mobilised resources for both UN and NGO operations in Somalia through the CAP, UNDP Emergency Response Division and regular alerts to donors on food security and flooding;
- Undertook a national survey of internal displacement, identifying the numbers of IDPs, their locations and major factors in their vulnerability and protection;
- Hosted the Humanitarian Analysis Group (HAG), a monthly, inter-agency forum for key SACB partners to discuss humanitarian conditions across Somalia and identify key gaps and priorities for aid programming;
- Worked to enhance policy and operational coherence of UN Agencies, in conjunction with SACB partners, in response to new opportunities for peace building following the establishment of the TNG;
- Initiated a pilot coordination effort to move the UNCT for Somalia towards establishing a common country assessment (CCA) and UNDAF;
- Increased the number of field-based staff to monitor for humanitarian stress, and improve field-level communication and support for UN Agencies and NGOs;
- Supported the drafting of the second UN Human Development Report for Somalia, as a means of establishing key indicators to track changes in national humanitarian needs and development opportunities; and
- Facilitated more than 15 diplomatic, press and UN headquarters missions to raise the profile of Somalia in the international community.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Support the coordination efforts of the R/HC by providing advisory services and secretariat support to heads of agency meetings, chairing joint working group meetings, supporting the SACB Steering and Sectoral committees and facilitating field missions.
- Support, in conjunction with UNCU, local Somali efforts to construct representative governance structures and consolidate a durable and equitable national peace.
- Establish principles for aid engagement to enhance respect for principles of international law amongst Somali authorities to increase access and security for aid operations and raise standards of aid service delivery. Initial efforts will focus on preparing and reaching agreement with SACB partners regarding a policy framework for engagement in Somalia, followed by field missions and regional workshops to facilitate implementation.
- Identify and fill gaps in response to humanitarian needs and development priorities across the country, in association with UNCU, through a joint inter-agency action plan based on regular, in-depth field assessments. These will include regular monitoring of vulnerability by creating a common analysis of its causes and dynamics, through the strengthening of baseline knowledge, trend analysis and early warning. Monitor non-food security socio-economic factors and population movements. Coordinate the HAG and lead inter-agency field assessments.
- Enhance strategic coordination of aid activities to increase the efficient use of limited aid resources in a manner that will strengthen emergency prevention and preparedness while rebuilding the livelihoods of vulnerable groups. Efforts will focus on strengthening or establishing regional, field-based coordination mechanisms.
- Raise the profile of human rights and governance issues by mainstreaming concern for the protection of civilians, particularly IDPs and minorities. Efforts here will be coordinated to support the Office of the High Commissioner for Human Rights (OHCHR) and UNDP. Draft a strategy paper on protection and further documentation and advocacy to address the needs of IDPs.
- Improve inter-agency information management to ensure comprehensive and transparent reporting on UN and SACB activities in Somalia.
- Support integrated resource mobilisation and evaluation of aid delivery by identifying gaps in resources required to carry out the UN country strategy and recommending strategies for more participatory relations with both beneficiaries and donors.

SUDAN

(KHARTOUM AND NAIROBI)

Difficult humanitarian conditions persist in Sudan. Negotiations with the Government over access are fraught with difficulty and the humanitarian operating environment is deteriorating. The Government continues to restrict access by limiting visas while the Sudan Peoples Liberation Movement (SPLM) continues to require work permits and levy fees for services.

Food security improved in most areas of Sudan in the year 2001. However, conflict has intensified in northwestern Bahr El Ghazal, in the areas surrounding the oil fields in western and eastern Upper Nile, in eastern Equatoria, southern Blue Nile and the Nuba Mountains, diminishing the possibilities for civilian populations to secure an adequate livelihood. Many of these groups have been rendered highly vulnerable by years of instability.

Compounding the economic consequences of conflict, widespread human rights violations have continued. While some progress has been made by the international humanitarian community to address the protection needs of civilians, the promotion of humanitarian principles and of human rights remains a high priority.

The OCHA field offices for Sudan serve as the secretariat for the HC, based in Khartoum. A deputy HC for the South, who is also the UNICEF Chief of Operations for southern Sudan, is based in Nairobi, Kenya, to coordinate humanitarian operations in rebel-held areas, as part of a negotiated access agreement. The Deputy HC for the North is based in Khartoum, and is also the country director of WFP in Sudan. The HC is responsible for the overall supervision and direction of humanitarian operations, including policy formulation on the key issues of access, coordination, humanitarian principles and resource mobilisation. In addition, OCHA Sudan functions as a secretariat for the UN Secretary-General's Special Envoy for Humanitarian Affairs for the Sudan.

Under the supervision of the HC and the deputy HC for the North, OCHA Sudan maintains an office in the national capital, Khartoum, headed by the chief of OCHA Sudan. OCHA Sudan in Nairobi works under the direct supervision of the deputy HC for the South, and liaises closely with the chief of OCHA Sudan in Khartoum.

A network of OCHA field offices in key locations throughout Sudan, staffed by national field officers, completes the core strategic coordination support structure.

General Service		45	45
Total	6	58	64
Total Extrabudgetary Requirements		US\$ 1,847,034	

In 2001, the OCHA field and sub-offices in Sudan:

- Expanded assistance and protection programmes for IDPs in northern and southern Sudan, in both Government of Sudan and rebel-held areas, to ensure their safety, improving programming and investigating specific, long-term solutions to the problem, including local integration and resettlement;
- Maintained a structured dialogue with local authorities, aimed at ensuring adherence to humanitarian principles, as part of its programme for IDPs;
- Organised and undertook one needs assessment and delivered emergency response to populations in the Nuba Mountains;
- Proposed a four-day period of tranquillity each month throughout Sudan for immunisation purposes;
- Prepared briefings and facilitated donor missions and visits by high-level delegations from member states and the UN secretariat;
- Contributed to field-level coordination and facilitated the smooth flow of information between the northern and southern sectors; and
- Facilitated the meeting of the International Advisory Committee on Sudan held in Geneva in December 2001, in preparation of the fifth meeting of the Technical Committee on Humanitarian Assistance (TCHA), which is to be held in early 2002.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Enhance contingency planning to pre-empt or respond to possible famine, and persist in negotiating with the Government of Sudan for improved humanitarian access to Operation Lifeline Sudan (OLS) areas as well as to the Nuba Mountains and southern Blue Nile.
- Coordinate strategic implementation of humanitarian operations with the Government of Sudan, the rebel movements, UN Agencies and programmes, national and international NGOs and local counterparts, as appropriate.
- Act as a strong and well-managed secretariat for the Secretary-General's Special Envoy for Humanitarian Affairs for the Sudan, and for the HC and the deputy Humanitarian Coordinators for the Sudan, and provide all possible support for those offices.
- Promote to the maximum extent possible the uniform implementation of humanitarian operations in all areas of the Sudan in accordance with appropriate rules, regulations, and accepted practices and procedures.
- Act as a focal point for the development of humanitarian policies in respect of the Sudan, liaising with the offices of OCHA Geneva and OCHA New York as appropriate.
- Promote and manage comprehensive information systems in close collaboration with implementing agencies aimed at developing reliable early warning mechanisms, tracking key social indicators, improving programme monitoring and evaluation, and providing concise information on access and the operational environment.
- Lead in the promotion of a positive image of UN humanitarian operations amongst Government and counterparts and the general public in the Sudan, so as to build a constituency in support of humanitarian assistance.
- Continue to be the focal point in the annual needs assessment and the annual CAP for the Sudan. Building on the solid coordination foundations created over the past four years, OCHA will continue to play a leading role in analysing the impact of access denials and assisting the HC for the Sudan and the deputy HCs, as well as the Special Envoy, in pressing for improved access, especially to areas with acute emergency needs.
- Take a lead coordination role in Khartoum by convening UN liaison meetings, the UN Technical Team, the Humanitarian Aid Forum, quarterly strategy planning meetings, Emergency Response Team (ERT) meetings and ad hoc meetings on specific regions and sectors.
- Work closely with OLS in Nairobi and with the consortium Humanitarian Services and Coordination Unit (HSCU), by convening and contributing to coordination and information sharing meetings with NGOs and donors. The office will build on the critical relationship already established with the southern rebel movements for all issues related to humanitarian principles and humanitarian access.

UGANDA

Uganda			
Planned Staffing	International	National	Total
Professional	3		3
National Officers		1	1
General Service		4	4
Total	3	5	8

Total Extrabudgetary Requirements	US\$	642,095
--	-------------	----------------

There are 716,870 refugees, displaced persons and drought victims living under the constraints of camp life in Uganda. Some 11,110 abducted children are still missing. It is feared that they will not be recovered, in which case the current peace and assistance initiatives will come under threat. However, a political strategy promoting compromise and a combination of appropriate and well-targeted interventions, along with projects designed to move people out of shelters and into more satisfactory accommodation, could turn the situation around.

Several initiatives in 2001 aimed to reconcile internal differences and to seek more stable relations with neighbouring countries:

- ▶ The Government promulgated the Amnesty Act to encourage rebel forces to return and re-integrate;
- ▶ Ugandan troops were withdrawn from the DRC and re-deployed to enhance security in Uganda's four crisis-prone regions;

- ▶ Diplomatic relations between Uganda and Sudan were resumed;
- ▶ A Northern Uganda Social Action Fund (NUSAF) was established by the World Bank and Government to facilitate recovery in crisis areas; and,
- ▶ A donor technical group (DTG) on amnesty and recovery from conflict was formed, with support from OCHA, to coordinate transitional activities.

OCHA became active in Uganda in 1998 when the country was faced with several concurrent emergencies that exceeded local capacity and signalled a need for effective coordination. Since then, OCHA has continued to work closely with the Government of Uganda (GoU), UN Agencies, NGOs and bilateral aid missions to create a coherent framework within which each humanitarian actor can contribute effectively and promptly to reducing the adverse effects of recurrent calamities. .

In 2001, the OCHA field and sub-office in Uganda:

- Coordinated inputs from 40 Government departments, UN Agencies, NGOs and bilateral aid missions in preparing the common humanitarian action plan in the CAP for 2002;
- Established a comprehensive database on ongoing and planned humanitarian activities covering all districts, sectors, affected groups and agencies;
- Developed a Web site (www.ugandaaid.net) involving 72 agencies, to facilitate coordination and joint planning of humanitarian and development assistance through information sharing. Continued to produce the monthly Humanitarian Update for Uganda newsletter that provides stakeholders with an overview of the humanitarian situation in areas of conflict in Uganda;
- Re-activated District Disaster Management Committees and established sectoral groups in all 16 affected districts;
- Conducted district emergency preparedness and humanitarian coordination mechanism workshops in six districts in Rwenzori Region, five districts in northern Uganda, and six districts in the north-eastern region;
- Undertook surveys in all crisis areas to identify resource gaps, operational/policy constraints and lessons learned and to determine the extent to which SPHERE minimum standards were being met;
- Initiated and supported the preparation of contingency plans in all affected districts;
- Chaired meetings of the UNDMT, led numerous inter-agency assessment teams to affected areas, and compiled and disseminated situation reports locally and internationally;
- Participated actively in regular donor meetings, donor missions and Government fora to advocate on behalf of vulnerable groups, to shift assistance to marginalised and insecure areas, and mobilise support for priority needs;
- Acted as secretariat to the donor technical group on amnesty, recovery and conflict and convened/chaired regular Kampala-based, sector and area-specific coordination and planning meetings;
- Initiated the appointment of an HC for Uganda and supported the HC in his role as the direct representative of the ERC; and
- Established and co-located an OCHA sub-office with the Norwegian Refugee Council (NRC), WFP and the IOM in Gulu to provide much-needed field coordination support in northern Uganda. The office was staffed through secondment from NRC and shared telecommunications, transport and other facilities with other agencies.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Integrate activities with the early warning and disaster preparedness work of the vulnerability and assessment mapping (VAM) unit, established jointly by WFP, Oxford Policy Management (OPM), the United Kingdom Save the Children Fund (SCF), Famine Early Warning System (FEWS) and IOM. Maintain regular networking between field offices in the 16 emergency-prone districts of Uganda and their respective main offices in the capital, and donor missions.
- Convene workshops with UN Agencies, NGOs, Government offices and donors, and incorporate the information gleaned into updated contingency and operational plans.
- Initiate and organise inter-agency field assessment missions.
- Commission an IDP study on decongestion of protected villages and on the institutional, financial and procedural requirements for resettlement, reintegration and recovery in collaboration with the GoU and Makerere University, UN Agencies, NGOs and community and religious leaders.
- Coordinate the formulation of the Consolidated Appeal (CA).
- Support District Disaster Management Committees in evaluating and preparing inventories of on-going and proposed interventions and financial gaps. This process will be strengthened through the participation of a representative of the Office of the Prime Minister (OPM) in order to link the activities of the districts with central Government.
- Promote a principled approach to operations through advocacy, public disclosure and negotiation; intervene to ensure continuous, unimpeded access to affected groups; obtain consensus on basic principles and ground rules for humanitarian engagement; advocate for inclusion of women in the planning process; and promote transitional programming from relief assistance to support for resettlement, repatriation and reconstruction.
- Manage an emergency response fund on behalf of donors, ensuring rapid dispensation of funds to NGOs for sudden emergencies.
- Maintain the "UgandaAid" inter-agency Web site providing instant access to Uganda-specific information.

Photo: OCHA, April 2001. IDP Camps in Afghanistan.

--	-------------	--------------

* The immediate requirements for the crisis in Afghanistan, totaling US\$ 14 million, are reflected in the revised six-month donor alert, covering the period from 1 October to 31 March 2002. OCHA will present 2002 needs at a donor meeting in Tokyo in January.

The deteriorating situation in Afghanistan following the events of 11 September 2001 has accentuated a humanitarian crisis of potential catastrophic proportions. In response to the dramatic escalation of the crisis inside and around Afghanistan, the Emergency Relief Coordinator appointed the UN (Resident and Humanitarian) Coordinator as Regional Humanitarian Coordinator (RHC) for the Afghan crisis. In this capacity, he is responsible for coordination in an integrated and regional manner, covering Afghanistan, Iran, Pakistan, Tajikistan, Turkmenistan and Uzbekistan. The RHC is based in Islamabad and reports to the Emergency Relief Coordinator. He is supported by a substantial number of OCHA staff working in a wide array of functions both within Afghanistan and in neighbouring countries.

On behalf of the United Nations system, the UN Coordinator's Office consults with Afghan authorities and with neighbouring and other concerned states about humanitarian assistance to the country. It seeks to secure, through appropriate channels, access to affected populations and protection of humanitarian personnel, and remains the main vehicle for coordination of humanitarian assistance inside Afghanistan.

Through the Mine Action Programme for Afghanistan (MAPA) the Office coordinates and manages mine clearance and awareness activities in one of the largest and most successful mine action programmes ever launched by the UN system. Furthermore, OCHA extends common services to the UN and NGO community through the provision of a communications network. Through a small-scale emergency programme and regional initiatives, it also responds to urgent humanitarian needs in sudden onset disasters or emergencies.

The office leads the preparation of the annual appeal, which covers humanitarian assistance and immediate recovery needs (which included the preparation of Donor Alerts following the events of 11 September) within the context of the Principled Common Programming (PCP) approach and reports on its progress and achievements. It ensures effective liaison between the UN, donors and NGOs participating in the assistance programmes, and furthermore serves as the secretariat to the Afghan Programming Body (APB) (a joint forum of the UN, NGOs and donor representatives). OCHA publishes regular Afghanistan situation updates highlighting humanitarian needs, responses and key issues and concerns. In addition, it leads inter-agency contingency and operational planning exercises.

In view of the security situation in Afghanistan, the UN Coordinator's main office is temporarily located in Islamabad, as are the Afghanistan programme offices of the UN. As conditions allow, the office and staff are moving to Kabul and other parts of Afghanistan. The seven UN Regional Coordination Offices in Afghanistan, located in Kabul, Mazar-i-Sharif, Herat, Kandahar, Jalalabad, Faizabad and Bamyan, form an essential part of the overall coordination structure. The turbulent nature of the crisis has necessitated a flexible and adaptive approach to supporting humanitarian action inside Afghanistan. It is expected that the situation will remain volatile throughout much of 2002, and that continued flexibility will be vital.

In order to support the coordination requirements of the countries neighbouring Afghanistan, OCHA deployed - in the early stages of the crisis - Humanitarian Affairs Officers to Tehran, Ashgabad, Tashkent and Dushanbe. These officers have been assisting the respective UN Resident Coordinators in key areas including: emergency preparedness, assessments, donor / Government / NGO liaison, establishment of coordination structures and information gathering, analysis and dissemination.

In 2001, OCHA:

- Coordinated emergency operational support in response to the displacement of civilian populations caused by renewed conflict in the central and northern regions of Afghanistan and also by the constraints imposed by drought;
- Coordinated and managed mine action activities, including mine clearance, training evaluation, and mine surveys and mine awareness. Since the inception of the programme, over 400 square (sq). kilometre (km) of mined and battlefield areas have been cleared and a further 55 sq. km marked and surveyed in preparation for subsequent clearance. A total of 5.4 million Afghans have been provided with mine awareness training;
- Acted as a focal point for UN assistance policy development in Afghanistan and as the motor for collaborative programming in response to the humanitarian crisis. This has included taking the lead on issues of principle such as the UN / NGO joint efforts to respond to edicts issued by the Taleban authorities;
- As part of its coordination activities, supported regional coordination through its regional coordination offices (also when these offices were relocated to neighbouring countries), facilitated activities designed to support the Principled Common Programming system, funded small-scale emergency activities, provided logistical support to all UN Agencies and NGOs through aircraft services and a 24-hour communications networking system, assisted in the establishment of the UN Joint Logistics Centre, and provided and maintained an essential security framework for all UN operations in Afghanistan;
- Supported the Regional Humanitarian Coordinator in leading the response to the crisis in Afghanistan;
- Supported the strengthening of the offices of the Resident Coordinator in Uzbekistan, Tajikistan, Turkmenistan and Iran in response to the regional ramifications of the crisis in Afghanistan;
- Played a pivotal role in the provision of value-added information on the crisis through, inter alia, the issuance of regular updates and reports, press briefings, and the establishment of the Humanitarian Information Centre for Afghanistan (HICFA);
- Played a leading role in a number of key planning and resource mobilisation exercises (e.g. Regional Contingency Plan, 30 Day Operational Plan and Donor Alerts);
- Provided guidance and support for coordinated action on human rights and protection related issues.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

At the time of writing, the shape of the UN Assistance Mission in Afghanistan was undecided. It is anticipated that the UN Coordinator's Office will be an integral part of the mission. The activities of OCHA within the framework of the UN mission will remain central to the coordination of assistance activities in Afghanistan. Priority will be given to the re-establishment of coordination capacity inside Afghanistan. The Office will:

- Support the Regional Humanitarian Coordinator in promoting and ensuring consistent and coherent responses by the humanitarian community in Afghanistan and for Afghans in neighbouring countries.
- Strengthen the capacity of the Regional Coordination Offices inside Afghanistan in order to facilitate coordination of assistance across all critical sectors.
- Re-establish an integrated communication network to support the security of all humanitarian operations.
- Re-establish and strengthen dialogue between the authorities and the aid community to secure safe access to the most vulnerable.
- With the support of the Humanitarian Information Centre and the United Nations Joint Logistics Centre (UNJLC) collect, collate and disseminate information on humanitarian needs, resources, transport movements, distributions and other responses;
- Expand mine awareness, survey and clearance activities.
- Advocate respect for human rights and protection of civilians, and promote rights-based programming.
- Continue its support to the offices of the Resident Coordinators in Uzbekistan, Tajikistan, Turkmenistan and Iran, in response to the regional impact of the Afghan crisis.
- Form appropriate links with the planned UN Assistance Mission in Afghanistan and UN-mandated multinational force on issues of mutual concern.
- Work with development partners, both international organisations (IO) and NGOs, to ensure that the humanitarian-rehabilitation-recovery linkages are addressed in any future reconstruction plan.

DEMOCRATIC PEOPLE'S REPUBLIC OF KOREA

Democratic People's Republic of Korea

Total Extrabudgetary Requirements	US\$	329,149
--	-------------	----------------

Despite the optimism of the international community in the immediate aftermath of the June 2000 inter-Korean summit, changes have been slow within the country. The dissipation of donor enthusiasm and lack of development investments have resulted in a continued and precarious humanitarian situation. Data indicates that extreme food insecurity continues to be a source of great concern for many of the most vulnerable in the country. The average life expectancy, according to Government reports in 2001, has fallen to 66.8, a decrease of 6.4 years since 1993. The conditions which led to the current humanitarian crisis are still evident:

- ▶ The food supplies gap of more than one million metric tons continues. Unless the Government achieves food security through commercial imports and increased domestic food production, only generous food-aid contributions can prevent a major famine.
- ▶ A total of 2.2 million children under the age of five, especially those under two, are at high risk of dying from a combination of chronic malnutrition, low birth weight, high disease burden and inadequate growth and development.
- ▶ Some 450,000 pregnant and lactating women suffer from poor health and nutritional status, and the maternal mortality rate is increasing. An estimated four million school-age children, some of whom suffer from chronic malnutrition, are faced with poor health and reduced learning capacity.

- ▶ The entire population of approximately 23 million people has cross-cutting vulnerability caused by inadequate food availability. Poor quality and limited access to basic health, water, sanitation, and education services compound this vulnerability.

The OCHA office was established in 1997. Its tasks primarily involve monitoring and coordinating relief needs and efforts, establishing joint planning procedures, developing joint dialogue with Government and donors, and supporting strategy development for transitional programmes.

The humanitarian programme is a targeted but limited short-term measure to meet basic needs. It provides food aid and social sector support (health, water, sanitation and education).

In order to address immediate needs, the CHAP has been used by OCHA and the UN system and NGOs as an integrated planning tool to coordinate with in-country bilateral organisations. The humanitarian development working group, chaired by the HC, ensures that the limited resources available are targeted at those most at risk. The group advocates for ongoing monitoring and evaluation and, where necessary, oversees adjustments to the strategic plan during the implementation phase. OCHA manages the NGO funding mechanism, which provides fast response small-scale grants for projects to be implemented by NGOs. The main aim of the fund is to provide bridging support to NGOs and also to fund new and innovative projects that emphasise capacity building of successful local coping mechanisms.

Government interaction with the humanitarian community has improved in the course of the year, but access to certain geographic areas is still a matter for negotiation.

In 2001, the OCHA field office in DPRK:

- Supported regular inter-agency coordination through the inter-agency meetings and sectoral working groups on food aid, health, food security, and water and sanitation. Established a thematic working group on gender issues;
- Worked closely with the humanitarian community and the Government on strategic planning and implementation through the CAP, with a particular focus on the mid-term review and elaboration of the consolidated appeal for 2002;
- Continued advocacy and liaison with the Government on humanitarian issues;
- Assisted and supported NGOs through an NGO funding mechanism, attending the NGO conference in Seoul, Republic of Korea, and regularly consulting resident NGOs;
- Promoted regular interaction with donors and media in Beijing, China; and
- Continued work on the establishment of an information database for use by the humanitarian community in the country and improved complementarity of activities between resident humanitarian organisations and non-resident humanitarian actors, in particular regional NGOs and bilateral donors.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Support the HC, to ensure coordination of assistance by the UN system.
- Support planning and monitoring of the CAP, and advocate for response to the CAP.
- Provide donors and other interested parties with information on the in-country humanitarian situation, with sectoral highlights, through regular OCHA bulletins, as well as donor briefings in Beijing, China. A humanitarian information centre is planned for pooling and dissemination of humanitarian information.
- Continue operation of the NGO funding mechanism in support of implementation of quick-response programmes by in-country NGOs, and encourage participation of non-resident NGOs through networks.
- Assist the Government in capacity-building activities relating to the ongoing natural disasters experienced on the Korean peninsula.

INDONESIA

Indonesia			
Planned Staffing	International	National	Total

National Officers		5	5
General Service		34	34
Total	8	39	47
Total Extrabudgetary Requirements		US\$ 1,572,301	

Indonesia is a large and diverse country, with a population of over 200 million, stretching over three time zones and populated by disparate ethnic groups. In recent years, the country has experienced a number of ethnic, economic and religious conflicts in addition to calls by some regions for independence. As a result of these conflicts many people have been killed or injured, or forced to flee their homes. Seven different regional conflicts have erupted in the provinces of Aceh, West and Central Kalimantan, East Java, Maluku and North Maluku, and Central Sulawesi. The quest for independence of the former province of Irian Jaya, now Papua, has also been accompanied by violence.

Indonesia is also a country prone to natural disasters given its geographic location, with the Indonesian Archipelago forming part of the Pacific "ring of fire". Indonesia has 129 active volcanoes, ten of which are on 'alert' status, and is regularly hit by floods, hurricanes, earthquakes and forest fires.

During 2001, OCHA's involvement in Indonesia expanded beyond the support of UN activities in West Timor, and to the displaced populations as a result of the Maluku crisis, to other areas of needs in the country. In addition to the two UN resource centres situated in Ternate (North Maluku Province) and Ambon (Maluku Province), OCHA opened a resource centre in Aceh to maintain a UN presence in the province. Specific tasks include coordination, monitoring and reporting on humanitarian needs and activities, including contingency planning. In 2002 OCHA will increase these coordination activities, in collaboration with the Government of the Republic of Indonesia (GoRI) to pursue durable solutions for IDPs, and to promote contingency planning, advocacy and early-warning assessments.

In 2001, the OCHA field and sub-offices in Indonesia:

- ➔ Coordinated the preparation of a consolidated appeal for IDPs in Indonesia;
- ➔ In cooperation with the Government of the Republic of Indonesia and the UN Agencies concerned, prepared a joint plan of action for West Timor to support voluntary repatriation and provide assistance to persons who elect to remain;
- ➔ Established a UN resource centre in Aceh;
- ➔ Led, participated in and facilitated UN Agency needs assessment missions to several affected areas;
- ➔ Responded to natural disasters;
- ➔ Gathered news and consolidated/disseminated information to relevant humanitarian actors and to HQ to coordinate and mobilise appropriate assistance and funding; and
- ➔ Assisted and advised donors on the choice of activities and organisations to be funded.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Expand its early warning capacity to serve the humanitarian community with systematic collection and updating of relevant data, with the appointment of a data management officer.
- Monitor, prepare and mobilise resources to a greater degree, to help prevent or mitigate potential crises or conflicts.
- Follow up on contingency planning initiatives, as carried out in Aceh and Central Sulawesi, in the newly autonomous region of Papua. The involvement of central and provincial government representatives in contingency planning has greatly enhanced its value and credibility.
- Initiate, participate or lead inter-agency assessments in various fields including security and logistics, as well as addressing sectoral needs of the beneficiary population (food, nutrition, health, water and sanitation, education, shelter). Based on information collected, OCHA will help identify imbalances and gaps in response.
- Produce regular humanitarian situation reports and analyses on needs, responses and issues of concern. This will be complemented by regular briefings to the international community on the humanitarian situation.
- Act as a catalyst for relief operations following any sudden onset emergency. In consultation with, and in support of, the national authorities, OCHA will ensure coordination and cooperation between national and international organisations. It will also facilitate the distribution of humanitarian assistance in response to natural disasters.
- Initiate, prioritise and coordinate the process of developing humanitarian assistance strategies.
- Lead the preparation of consolidated humanitarian action plans and appeals.
- Monitor funds and resources for appeals and facilitate additional resource mobilisation efforts for prioritised activities.
- Adhere to Guiding Principles on Internal Displacement and ensure that Government policies for IDPs are implemented with due regard to these principles.

REGIONAL DISASTER RESPONSE ADVISOR FOR ASIA

Regional Disaster Response Advisor for Asia

Planned Staffing	International	National	Total
Professional	4		4
National Officers		1	1
General Service		2	2
Total	4	3	7

Total Extrabudgetary Requirements **US\$ 894,168**

Bangladesh, Bhutan, British India Ocean Territory, Brunei Darussalam, Cambodia, China, Cocos (Keeling) Islands, East Timor, India, Indonesia, Japan, Republic of Korea, Democratic People's Republic of Korea, Lao People's Democratic Republic, Malaysia, Maldives, Mongolia, Myanmar, Nepal, Pakistan, Philippines, Singapore, Sri Lanka, Taiwan; Province of China, Thailand, Vietnam.

The year began with the tragic death of nine people, including four UN personnel, in a helicopter crash in the North of Mongolia. Among them were Sabine Metzner-Strack and Gerard Le Claire of OCHA.

More natural disasters struck Asia in 2001 than any other continent. These included consecutive dzuds or winter disasters in Mongolia, a devastating earthquake in India, serious floods in Vietnam, Cambodia and Bangladesh, and a volcanic eruption in the Philippines. In the first ten months of the year natural disasters killed 20,871 people and affected 57.8 million others in the region. Economic losses resulting from natural disasters in Asia amounted to approximately US\$ 9.4 billion. Unlike the previous year, only one request for UN system-wide relief assistance was made, in this case by the Mongolian Government in the event of the dzud disaster. UN Agencies responded individually to the different disasters, and the OCHA Office of the RDRA for Asia devoted its attention to promoting shared efforts in disaster response preparedness.

The OCHA Office of the RDRA for Asia opened in December 1999 with the support of the Government of Japan and is based at the ADRC in Kobe. It supports the coordination functions of RCs, UNDMTs and governments in disaster preparedness and response. The office plays a proactive role in creating networks and supporting dialogue and standardisation between stakeholders in the field of natural disasters throughout East Asia, South-East Asia and South Asia. To strengthen UN and national response preparedness in disaster prone countries in Asia, the RDRA's office in Kobe will be reinforced by two international staff. OCHA intends to establish an RDRA post in New Delhi during 2002 to cover South/Central Asian countries.

OCHA will provide one officer in East Timor for part of 2002, to provide technical support. Considering the frequency and the magnitude of natural disasters in Asia, OCHA has placed two national staff in India. They provide technical and monitoring assistance, report on past disasters, and support the UN Resident Coordinators and the UNDMT.

In 2001, the OCHA office of the Regional Disaster Response Advisor for Asia:

- Carried out disaster response missions to Mongolia and disaster preparedness missions to Nepal, Bangladesh, Sri Lanka, Cambodia, Pakistan, Singapore, the Philippines, India and Estonia;
- Oversaw the organisation of a consultative meeting on regional cooperation in the field of natural disasters. The meeting was funded by the ADRC and supported by the USAID/OFDA. It was attended by participants from UN Agencies, regional organisations, donors and NGOs. A joint statement was issued with the support of UN Agencies and government officials from Bangladesh, Cambodia and the Philippines, which formed the basis for a draft concept paper on a total risk management approach to natural disasters and pilot country inventories on needs and capabilities.
- Consolidated official partnerships with disaster focal points, regional advisors from UN Agencies, government officials in 16 natural disaster-prone countries in the region, five regional organisations and IFRC delegates and NGOs in disaster-affected countries;
- Supported NGO initiatives in humanitarian relief activities and promoted the planning of a regional NGO meeting which will take place in February 2002;
- Organised a UNDMT workshop in Cambodia, advanced preparedness in Nepal, assessed the situation in Pakistan and prepared for relief assistance in the Philippines;
- Disseminated monthly highlights bulletins and daily situation reports on natural disasters; and
- Briefed UNDMTs, government officials and NGOs, in six separate presentations, on the tools and mechanisms available through OCHA for disaster response, and encouraged government officials to participate in the UNDAC and INSARAG systems.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Promote greater regional coordination and a total risk management approach to natural disasters.
- Organise activities for skills training in disaster information management, disaster and needs assessment and coordination, in close cooperation with ADRC and OCHA's ReliefWeb office in Kobe.
- Ensure timely support to RCs, UNDMTs and national governments in the organisation of disaster and needs assessment and assistance.
- Provide technical assistance in national capacity building in disaster management, including information management, response and coordination.
- Collect and disseminate monthly highlights bulletins on major disasters in the region, best practices in disaster response and response preparedness, and major events/initiatives regarding natural disasters.
- Consolidate networking with national authorities and regional organisations in disaster response preparedness through participation in and organisation of regional meetings, seminars and workshops, and through involvement in the activities of ADRC and its network in the region.
- Continue to disseminate information on OCHA's existing tools and mechanisms in disaster response, and to encourage government officials to participate in the UNDAC and INSARAG systems.
- Advocate the total risk management approach to natural disasters in cooperation with ADRC, Asian Disaster Preparedness Centre (ADPC) and USAID/OFDA.
- Oversee the organisation of a second consultative meeting on regional cooperation in the field of natural disasters, to be held in May.

REGIONAL DISASTER RESPONSE ADVISOR FOR THE PACIFIC

Regional Disaster Response Advisor for the Pacific			
Planned Staffing	International	National	Total
Professional	1		1
National Officers		-	-
General Service		1	1
Total	1	1	2

Total Extrabudgetary Requirements	US\$ 212,301
--	---------------------

American Samoa, Australia, Canton and Enderbury Islands, Christmas Island, Cook Islands, Fiji, French Polynesia, French Southern Territories, Guam, Heard and Macdonald Islands, Johnston Island, Kiribati, Macao, Marshall Islands, Micronesia, Midway Islands, Nauru, New Caledonia, New Zealand, Niue, Norfolk Island, Northern Mariana Islands, Palau, Papua New Guinea, Pitcairn Islands, Samoa, Solomon Islands, Tokelau, Tonga, Tuvalu, U.S. Minor Outlying Islands, Vanuatu, Wake Island, Wallis and Futuna Islands.

The year 2001 was relatively calm in the Pacific in terms of natural disasters, reflecting the prolonged but weakening La Niña phase. Tropical Cyclone Paula, at the end of February, was one of the more damaging events, adversely affecting Vanuatu and Fiji. Tropical Cyclone Sose struck the same islands of central and southern Vanuatu just five weeks later. Samoa also experienced flash flooding caused by an unusually heavy thunderstorm in April. Outer island communities in Vanuatu were again affected by the eruption of Lopevi Volcano in June.

Politically, the year saw a gradual return to normality after the coups and civil strife in Fiji and Solomon Islands in 2000. Fiji's return to democratic government was not without setbacks, but the conflicts are being resolved largely in the courts and through public debate, rather than by recourse to the lawlessness of the previous year.

The UN played a prominent role in this process by observing the general election in September. In Papua New Guinea, the situation in Bougainville continued to improve as the Government and secessionist leaders agreed a substantial autonomy package for the province. However, in June a student protest against IMF-backed economic reforms ended in bloodshed.

Recovery was most tenuous in Solomon Islands. Sporadic clashes between armed groups, assassinations of political and militia leaders, and the theft of weapons that had formerly been surrendered, all threatened to overturn the Townsville Peace Agreement. Although the 30,000 people displaced the previous year had returned to their original communities, their difficulties were exacerbated by the drastic shrinkage of the national economy and the collapse in government revenue, which forced the closure of many public services including health posts

and schools. The country suffers endemic law and order problems and the Government has been unable to muster enough international assistance to tide the country over till the peace process is more entrenched.

In 2001, the OCHA office of the Regional Disaster Response Advisor for the Pacific:

- Took part in the United Nations Fijian Electoral Observation Mission (UNFEOM);
- Acted as a resource for a UN system disaster management workshop and the common country assessment for Papua New Guinea;
- Actively participated in the UNCT and security management team (SMT) in Fiji, and maintained effective working relations with the RCs and UNCTs in Papua New Guinea and Samoa;
- Acted as focal point for UNDAC in the Pacific and carried out preparatory work for the UNDAC Pacific Refresher Course – 2002;
- Promoted the INSARAG in Pacific island countries.
- Co-organised a major regional workshop entitled “Building Safer Urban Communities in the South Pacific”, with the South Pacific Applied Geoscience Commission (SOPAC);
- Lent assistance to national disaster management offices (NDMOs) in Fiji and Tonga in conducting their national Disaster Awareness Week public advocacy campaigns;
- Supported a field assessment and coordination team (FACT) course run by the International Federation of Red Cross and Red Crescent Societies for the region; and
- Conceptualised a strategic planning meeting for OCHA units working in Asia and the Pacific (to be held in early 2002).
- Participated in the UNDAC emergency mission to Mongolia, following the tragic death of four team members in a helicopter crash, and preparation of an appeal for international assistance for the Mongolian dzud, or winter disaster;

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Respond to natural disasters and complex emergencies as they arise, and report on use of international relief funds channelled through OCHA to Pacific countries affected by disasters or emergencies.
- Cooperate with the Joint UNEP/OCHA Environmental Unit on monitoring emergencies with potential for adverse environmental impact.
- Lead or participate in UNDAC missions in Asia and the Pacific and improve the effectiveness of the UNDAC system in the Pacific through support to the network, membership, equipment and training at regional level.
- Encourage INSARAG membership in Pacific countries.
- Ensure strategic coherence between OCHA's numerous initiatives in the region.
- Participate in the common country assessments of the most vulnerable Pacific island countries, and advocate disaster preparedness concerns in the UNDAF for these countries.
- Work with RCs and UNCTs to strengthen their capacity to respond to emergencies.
- Assist in developing national emergency operation centres, through advice on information systems and standard operating procedures, and provide relevant training.
- Refine and promote the regional approach to post-disaster damage assessment and needs analysis in select Pacific Island countries.
- Continue to support the SOPAC disaster management programme.

TAJIKISTAN

Tajikistan			
Planned Staffing	International	National	Total
Professional	2		2
National Officers		-	-
General Service		5	5
Total	2	5	7
Total Extrabudgetary Requirements		US\$	396,393

The evolving peace process, combined with positive economic indicators has improved humanitarian conditions in Tajikistan. There is also notable progress in human rights and in overall security. However, structural vulnerabilities resulting from years of strife have been compounded by low development investment and the combined damage caused over the last two years by drought and floods.

Overall the country presents three main challenges to the humanitarian community:

- ▶ The delicate transition from relief to development, which is hindered by proliferation of small arms and continued tension between former warring parties;
- ▶ The combined effects of natural disasters and complex emergencies; and,
- ▶ The instabilities in the region, particularly in Afghanistan.

- ▶ The Government of Tajikistan has begun to address the poor standard of social services and the incapacity of parts of the population to obtain adequate livelihoods, by introducing a three-year public investment programme, and initiating a poverty reduction strategy.

The OCHA field office in Tajikistan is located in Dushanbe. Under the leadership of the R/HC in Tajikistan, OCHA supports the UNCT in coordination of humanitarian efforts. Since September 2001, the Tajikistan office has been active in supporting the massive emergency relief delivery efforts to Afghanistan. In 2002, the office will continue to enhance coordination between humanitarian and rehabilitation efforts, assess emerging needs, and identify gaps and ways to avoid overlap in programmes. In addition, OCHA will collect, analyse and disseminate information on Tajikistan and contribute to regional coordination efforts related to the Afghanistan crisis.

In 2001, OCHA field office in Tajikistan:

- Coordinated the drafting and preparation of the Consolidated Appeal for 2002 involving many partners;
- Arranged a CAP training workshop and produced a donor alert to raise awareness among the donor community about the under-funding of the CAP 2001;
- Began the system of collating and disseminating monthly updates;
- Provided briefings and reports to HQ, diplomatic, media and donor missions assisting an average of two donor delegations per month;
- Contributed to overall regional reporting and coordination and contingency planning vis-à-vis Afghanistan to the Regional Coordinator's office, and supported to cross border deliveries;
- Established and fostered regular coordination mechanisms among UN Agencies, IOs and NGOs, and with the relevant Government departments;
- Participated in the second meeting of the consultative group for Tajikistan together with the Tajik President, the R/HC and the RSG;
- Established a comprehensive database of NGO/IO/UN activities in Tajikistan, covering both emergency relief assistance and development projects; and
- Supported natural disaster and sudden-onset emergency assessments, response and contingency planning through inter-agency missions and by establishing the REACT.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Improve coordination within the international community in Tajikistan to create a synergy between the peace-building strategy and the humanitarian objectives outlined in CAP 2002.
- Continue to analyse and make available the existing database, and disseminate information on a regular basis among donors, HQ and the community at large through regular updates, briefing notes assessment reports. OCHA will also continue to contribute to the reporting on the humanitarian situation in Tajikistan through IRIN.
- Improve coordination with the Government. Encourage the Government to introduce/establish a focal point to address in a comprehensive manner all issues related to incoming international humanitarian assistance.
- Facilitate regional coordination of information and contingency planning, in particular in view of the crisis in Afghanistan, and the volatile situation in the Ferghana Valley.
- Continue facilitating through REACT inter-agency missions to areas affected by drought or natural disasters.
- Improve advocacy and resource mobilisation – OCHA will continue to provide updated information and arrange regular briefings for donor representatives based in Dushanbe, Tashkent, Bishkek and Almaty in order to raise awareness of the needs and requirements of Tajikistan. In view of this, OCHA will arrange and coordinate visits by donor and media representatives to various parts of the country.

EUROPE

Photo: OCHA 2001. Yakutia, Russia. Results of floods.

OCHA works in many regions of the world that are affected by both natural disasters and complex emergencies. With a wide array of bilateral and multilateral partners, OCHA responds to both types of emergencies.

GEORGIA

Georgia			
Planned Staffing	International	National	Total
Professional	2		2
National Officers		2	2
General Service		8	8
Total	2	10	12
Total Extrabudgetary Requirements		US\$	545,092

Little progress was made during 2001 in efforts to achieve a political settlement in Georgia's two areas of unresolved conflict, Abkhazia and South Ossetia. UN-sponsored talks between the Georgian and Abkhaz parties were cancelled on three occasions due to increased tension. In October, hostilities resumed in the Kodori Valley and a United Nations Mission in Georgia (UNOMIG) helicopter was shot down, killing nine people. These incidents and setbacks to the political process further complicated the work of humanitarian organisations in an already difficult security environment.

Similarly, the situation in western Georgia for as many as 250,000 IDPs remains difficult, with little hope for return until the political confrontation is resolved. In eastern Georgia, the Pankisi Valley remains a point of instability. Throughout the country, the weak economy, irregular energy supply, corruption, and lack of social safety net all create humanitarian risk.

The OCHA field office in Georgia is located in Tbilisi and OCHA has two sub-offices in Sukhumi and Tskhinvali. Despite some progress, a large portion of the population remains in need of assistance due to continuing economic problems, displacements from unresolved conflicts in Abkhazia and South Ossetia, poor weather conditions in 2000 and 2001, regional instability and political uncertainty. The local NGO sector relies almost entirely upon international support, and special efforts are needed to avoid gaps in humanitarian assistance while many donors and NGOs are downsizing their humanitarian portfolios in favour of longer-term development assistance.

The OCHA field and sub-offices in Georgia are structured to address remaining humanitarian needs and facilitate the transition to development programming. Through its presence in the conflict areas as well as regular field visits to regions with large IDP concentrations and ethnic minorities, OCHA facilitates information exchange, advocacy efforts to address gaps, and more effective responses to the overall humanitarian and transitional situations.

In 2001, the OCHA field office and sub-offices in Georgia:

- Assisted in drought response through meetings with the Government, donors and the aid community, production of eight special bulletins, administrative and logistical support to FAO for its spring 2001 seed-distribution programme, rapid assessments of the consequences of the poor harvest due to the drought, and participation in a joint Government, UN Agency, donor and NGO task force and working group to develop a potential response strategy for spring 2002;
- Continued to act as secretariat to the new approach, conditionally approved two projects in the first pilot round of the Georgian Self Reliance Fund (GSRF) and launched a second round;
- Facilitated field coordination and information sharing amongst UN Agencies, the ICRC, NGOs and donors;
- Published and disseminated a quarterly directory of humanitarian contacts (the most popular item downloaded from the www.assistancegeorgia.ge Web site), thrice-monthly information bulletins and quarterly regional briefing notes (in English, Georgian and Russian);
- Facilitated donor and humanitarian agency visits to conflict areas, and continued to issue neutral humanitarian ID cards for personnel working in the conflict zones;
- Supported contingency planning, including early warning and the UNDMT;
- Advocated for unimpeded access and enhanced field security for humanitarian assistance activities in South Ossetia and Abkhazia;
- Worked with local and international NGOs, donors and Ministry of Finance representatives on newly proposed legislation regulating the status of the grants and humanitarian assistance, and mediated agency talks with the Government on outstanding issues.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Ensure a coordinated approach to humanitarian assistance programming by UN Agencies and other humanitarian partners.
- Continue to provide donor briefs, hold coordination meetings, and disseminate analytical information bulletins and regional briefing notes.
- Investigate with other members of the new approach potential international or indigenous organisations to take over monitoring, evaluation, and analysis of GSRF projects; launch a third round of competition for the GSRF; try to finalise a GSRF loan scheme for business propositions in partnership with a local bank.
- Advocate with UNDP, United Nations Volunteers (UNV), NGOs, and the donor community for their engagement in South Ossetia to address the dire poverty and economic problems faced by IDPs and vulnerable segments of the domicile population.
- Continue to work with UN partners to enhance field security and communications in Abkhazia.
- Support Working Group III, the coordination council's efforts to promote economic and social cooperation between the Georgian and Abkhaz parties.
- Monitor the potential drought and reduced harvest in Imereti or the ethnic tensions in Southern Georgia, and facilitate response mechanisms as necessary.
- Strengthen disaster management readiness, especially the coordination of emergency response, in close cooperation with UNDP and the United Nations Disaster Management Team Programme (UNDMTP).

RUSSIAN FEDERATION

Russian Federation			
Planned Staffing	International	National	Total
Professional	6		6
National Officers		4	4
General Service		14	14
Total	6	18	24
Total Extrabudgetary Requirements		US\$ 1,415,300	

Hostilities in the North Caucasus continue to affect the lives of one million people in the republics of Chechnya and Ingushetia. Some 310,000 people are still displaced and live with host families or in makeshift settlements and camps. Humanitarian activities have certainly increased people's protection and to some extent halted human rights abuse and improved people's lives. However, the security situation and the problems of access to and freedom of movement within Chechnya have prevented the UN and the humanitarian community at large from carrying out large-scale operations in the republic.

While a permanent solution to the crisis has yet to be found, some of the parties to the hostilities have become less aggressive in their discourse.

The possibility of arranging talks between various factions is now being addressed. These efforts need to be redoubled if progress in reducing people's suffering and improving their lives is to be sustained.

The OCHA office in the Russian Federation is situated in Moscow, with a sub-office in Nazran, North Caucasus. Plans to open an OCHA office in Grozny in 2002 depend upon availability of funds, as well as the security situation. The office's humanitarian responsibilities include coordination of response to the complex emergency in the North Caucasus, as well as the response to natural disasters and the continuing Chernobyl nuclear plant disaster. The office is committed to strengthening relations between OCHA and the Russian Ministry of Emergencies (EMERCOM) and monitoring and recording information on humanitarian activities under way in regions of relevance to the Russian Federation.

In 2001, the OCHA Field Office and Sub-Office in the Russian Federation:

- Negotiated a letter of understanding (LOU) between the Government of the Republic of Chechnya, the UN and NGOs on modalities for the delivery of further assistance to civilians in need throughout Chechnya;
- Consolidated the international community's humanitarian response to the situation in the North Caucasus by organising monthly meetings for some 30 embassies, the Arab League, the UN, and ICRC and facilitating twelve aid-monitoring missions in the region;
- Created a forum for information exchange for UN Agencies, the ICRC and some 40 international and local NGOs involved in aid operations by arranging regular coordination meetings and joint needs assessments and by sharing information through the Web site database (<http://www.ocha.ru>) and through briefing kits and bulletins;
- Took a strategic approach to humanitarian action through strategic monitoring and by holding seminars, consultations and presentations attended by federal and regional government representatives, donors, the UN, ICRC and the NGO community;
- Managed the CAP and elaborated the 2002 appeal;
- Carried out an UNDAC mission to assess and publicise the consequences of the floods in the Republic of Sakha (Yakutia). Raised about US\$ 1 million for victims of the disaster;
- Furnished EMERCOM with technological equipment and ensured the compatibility of EMERCOM and OCHA databases;
- Participated in the UN inter-agency working group on Chernobyl;
- Appraised the Russian Government of humanitarian affairs in countries which are of particular interest to the Russian Federation, such as Afghanistan; and
- Cultivated contacts with the OCHA field office in neighbouring Georgia, to address issues of common concern.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Open the office in Grozny and ensure initiation of planning, assessments and project activities.
- Maintain dialogue with the Federal Government and with counterpart governments in Chechnya and Ingushetia to ensure an effective framework of cooperation for the international community.
- Promote programme coordination and information exchange between the UN, ICRC, and the NGO community to ensure effective implementation and accurate monitoring and evaluation of programmes undertaken and to avoid duplication and foster complementarity.
- Organise regular meetings for the donor community, the UN and ICRC in a bid for a coherent international response to the crisis in the North Caucasus.
- Monitor natural disasters in the Russian Federation and report to relevant donors, UN Agencies and NGOs in the event of disasters occurring and eventual donor funding through OCHA.
- Work with EMERCOM, which has increasingly responded in a standby capacity to natural disasters and complex emergencies outside Russia, and promote EMERCOM participation in the UNDAC system.
- Draw the attention of the international humanitarian community to the continuing Chernobyl disaster and take a more developmental approach to this long-term catastrophe.
- Continue to communicate detailed information on humanitarian involvement in regions of relevance to the Russian Federation.

SOUTHEASTERN EUROPE

Southeastern Europe			
Planned Staffing	International	National	Total
Professional	7		7
National Officers		2	2
General Service		13	13
Total	7	15	22
Total Extrabudgetary Requirements		US\$ 1,805,422	

The goal of OCHA's presence in Southeastern Europe is to promote and support a coherent, integrated and systematic UN effort to assess and respond to humanitarian needs in the region. In early 2001, OCHA carried out its planned transition of the Podgorica sub-office to UNDP, as well as staff reductions in Belgrade and Pristina. OCHA subsequently opened an office in Skopje, the Former Yugoslav Republic of Macedonia, and a sub-office (additional to Belgrade) in Vranje, Federal Republic of Yugoslavia (FRY), to address new challenges. The total OCHA staff presence in the region was nonetheless reduced during the year, reflecting the region's growing stability and normalisation of internal and international relations and signalling OCHA's dedication to the relief-to-development transition.

In 2002, OCHA will further scale down its offices in Belgrade and Pristina, and slightly increase its staffing level in Skopje. The one National Officer in Sarajevo will be retained. OCHA offices will continue to

directly support HCs and the UNCTs, but in order to compensate for reduced staffing and to strengthen regional coordination still further, all staff will be available for short-term deployment as required around the region. The broad objectives for all offices will be to enhance coordination and information sharing among all actors involved in humanitarian assistance and protection, to monitor and assess humanitarian conditions and risks, to support the planning and coordination of the UN response to any emergencies, including natural and technological disasters, and to promote the CAP 2002, including maintaining a sharp focus on the most vulnerable groups and promoting durable solutions and national capacities through the development process. OCHA will communicate regularly with donors and other key actors on humanitarian conditions and assistance programmes.

FEDERAL REPUBLIC OF YUGOSLAVIA

The FRY Government has set an ambitious reform and development agenda, and is receiving significant international support. This is expected to reduce the number of people dependent on external humanitarian assistance in 2002, but serious areas of humanitarian vulnerability and delicate questions of recovery persist. Almost one million people live below the poverty line, and the 620,000 refugees and IDPs in the country are still largely vulnerable. The reform process itself includes policies that, in the short term at least, will result in higher prices and higher unemployment.

Therefore, OCHA in 2002 will continue to monitor the ability of the most vulnerable to meet their basic needs independently and advocate for development policies

and programmes that address the needs of these populations and seek durable solutions.

The area of Southeast Serbia contiguous with the FYROM border and the boundary with Kosovo is home to a significant ethnic-Albanian population. Open conflict early in 2001 between ethnic-Albanian armed groups and the FRY security forces had ceased with a peace agreement mid-year, but the level of tension remains high and the area is susceptible to problems that may develop in FYROM and Kosovo. OCHA will maintain a sub-office (for six months) as part of an inter-agency team monitoring humanitarian needs and supporting confidence-building measures in the area.

In 2001, the OCHA field and sub-office in the Federal Republic of Yugoslavia:

- Supported the UNCT, acting as secretariat for coordination meetings and preparing various briefing papers and reports including inter-agency situation reports, reports to headquarters, country profiles and humanitarian fact sheets, and a report on the humanitarian impact of economic sanctions;
- Monitored vulnerability and issued humanitarian risk analysis reports on water and sanitation, energy, and the Roma community in FRY;
- Coordinated the 2002 CAP for FRY and revisions to the 2001 CAP, as well as the preparation of the regional Appeal;
- Jointly (with UNDP) led the UN inter-agency assessment mission to South Serbia, and established a UN inter-agency support office;
- Transferred the OCHA sub-office in Podgorica to UNDP thereby ensuring a smooth transfer from relief to development coordination;
- Jointly with UNHCR coordinated the production of an emergency preparedness and response plan for FRY regarding the conflict in FYROM;
- Provided support to the FRY Government aid coordination unit, and jointly with UNDP and UNHCR supported the FRY Government task force on durable solutions for refugees and internally displaced persons;
- Continued with analysis and advocacy in the energy sector;
- Led cross-sectoral coordination of winter humanitarian needs and programmes, including advocacy with the FRY Government and donors;
- Maintained a database tracking humanitarian assistance by sector, beneficiary, and agency for FRY, plus a more detailed project list for South Serbia; and
- Facilitated OCHA's regional response to the conflict in FYROM, including temporary deployment of staff to Skopje and Pristina.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Continue to provide coordination support to the UNCT in Belgrade, including a functional concentration in advocacy, analysis of humanitarian risks, the maintenance of the database on humanitarian activities, reporting, donor liaison, and contingency planning. The office will continue to support coordination in South Serbia within the inter-agency support office in Vranje.
- Manage the overall field-coordination support for the region, and, in consultation with the local head of office or OCHA Geneva/New York, arrange for surge capacity through flexible short-term staff redeployment within the region.
- Rationalise OCHA's regional capacity and activities in information management; emergency/crisis response; risk and needs assessments, contingency planning and emergency preparedness, and situation monitoring and reporting.
- Respond more quickly and more flexibly to evolving emergency situations, in keeping with the strengthened regional framework whereby all OCHA field staff will be made available for short-term deployment to other locations as required. The Belgrade office will also remain the focal point for CAP reviews, strategic planning and follow-on consolidated appeals for the region as required.

KOSOVO

The general humanitarian situation in Kosovo has stabilised, but tension and inter-ethnic violence continue. Due to security risks, minority communities have limited freedom of movement and consequently restricted access to basic services or markets, resulting in very few economic opportunities. The conflict in the Former Yugoslav Republic of Macedonia resulted in the arrival of over 81,000 mainly ethnic Albanian refugees in Kosovo, most of whom were accommodated with host families. These refugees have been returning to FYROM, but it is anticipated that up to 20,000 will remain in the province in 2002. Unemployment and crime in Kosovo remain high, the infrastructure poor, and the rule of law tenuous.

The humanitarian community in Kosovo continues to address the needs related to this range of problems, although in 2002 their projects are being strictly focused to extremely vulnerable groups.

The OCHA Office in Pristina included a field liaison team and the Humanitarian Community Information Centre (HCIC) in 2001, supporting the HC. As the programme emphasis in Kosovo had clearly shifted to development activities the HC function ended on 30 September 2001, and the UN Development Group, under the leadership of a UN development coordinator, took over primary responsibility for inter-agency coordination.

In 2001, the OCHA field office in Kosovo:

- Supported the UN province team, including as secretariat for heads of agency meetings, leading the 2001 CAP mid-term review and revision and the preparation of the Kosovo component of the 2002 CAP, and giving regular briefings to donors;
- Supported coordination of humanitarian activities at the municipal level;
- Facilitated contingency planning and emergency preparedness, and supported field level coordination of the emergency assistance to refugees from FYROM;
- Carried out a survey of emergency needs for winter 2001-2002, and led cross-sectoral meetings on winter preparedness in cooperation with the United Nations Mission in Kosovo (UNMIK);
- Issued regular reports on inter-agency activities in humanitarian affairs, the transition from emergency and humanitarian assistance to development activities, and the transfer of responsibilities from international organisations to local institutions;
- Issued special reports on the transition and on gender issues;
- Through the HCIC, advised new institutional actors in Kosovo on available information and data systems, and expanded joint working arrangements to develop and support an in-province GIS capability;
- Produced and delivered information products such as the Kosovo Atlas, the HCIC toolbox CD-ROM, the Kosovo Encyclopedia II, and a "Who does What Where?" database;
- Provided an awareness training module for local government officials on the application of information systems with UNDP/United Nations Institute for Training and Research (UNITAR);
- Continued to host a fortnightly multi-agency/sector forum for information specialists to exchange data (survey results, demographic and socio-economic indicators); and
- Assisted the OSCE in producing regional and municipal mapping services for the November 2001 Kosovo assembly elections.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Monitor residual humanitarian needs particularly those of the IDPs in the province and families identified as suitable beneficiaries of emergency winter assistance. Advocate for humanitarian assistance and support coordination of the response to any new humanitarian needs. Prepare reports and briefings on humanitarian issues and support and promote regular updating of the UN inter-agency contingency and emergency preparedness plan.
- Transfer the Humanitarian Community Information Centre to the UN development coordinator, on 1 January 2002. To ensure a smooth transition, OCHA will retain a limited presence in the HCIC to help build the capacity of the management team. The Centre will continue to offer a range of services to the general public, including the "Who Does What Where?" database, province/region maps, a Kosovo encyclopaedia CD-ROM, and information services. It will, however, reorient itself to a development focus.
- The head of office will work closely on staff development of the remaining local staff members, transferring responsibilities until the office functions effectively without the presence of an international officer, as is the case in Sarajevo.

BOSNIA AND HERCEGOVINA

While the political, economic and humanitarian situation in Bosnia and Herzegovina (BiH) continues to improve, it remains complex. Many refugees and IDPs have returned, including to communities where they constitute ethnic minorities. Much of the country infrastructure has been rebuilt, and parts of the population have benefited from renewed economic activity. Improvements have been made in the rule of law, unquestionably helping to stabilise the positions of vulnerable populations in their places of residence.

On the other hand, the rebuilding of BiH as a stable, single nation-state entity has been only partly achieved. Certain clear obstacles to political and institutional integration continue to create social fragility and limit

economic development. As a result, large parts of the population remain vulnerable. The incapacity of many regions to pull out of economic recession combined with the tenuous social safety net represents a real danger for the minority return process that began to take off in 2000 and accelerated sharply in 2001. Moreover, the population of Bosnia and Herzegovina is vulnerable to wider, regional social problems such as irregular migration and trafficking of women.

In 2001, the OCHA field office in Bosnia and Herzegovina:

- ➔ Supported the lead agency (UNHCR) on humanitarian affairs in coordination efforts including advocacy with donors to address immediate needs and the gaps in humanitarian assistance, production of the 2001 CAP mid-term review and 2002 CAP for BiH, monitoring of CAP programmes, liaison with OCHA HQ and the regional CAP team;
- ➔ Supported the RC in coordinating transitional activities and UN-system response to floods;
- ➔ Promoted the CAP;
- ➔ Worked closely with other OCHA offices in the region to promote a coordinated approach to humanitarian assistance, including an assessment mission to Sandzak (located between Serbia and Montenegro), assistance in formulation of the OCHA regional strategy, and finalisation of the regional CAP for 2002; and
- ➔ Monitored the humanitarian situation in Croatia and assisted with the 2002 CAP for Croatia.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Continue to support coordination by the lead humanitarian agency (UNHCR) and by the RC in the case of natural and technological disasters and the relief-to-development transition. In the course of 2002, the responsible officer will hold offices in both UNHCR and the office of the Resident Coordinator.
- Carry out missions within the region and especially to Croatia and the Federal Republic of Yugoslavia.

FORMER YUGOSLAV REPUBLIC OF MACEDONIA

OCHA established an office in the FYROM in Spring 2001, and strengthened it by mid-year to support the newly appointed HC and the UNCT in the face of an increasingly complex situation. Although a peace agreement had been reached in late summer, the OCHA office continued to develop in order to support the

implementation of return and stabilisation activities. By the end of 2001, the office was setting up an information system, enhancing its reporting capacity, and continuing to provide support to contingency planning and regular inter-agency and sector-level coordination. The office will maintain a modest level of staffing in 2002.

In 2001, the OCHA field office in the Former Yugoslav Republic of Macedonia:

- Supported the UNCT, acting as a secretariat for heads of agency meetings, participating in sectoral coordination meetings on shelter and host families assistance, liaising with and briefing donors, and producing the 2001 CAP mid-term review and revision and the 2002 CAP country component;
- Prepared and regularly updated the inter-agency emergency preparedness and response plan, in consultation with the UNCT and other humanitarian actors such as the ICRC and the IFRC;
- Assisted the HC in redressing gaps in the coordination of assistance, including advocating for the establishment of the national humanitarian coordination body, a weekly forum for dialogue among representatives of Government ministries, UN Agencies, and local and international NGOs;
- Briefed NGOs on the humanitarian and security situation while advocating for the establishment of an NGO council;
- Facilitated communication between NATO and the humanitarian community through briefings and the deployment of a military liaison officer; and
- Established a database tracking humanitarian assistance by sector, beneficiary group and agency.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Continue to support the HC in planning and coordinating humanitarian assistance. Priority activities will include regular review of the inter-agency emergency preparedness and response plan, development of an information cell to strengthen humanitarian information services, thematic reporting on humanitarian issues and continued secretariat services for inter-agency coordination activities.
- Strengthen its capacity to disseminate and analyse information for planning through an inter-agency information cell. Building on current databases, it will especially focus on consolidating and making readily available to all relevant actors information on conflict-affected villages, such as access, level of damage to infrastructure and private dwellings, and level of return. Regular reports will be issued and circulated.
- Undertake analysis of humanitarian issues, according to UNCT priorities, and produce thematic reports such as the humanitarian risk analysis in Belgrade. This will be in addition to regular inter-agency situation reports.
- Strengthen advocacy *vis-à-vis* donors, initiating regular donor briefings on humanitarian conditions and related assistance priorities.

AMERICAS AND THE CARIBBEAN

Photo: OCHA 2001. El Salvador.

Rescue workers digging for survivors in a mudslide after the January earthquake.

One-third of the population in El Salvador were affected by two devastating earthquakes at the beginning of 2001. In total 194,000 homes were destroyed.

COLOMBIA

Colombia			
Planned Staffing	International	National	Total
Professional	2		2
National Officers		-	-
General Service		2	2
Total	2	2	4
Total Extrabudgetary Requirements		US\$	342,985

Colombia continues to suffer from conflict, which is causing an acute problem of displacement, with catastrophic consequences on the civilian population. An estimated 80,000 persons abandoned their homes and sought protection elsewhere in the first eight months of 2001. As long as the hostilities continue, there can be no resolution to the IDP problem in Colombia. Nonetheless, adequate solutions must be sought to allow civilians to live in safety.

Since September 2000, two OCHA staff members have been deployed to Colombia to support the UNHCR Representative in facilitating coordination among UN Agencies, ICRC, IOM, NGOs and other inter-governmental organisations to address the humanitarian needs of IDPs in Colombia. The coordination mechanism is the UN thematic group on IDPs, composed of: UNHCR, UNDP, the International Bank for Reconstruction and Development (IBRD), UNICEF, WFP, the FAO, the United Nations International Drug Control Programme (UNDCP), the Pan American Health Organization / World Health Organization (PAHO/WHO), the HC / Humanitarian

Representative (HR), the United Nations Population Fund (UNFPA), the IOM, ICRC, the ECHO and the Government Office for IDPs. As of October 2001, national and international NGOs have been participating in the group.

OCHA's presence in the Inter-Agency IDP Coordination Unit in Colombia is responsible for supporting and reinforcing UNHCR's coordination functions in order to enhance inter-agency activities. While respecting the specificity and mandates of the UN Agencies, such a system facilitates:

- ▶ Information gathering and sharing on IDP statistics;
- ▶ Characterisation of IDPs according to gender, age, rural-urban and ethnic group;
- ▶ Mapping and targeting areas for UN action;
- ▶ Communication and diffusion of IDP related issues;
- ▶ Coordination with ECHO, the Government office for IDPs Reintegration Support Scheme (RSS), IDP associations and the NGO community;
- ▶ Promotion of joint initiatives and activities.

In 2001, OCHA's staff in the Inter-Agency IDP Coordination Unit in Colombia:

- Supported the organisation of regular meetings of the UN Inter-Agency Group on IDPs to discuss strategic issues and develop a humanitarian policy;
- Supported coordination and facilitated dialogue at the field level, particularly with local authorities, Agencies and NGOs;
- Issued situation updates that provided an overview of the humanitarian activities for IDPs in Colombia;
- Prepared the visit to Colombia of the UN Special Coordinator on Internal Displacement, who chaired the senior inter-agency network on IDPs;
- Analysed existing information systems on the IDP situation and proposed alternatives to enhance the contribution of the UN system in this regard;
- Organised information briefings on the IDP situation for the humanitarian community at large;
- Facilitated the elaboration of a common inter-agency IDP action plan within the strategic framework elaborated by the UN thematic group on IDPs; and
- Initiated the establishment of a database of programmes and projects in implementation aimed at IDP assistance and protection.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Continue to assist the UN thematic group on IDPs in developing a strategy on humanitarian policy.
- Work within the framework of the UN thematic group on IDPs to:
 - a) Consolidate and further develop the humanitarian plan of action;
 - b) Improve the level of political-technical dialogue with all concerned ministries and authorities; and
 - c) Identify gaps and required resources, and determine arrangements among agencies and NGOs to respond to specific situations.
- Enhance coordination systems and local humanitarian plans, in close coordination with UNHCR field offices and other relevant UN Agencies with presence in the field, in order to improve the UN response at local level.
- Coordinate, consolidate and disseminate information related to IDPs, utilising information technology such as GIS and the Internet.
- Promote greater awareness of the IDP issue locally and with the international community. Promote better practices through lessons learned evaluations.
- Consolidate the database of programmes and projects in implementation aimed at IDP assistance and protection.
- Continue supporting the Inter-Agency Group on IDPs under the guidance of UNHCR, by collecting, consolidating, analysing and disseminating information and issuing periodic information bulletins and situation reports, as well as other briefing documents.

REGIONAL DISASTER RESPONSE ADVISOR FOR LATIN AMERICA AND THE CARIBBEAN

Regional Disaster Response Advisor for Latin America and the Caribbean

Planned Staffing	International	National	Total
Professional	3		3
National Officers		-	-
General Service		3	3
Total	3	3	6

Total Extrabudgetary Requirements US\$ **392,385**

Antigua and Barbuda, Argentina, Bahamas, Barbados, Belize, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Commonwealth of Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Netherlands Antilles, Nicaragua, Panama, Paraguay, Peru, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago, Uruguay, Venezuela.

Natural disasters are affecting the region of Latin America and the Caribbean with increasing intensity. A study prepared by the Inter-American Development Bank (IDB) and the UN Economic Commission for Latin America and the Caribbean (ECLAC) shows an annual average of 10.8 major natural disasters between 1900 and 1989, whereas between 1990 and 1998, the annual average increased to 35.7 in the region.

The year 2001 hit the region hard: within one month two earthquakes in El Salvador, later an earthquake in Peru, then drought in Central America, and, during the regular hurricane season, Hurricanes Iris and Michelle

wreaking havoc in Central America and the Caribbean. While the coordination of international response to actual disasters was at times the first priority, efforts to aim for stronger disaster response preparedness could not be allowed to slacken. In this disaster-prone region, OCHA has one professional staff only to support coordination amongst humanitarian actors. This is an untenable situation that must be redressed by further resources to take on board two more professional staff, which will still be a modest outfit to try and cover 40 countries.

In 2001, the OCHA office of the Regional Disaster Response Advisor for Latin America and the Caribbean:

- ➔ Supported six countries (Bolivia, Colombia, Ecuador, Venezuela, El Salvador and Nicaragua) in formulating Inter-Agency Contingency Plans for approval by the UNDMTs. An Executive Guide for Resident Coordinators in Case of Natural Disaster Situations was developed and distributed to all RCs in Latin America and the Caribbean. Spanish and English versions are available electronically via the RDRA's Web site (www.undp.org.ec/ocha-rdra);
- ➔ Led two UNDAC missions in response to the devastating earthquakes which occurred in El Salvador on 13 January and 13 February;
- ➔ Conducted a lessons-learned workshop with the UNDMT in El Salvador a few months after the January and February earthquakes;
- ➔ Gave several presentations at the UNDAC induction course for the Caribbean which took place in Bermuda in May, and at the UNDAC Latin America refresher course, held in Venezuela in June;
- ➔ Represented OCHA and promoted the OCHA integrated response mechanism for disaster prone countries in Latin America on five occasions, notably at the workshop on civil and military coordination, organised by the Centre for the Coordination of Natural Disaster Prevention in Central America (CEPRENAC), the Central American Integration System (SICA) and USAID/OFDA and held in Costa Rica in March 2001, and at the INSARAG Regional Meeting for the Americas, held in Miami in May 2001.
- ➔ Created and almost completed the database of search and rescue (SAR) teams in South America;
- ➔ Participated actively in the design, standardisation and dissemination of the Integrated Information Management System (SIGCO), a Web-based information management system for the exchange of humanitarian information in the aftermath of disasters and emergencies;
- ➔ Compiled, edited and disseminated three issues of the OCHA Disaster Response Newsletter for Latin America;
- ➔ Expanded and updated the emergency directory for Latin America and the Caribbean, which is now available on the RDRA's Web site (www.undp.org.ec/ocha-rdra).

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Enhance and update inter-agency contingency plans in four additional countries. A simulation exercise will be carried out to test one in-country contingency plan. The contingency planning process will be initiated in two additional countries in Latin America and in two countries in the Caribbean.
- Identify four additional countries with inter-agency contingency plans and, in consultation with the RC, ascertain the extent of the linkage between the Government's response preparedness network, that of the National Red Cross and major NGOs active in the country, in order to promote greater coherence.
- Lead UNDAC missions when warranted by natural disasters.
- Conduct workshops with UNDMTs during the post-disaster phase, if appropriate.
- Function as a resource person at UNDAC induction and refresher courses in Latin America and the Caribbean region.
- Participate in selected events to promote the OCHA integrated response mechanism and the overall humanitarian mandate of OCHA.
- Complete the Database of SAR teams in South America.
- Promote the implementation of SIGCO whenever a disaster strikes in the region.
- Prepare three issues of the OCHA Disaster Response Newsletter.

INTEGRATED REGIONAL INFORMATION NETWORK (IRIN)

Integrated Regional Information Network (IRIN)			
Planned Staffing	International	National	Total
Professional	21		21
National Officers		9	9
General Service		30	30
Total	21	39	60
Total Extrabudgetary Requirements		US\$ 4,307,298	

The genocide in Rwanda in 1994 and the humanitarian crises which subsequently engulfed the entire Great Lakes region of Central Africa highlighted the need for timely, accurate and contextual information. The IRIN was born out of this crisis. The project was started by DHA, OCHA's predecessor, in late 1995 in Nairobi, to improve information flow in the region.

The IRIN model has since been exported to other parts of Africa, with a second office opening in Abidjan, Côte d'Ivoire, in May 1997 and a third in Johannesburg, South Africa, in June 1998. In early 2000, IRIN established a Horn of Africa Desk in its Nairobi office. Together these offices report on a total of 45 individual countries as well as on regional issues and events. In the interests of cost-effectiveness and standardisation of services and information products, IRIN continues to be managed by a single Coordinator, based in Nairobi.

With the establishment of its office in Islamabad, Pakistan, IRIN-Central Asia has reported on the evolving humanitarian crisis in Afghanistan and Central Asia since August 2000. In the aftermath of the 11 September terrorist attacks in the United States, IRIN coverage of Central Asia was rapidly expanded with the temporary deployment of additional support staff from other offices. In the six weeks following the attacks, IRIN produced a total of 138 special reports on subjects ranging from food assistance, relief logistics and the movements of Afghan refugees to the effects of military strikes on humanitarian action, contingency plans, and the economic impact of the Afghan crisis on the region.

In 2001 IRIN:

- Expanded its network in Central Asia to include full-time or part-time writers in Pakistan, Iran, Tajikistan and Kyrgyzstan, enhancing IRIN's ability to report on the ongoing humanitarian crisis from a regional perspective;
- Produced over 7,000 daily reports from its offices in Nairobi, Abidjan, Johannesburg and New York during the first ten months of the year and nearly 200 special background and analytical reports on 57 different countries between January and October;
- Increased its individual e-mail subscriptions from 8,000 in September 2000 to nearly 13,000 in October 2001. This translates into a daily readership of over 60,000. Launched a web-based e-mail subscription service allowing users to refine their profiles whenever they want;
- Continued to translate all daily and weekly updates on the Great Lakes and West Africa into French;
- Temporarily placed a staff member with the Office of the Resident Coordinator in Iran to assist with reporting;
- Interviewed more than 60 influential personalities and humanitarian decision-makers in Africa and Central Asia;
- Consolidated coverage of countries such as Sudan, Kenya, Uganda and Tanzania which had only received "ad hoc" treatment previously;
- Formed partnerships with Somali radio stations and broadcast regular news feeds on humanitarian issues from these stations;
- Created PlusNews to fill a perceived information gap in relevant and reliable reporting on HIV/AIDS in sub-Saharan Africa; and
- Reconstructed its web site to enhance interactivity, multimedia, speed and feedback. The new site, www.irinnews.org, was launched in November 2001.

YEAR 2002 PRIORITIES AND PLANNED ACTIVITIES

- Continue to produce a wide variety of information products for Africa and Central Asia.
- Broaden and deepen its reporting on events in Central Asia through its main office in Islamabad and a recently opened sub-office in Bishkek, Kyrgyzstan.
- Set up and run an independent "Information Analysis Unit" within IRIN, to provide the regional desks and editorial staff with the guidance, advice and materials needed for more effective analytical reporting.
- Act on the successful outcome of the broadcasts in local languages on Somali radio stations by exporting the model to Burundi, and also to other regions of sub-Saharan Africa and Central Asia. There is a pressing need to ensure that local populations, especially in Afghanistan, have access to impartial, accurate information.
- Expand the PlusNews service to include more detailed information on HIV/AIDS and give notice of upcoming conferences, workshops, research opportunities as well as recent publications.
- Continue to enhance its web site, introducing more graphics, photographs and links to other information sources.
- Create dedicated French and Arabic web sites, subject to funding, with a view to exchanging information between French-speaking communities and decision-makers in the first place and Islamic and non-Islamic humanitarian organisations in the second.

* The immediate requirements for the crisis in Afghanistan, totaling US\$ 14 million, are reflected in the revised six-month donor alert, covering the period from 1 October to 1 March 2002. OCHA is in the process of preparing a 2002 Inter-Agency Appeal for Afghanistan, which will reflect humanitarian needs as well as OCHA's coordination requirements. It will be available at the donor meeting in Tokyo in January. As needs evolve over time, these figures may be adjusted.

Annex III.A: OCHA Trusts Funds, Special Accounts and other Channeling Mechanisms

OCHA finances its activities through two main channels:

- The United Nations regular budget, which is approved by the General Assembly biennially; and
- Voluntary contributions administered under trust funds, of which the Trust Fund for Strengthening the Office of the Coordinator (DD) and the Disaster Relief Assistance Trust Fund (DM) are the most relevant. Regular contributions to these funds are vital for the work of OCHA. The legal basis, rationale and functioning of these and several other OCHA trust funds and accounts are shown below.

Trust Fund for Strengthening the Office of the Coordinator (DD)

This trust fund was established in 1974 pursuant to General Assembly resolution 3243. Voluntary contributions to the fund enable OCHA to cover its core needs, related to both staff and non-staff costs at headquarters, for the part that is not funded from regular budget allocations. The fund is subject to 13 per cent programme support costs.

• DD Sub-account for Strengthening the Integrated Regional Information Network

This sub-account was established in New York under the DD Trust Fund to serve as the funding source for IRIN core needs related to both staff and non-staff costs. The sub-account is subject to 13 per cent programme support costs.

Trust Fund for Disaster Relief (DM)

This trust fund was established in 1971 by General Assembly resolutions 2816 to receive earmarked and unearmarked contributions for disaster relief assistance. The objective of the fund is to finance coordination and relief activities and provide the initial emergency grant once regular budget funds are exhausted. The fund enables OCHA to cover relief needs as an advance when the response of the donor community is slow. The earmarked contributions are deposited in separate accounts for specific affected countries or objectives. The fund is subject to 3 per cent programme support costs.

• DM Special Sub-Account for Field Coordination

The Sub-Account was established in 1999 to enable donors to provide unearmarked resources for field coordination units in complex emergencies based on three criteria: establishment of units in new emergencies; expansion of units due to worsening situations; support to severely underfunded units. This mechanism allows OCHA, following assessment of the programming and funding situation of the various offices, to allocate resources on a priority and emergency basis and manage field operations with the needed flexibility.

Sasakawa/OCHA Disaster Prevention Award Endowment Fund (DL)

The Sasakawa Fund was established to provide awards to individuals or institutions which pursued and promoted disaster prevention measures. Funds are earmarked and available exclusively for the above purpose. The fund is subject to 13 per cent programme support costs.

Special Account for Programme Support (OD)

Some of OCHA's needs are covered by this special account. The resources come from the programme support costs levied on activities financed through trust funds. The levy ranges from 3 to 13 per cent, depending on the type of activity and trust fund. The resulting income is shared between administrative and common services provided by the United Nations in support of OCHA extrabudgetary activities.

Afghanistan Emergency Trust Fund (AX, AY, AZ)

The Secretary-General established the Afghanistan Emergency Trust Fund (AETF) in June 1988, with the exclusive purpose of channelling funds received from donors towards humanitarian activities in Afghanistan. The establishment of the AETF was a result of ACABQ resolution which established the United Nations Office of the Coordinator for Humanitarian and Economic Assistance Programmes relating to Afghanistan (UNOCA). UNOCA then evolved into the United Nations Office for the Coordination of Humanitarian Assistance to Afghanistan (UNOCHA), which retains the management responsibility of the AETF through UNOG. Donor funds arrive in four categories: earmarked for agencies, earmarked for substantive activities, earmarked for the Coordination Office and unearmarked. Programme support under trust fund rules is levied at different percentages for each category and kept within AETF.

African Emergency Trust Fund

The African Emergency Trust Fund was established in 1985 by the Secretary-General, who transferred the responsibility of its management to DHA. The fund's purpose is to support the coordination of emergency relief assistance to African countries. Since the establishment of the Consolidated Appeal Process, which became the main funding vehicle for complex emergencies, the residual resources of this fund are being used to finance humanitarian operations whenever earmarked contributions are not available.

Kampuchean Emergency Trust Fund

This fund, initially implemented by the United Nations Border Relief Operation, was established to maintain emergency response preparedness for new arrivals by monitoring events and developments in unstable areas on both sides of the Thai-Cambodian border. The fund also finances food and non-food emergency assistance to Cambodian displaced persons along border areas in Cambodia.

Trust Fund for Chernobyl

This trust fund was established when the General Assembly assigned the function of United Nations Coordinator of International Cooperation on Chernobyl to the Emergency Relief Coordinator. Contributions channelled through this fund are used to cover priority needs related to the consequences of the Chernobyl disaster as identified in close consultations with the Governments of the affected countries and the Inter-Agency Task Force on Chernobyl. The fund is subject to 13 per cent programme support costs.

Trust Fund for Rwanda

The Trust Fund for Rwanda was established by the Secretary-General in 1994, pursuant to Security Council resolution S/Res/925 (1994), to support humanitarian relief and rehabilitation programmes in Rwanda. It has been used exclusively to meet the immediate administrative and training needs of the newly installed Government of Rwanda, and for related technical assistance and resettlement of IDPs. It has not been operational since the completion, in 1996, of relief and rehabilitation activities in Rwanda.

Central Emergency Revolving Fund (CERF)

CERF was established pursuant to General Assembly resolution 46/182 as a revolving cash-flow mechanism to ensure the provision of adequate resources to United Nations humanitarian agencies in the initial phase of emergencies requiring a system-wide response. The Fund is managed by the USG for Humanitarian Affairs under the authority of the Secretary-General. In its resolution 48/57, the General Assembly also provided for the use of the interest earned by the fund to enhance rapid response coordination where insufficient capacity exists at the field level. However, the rules of the fund restrict the use of these resources, as CERF loans cannot be used for established field offices that are beyond the immediate phase of an emergency. Furthermore, United Nations agencies borrowing resources from the fund must reimburse the amount loaned within one year. To revitalise the use of CERF, modification of its rules is under discussion.

Annex III.B: The United Nations Humanitarian Response Depot (UNHRD)

In March 2001, WFP inaugurated the United Nations Humanitarian Response Depot (UNHRD), located on the military airport of Brindisi (Southern Italy), near to the city's port. This resulted from the Secretary General's reform proposals, which induced the relocation, to Brindisi, of the warehouse that OCHA operated between 1985 and 2000 in Pisa (Northern Italy) and the divestiture of its management to the UN food aid agency.

Funded by the Italian Government at a cost of US\$ 3.5 million, the UNHRD serves as a logistics and storage facility that allows the UN to respond to crises at a moment's notice. The Italian Government also covers large parts of the annual management and operations costs of the Depot, which is managed by WFP on behalf of partners that include the Italian Government, selected non-governmental organizations, OCHA and the WHO.

Besides OCHA's stocks, donated by Governments of Italy, Norway and Luxembourg, the UNHRD also houses emergency food aid, mobile cooking facilities and rapid response equipment, as well as medicines and medical kits.

OCHA's stocks in the UNHRD can help to fill gaps in international assistance, which cannot be taken care of by another member of the United Nations system or by a donor Government. OCHA is also ready to facilitate the provision of emergency relief by other actors of the international humanitarian community.

Since September 2000 (date of transfer of the OCHA Pisa Warehouse to Brindisi), 16 operations involving goods from the OCHA stocks have left the UNHRD, mostly for areas affected by natural disasters. Between 01 January and 30 September 2001 (14 operations), OCHA goods have been dispatched to the following 10 countries:

- Afghanistan (Kabul/assistance to population - Herat/cold wave)
- El Salvador (2 flights/ earthquake)
- India (3 flights/ earthquake)
- Iran (floods)
- Mozambique/Beira (floods)
- Pakistan/Peshawar (displaced population)
- Peru (earthquake)
- Sierra Leone (conflict)
- Sudan (floods)
- Uzbekistan/Nuru (drought)

Most of these dispatches concerned more than one OCHA donor and/or UN Agency present in the UNHRD. Four operations were requested by the Italian Government in support of Italian-sponsored programs (three were consigned to the local Italian Cooperation Office or Italian NGOs and one to UNHCR Peshawar).

Over the period January to September 2001, a total of 293,770 kg of OCHA goods (donated by Italy, Norway and Luxembourg), for a total value of approx. 2,040,747 US\$, left the UNHRD.

Annex IV. Acronyms and Abbreviations

ACABQ	Advisory Committee on Administrative and Budgetary Questions
ADPC	Asian Disaster Preparedness Centre
ADRC	Asian Disaster Reduction Centre
AERC	Assistant Emergency Relief Coordinator
