

Rupert Douglas-Bate: Chairman and Founder

2003-Present

UK: Chairman & Founder, Global MapAid

Rupert founded GMA in the UK and USA after a fellowship at Stanford University in 2002/3, sponsored by the Thomson Re Foundation. It has taken up about 50% of his time ever since, as an unpaid volunteer.

Short missions have included training and supervising field teams for fundraising, data collection and mapping in order illustrate 'gaps' where humanitarian and development aid are missing.

One notable mission from September 2005 to October 2005 was a team sent in to the aftermath of Hurricane Katrina. In it made 50,000 maps for returnees, to help guide them to useful aid agencies, earning the respect and thanks of US milit local county authorities.

1999-2002

UK, Kosovo: Country Manager, MapAction

Rupert founded MapAction as a result of a mapping project in the Kosovo in Dec '99. As Country Manager, on iron ration: up a local team, and made maps of small business re-start activities, to help post-conflict reconstruction. These served demonstration maps at the charity launch in April 2002. Rupert also developed his concept and rationale of gap-analy: sustainable job creation.

2001-Present

UK: Owner, Rupert Douglas Fine Foods

Rupert has set up and project managed this small marketing business, distributing great quality organic and gourmet food to over 1,000 customers. This business situation has given him valuable insights into how to run a *small* business, which informed his book about sustainable job creation "The Competition for Hope".

2012

UK, Ethiopia: Consultant, European Commission

The role consisted of carefully consulting to create terms of reference. Then working with investors and potential investor personnel on the investment concepts and questions they considered important. It was necessary to then prioritise those questions and concepts, diagnosing answers and then feeding back solutions and knowledge into the investor guidelines which were delivered within agreed deadlines. Rupert used email, phone, online and face to face enquiries.

2012

Ethiopia & Djibouti: Country Manager, Stratex East Africa Ltd

Rupert advised and ran a support and administration team for 10 geologists and back-up crews, local and international, searching for gold, totalling about 40 people. He supported and administered logistical support to remote teams in the Ili Desert, and completed a successful hand-over to a longer-term team. Stratex pursues the very highest of ethical values of both health & safety and environmental standards. At the outset, he built a teamwork strategy that significantly improved work rate and contentment of the office support team.

2011-12

Ethiopia: Country Manager, Meridian Drilling Ltd

Rupert provided full time support, consultancy and operational leadership. His project management covered general management and services for geological exploration in one of the harshest environments on the planet. He ran a support administration team in two offices for 30 personnel working on 2 drilling rigs in the Danakil Desert, drilling for potash salt. He set up and delivered a comprehensive financial audit and covered the gamut of human resource operations.

2008

UAE: Marketing & Fundraiser Consultant, The Mowgli Foundation

Mowgli is a not-for-profit social enterprise, working in the MENA region, to catalyze the support and development of successful and sustainable entrepreneurship through mentoring. The strategic goal of Rupert's mission was to help Mowgli create a fundraiser dinner launch event and win the support of VIP and HNW individuals who were invited.

2002-03

USA: Reuters Digital Vision Fellowship Programme, Stanford University

He won a scholarship to become a fellow at Stanford to research and develop a humanitarian mapping technology, using applications. The fellowship enabled him to build a team of 23 academics and students who built a satellite and GPS technology that won a top prize at the Stanford Business Association of Stanford Engineering Students, in 2003. The technology consisted of a system to map emergency data at ground level, then send it via an Iridium satellite link to a web server, where it was plotted on a map. Out of this project came Global MapAid.

2001

UK: Consultant Manager, Trans Global Management Services

Working in a small team marketing and developing leadership and teamwork packages for government departments and commerce, Rupert helped devise brochures, arrange meetings and promote and attend courses.

1999

Kosovo, Montenegro: Shelter Coordinator, World Vision & Chair Of UNHCR Shelter Committee

The mission became two jobs in one, working as both the UNHCR Representative and the World Vision Representative, in Kosovo. It was an intense post-conflict leadership role, in charge of international teams looking after rather traumatised populations. He led teams setting up refugee housing schemes and established emergency refugees forwarding centre in Mitrovica, Prishtina and Ulsinje. Together with his team of 14 men and women, he also surveyed 5,000 houses in 8 weeks, 16 to 20 hour days.

As UNHCR Representative, he also collated information from 15 agencies and provided information on the type and quantity of repair materials needed for housing that was repairable, significantly alleviating severe pressure on an overwintering population of approximately 500,000 people in Mitrovica. In addition, he was responsible for logistics for World Vision Mitrovica, organizing delivery of over-winter shelter materials, and emergency food handouts.

1998-99

UK: Map Maker, World Disaster Report, International Federation Of The Red Cross

Rupert jointly researched and part-time mapped the world's worst year for natural disasters (to date) making maps.

1997-98

Bosnia: Registration Supervisor And Polling Supervisor, OSCE

He served the Organisation for Security and Cooperation in Europe on three separate occasions in Bosnia, monitoring elections. The work involved a great deal of organisational effort and leadership, which included negotiating with people who were distressed. On one mission, in Sept 1998, he exercised individual crowd control, where several hundred eager voters were the impression they were being denied their rights resulting in a security challenge by angry voters making death threats. He dealt with the physical collapse of a polling station during voting, when it was full of people.

1998

UK: Manager, Jonathan Woolfrey Landscapes

He worked in a small business in a close-knit team, as a team leader and assistant leader managing landscaping contracts for Tesco and other supermarket companies.

1997-98

Eastern Congo: Project Finance Assessment Officer, Christian Aid, ECHO, DfID

Rupert was sent to the Congo, to oversee a complete financial audit at the Bukavu regional office. He was responsible for ensuring fulfilment of ECHO, DfID and Christian Aid reporting procedures, for a large agriculture and food security programme in rural Bukavu, which was a post-conflict zone. The budget was c.£1,500,000. Conducting most of the work in French, he also carried out a monitoring & evaluation of programme to help ensure the operation remained on track.

1997

Jordan: Leadership Student, UN University International Leadership Academy & Global Leadership Forum

The UNU-ILA was founded to bring youthful leaders together, to promote peace. Rupert was able to learn much by meeting and listening to their Royal Highnesses, Queen Noor of Jordan and her late husband King Hussein of Jordan who were founders. He attended lectures by Shimon Perez, Yasser Arafat, David Steel and Harriet Fulbright, amongst others. He also received degree feedback and training from the Centre for Creative Leadership (CCL), in the context of multicultural leadership. He attended the Global Leadership Forum which came out of the UNU-ILA at the University of Bahçeşehir Istanbul, in 2001 and where he discussed a variety of global leadership issues. He remains friends with Dr Adel Safty who was instrumental in supporting these organisations.

1997

Bosnia: Agricultural Specialist Team Member, Brown & Root, European Union

Rupert contributed to the research and development of a European Union proposal, providing detailed agricultural assessment of Bosnia, to define job possibilities and thus facilitate rehabilitation of 40,000 refugees in Banja Luka.

1996-97

UK: Sales Analyst, Newmark Technology Ltd

Detailed financial analysis of security projects as an intensive management accounting exercise, which demonstrated that 80% of sales were derived from 20% of customers. These results could thus enable Newmark to focus on a revised business strategy where it could focus on the most profitable customers while outsourcing less profitable customers to dealers.

1994-95

Armenia, Georgia, Abkhazia: Water & Sanitation Engineer, International Committee Of The Red Cross

This role consisted of emergency relief organisation in ex-Soviet Union, post-conflict zones. Rupert set up water & sanitation renewal programmes for clinics and hospitals. He also created fabric and roofing renewal projects and led distributed teams of 30 workers, in a team. He was responsible for budgets of 100 million roubles. 14 projects of varying sizes were completed on his mission, working in Nagorno Karabagh within Azerbaijan and also Georgia and Abkhazia, on the Black Sea. This was a challenge, given that he had to negotiate with mafia and live in many different places.

1994

Bosnia And Herzegovina: Water Engineer Team Leader, Scottish European Aid, Soros, UN

As a water & sanitation engineer, Rupert worked on project programming for sanitation, water supplies, and construction projects. With a budget of US\$ 1.4 million, he consecutively project managed 40 small rural and 2 large town projects near Tuzla town. He was also responsible for setting up a mobile slip form concrete team for villages. The locals provided the "equity" and did the manual work, while SEA provide skilled inputs and building materials. He spent much time spent surveying, negotiating, and drawing up contracts. He had to survey spring lines, elevations and distances, at villages near front line together with locals, managed to conceal several new water tanks underground to help avoid future artillery fire.

1993

UK: Substantive Second Lieutenant, Britannia Royal Naval Collage

Rupert entered the elite Navy training establishment of Her Majesty's Britannic Royal Navy. Here he covered a huge range of tactical leadership skills, and technical skills, in both classroom and outdoor environments. The Navy was not ultimately his vocation, but he has taken the excellent leadership skills and training he was given, and applied them to humanitarian work.

1992

Kuwait: United Agricultural Production Company

Rupert worked for the United Agricultural Production Company of Kuwait, as a member of a team reviving irrigation reholes after Gulf War. He surveyed damaged equipment and made lists of replacement parts. It was a frustrating mission, as the finances required to pay and implement the new equipment were simply not forthcoming.

1992

Albania: Project Proposal Researcher, World Vision

Proposals were submitted for a medical emergency and developmental farming in Albania, covering Emergency Seed Initiative, Emergency Rehabilitation of Health Care Services, Appropriate Mechanisation of Agriculture, Emergency Hospital Rehabilitation.

1991

UK: Dames & Moore, UK Ministry Of The Environment

Work involving thoroughly researching and writing up an environmental risk assessment for disposal of a variety of industrial and agricultural waste in UK, to inform the creation of UK legal code within Containment of Substances Hazardous to Health legislation.

1991

Northern Iraq: Engineer And Team Leader, Department For International Development

Working closely with Allied military personnel, teams of British firemen, aid workers and Kurdish refugees, Rupert project managed the effective logistics and establishment of adequate water and sanitation to refugees. This was an emergency assignment in Northern Iraq, in the Kurdish region, after Gulf War 1 ended, and it was arduous, living on the side of mountain.

Under the terms of 'Operation Haven' he was deployed as a civilian engineer, on attachment to 42 Royal Marine Commando, leading teams of UK emergency aid workers, including medics, firemen and emergency NGOs, to create emergency water and sanitation facilities for over 100,000 refugees. He also organised emergency health projects.

1989-91

Kenya, Uganda, Ethiopia: General Manager, Christian Engineers In Development

Work on projects concerned with water, waste disposal, agriculture. One of these employed local professionals and tribe refurbish a water supply tank in the Chalbi Desert. He also created and marketed an innovative database of technical consultants for use by NGOs at an affordable cost. In Uganda, he helped make plans for setting up a veterinary clinic to tribal reconciliation in the north, between Teso and Karamoja. He visited an Ethiopian orphanage and recommended ne for refurbishment of their water supply.

1988-89

UK: Laboratory Technician, Oil Plus Ltd

This position entailed helping to build complex laboratory experiments to test rock, water and oil samples with additives additives were put in water that was later pumped under oil-bearing strata, to loosen oil from the rock.

1987-88

UK: Agricultural Assistant, Flower Farms

Rupert worked on a mixed arable beef farm that was slowly becoming an organic farm. This gave him a thorough grouor the many diverse aspects of organic agriculture.

1982-83

India, Pakistan And Bangladesh, Gap Year Volunteer, Interserve

Rupert worked in the school holidays and raised money to go to Asia. He worked in Bangladesh, on NGO administration, practical work at an orphanage. Later in India he helped to set up an NGO conference. He ended up in Pakistan working student centre and on a building project.
