

Co-ordination Centre.

6. Phone List, a list of phone numbers of all UNDRO staff members.
7. Monthly Conference List, a list of all conferences of potential interest to UNDRO staff.

All of the above are entered via the VDU, edited by the Wylbur text-editing system and stored in the computer either as Wylbur data sets or in CALL/MAIL files. All are available to other authorized organizations.

Information to be computerized in near future:

1. Registry Master Index, of UNDRO Registry filing system, to be entered under Wylbur, stored in CALL/MAIL Registry file.

The following information exists in hard copy form, in the UNDRO Data Bank for the most part, and will be entered into the UNDRO Data Base using INQUIRE:

2. Stockpiles of emergency goods.
3. Suppliers of emergency goods.
4. Country Briefs. Will be based on the Country Fact Sheets of the LICROSS/Volags Steering Committee.
5. Consultant Register.
6. UNDRO Government Counterparts (similar to information now in UNDRO Directory).

Other information available:

The UNDRO Data Bank also contains several films and slides of past disasters, disaster preparedness, etc. The Data Bank also includes a map library.

Existing programs:

1. SENDTLX, a program which takes a single Telex composed and edited on a VDU, and sends it to up to 150 previously specified Telex addresses automatically. Written in PL/I Optimizer.
2. TELEXQ, a program which lists all Telexes on the ICC Telex queue waiting to be sent. Written in PL/I Optimizer.
3. UNDCON, a program which reports on contributions made to a particular disaster by various donors, reported by contributor, and containing a description of the contribution, its value, and a summary of all contributions by category of donor (government, UN organization, etc.). Written in PL/I-F.
4. UNDSORT, a program which sorts such contributions according to various categories and reports the corresponding information sorted as specified. Written in PL/I-F.
5. UNDPRI, a program which prints the input to the UNDCON and UNDSORT programs. Written in PL/I-F.

All programs listed are available to other authorized organizations, although 1 and 2 assume the special hardware interface which exists between the ICC computer and the PTT public Telex network.

Contribution data sets, as used by programs 3-5 above, exist for all disasters which involved UNDRO participation since 1976, and are also available to other authorized organizations.

Other computerized information:

1. UNDRO Directory, containing information useful in disaster emergencies, including contacts with governments and other organizations concerned with disasters, information on procurement, transportation of relief goods, stockpiles, etc.
2. Disaster Alert List, containing basic information on disasters, as soon as they occur, which potentially will involve UNDRO participation at some point.
3. Current Disaster List, containing basic information on disaster emergencies in which UNDRO is co-ordinating the relief efforts, along with the responsible officer.
4. UNDRO sitrep data sets, for printing a report containing all situation reports produced by UNDRO for a given disaster emergency.
5. Meeting List, a list of all meetings scheduled for the UNDRO
